Location

Luchtverkeersleiding Nederland LVNL

Stationsplein ZuidWest 1001
1117 CV Schiphol
The Netherlands

Description

EASA, EUROCONTROL MUAC, the LVNL and Skyguide invite you to Amsterdam on 16 & 17 November 2022 for a workshop on inclusion and diversity in ATM. The event will bring together diversity and inclusion (D&I) leaders and experts, executives and HR specialists to help shape the future of the industry. The goal is to develop a white paper to ensure a diverse talent pipeline, which encourages more amazing people into this vital part of the aviation industry.

The white paper will describe the institutional, organisational, voluntary groups' and individuals' dimensions of D&I. There is a lot of talk about diversity and inclusion, but what does it really mean at a practical level? How can our organisations evolve for the better in order to be more inclusive, more diverse and more able to take advantage of the full range of talent? who would consider a career in ATM if only they had different perceptions about the kind of industry they would be joining?
