European Union Aviation Safety Agency

FAQ n.139826

FAQs:

Scope/Applicability, Air Traffic Management / Air Navigation Services (ATM/ANS) ground equipment, Regulations

Question:

What parts/functions/constituents of a remote tower system will be subject to conformity assessment?

Answer:

Regulation (EU) 2023/1768 defines the categories of equipment that are subject to the conformity assessment process. Please see Article 4 (for equipment subject to certification), Article 5 (for equipment subject to a declaration) and Article 6 (for equipment subject to a statement of compliance). The regulation applies equally to equipment used within a remote tower system or a conventional tower system.
