European Union Aviation Safety Agency

FAQ n.139827

FAQs:

Categorisation of systems or equipment, Air Traffic Management / Air Navigation Services (ATM/ANS) ground equipment, Regulations

Question:

Does the European Union Aviation Safety Agency (EASA) provides for the possibility of Air Traffic Management / Air Navigation Services (ATM/ANS) equipment supporting multiple functions, which falls into different categories and hence is subject to more than one attestation method?

Answer:

EASA provides for the possibility of ATM/ANS equipment supporting multiple functions, which falls into different categories, and in such case, the attestation process for the highest-severity function would apply. For example, if one piece of equipment hosts two functions (one falling under certification and one under declaration), then the equipment would follow a certification process.
