VIRTUA — Final dissemination event

Video recording: VIRTUA (Digital Transformation — Case Studies for Aviation Safety Standards — Virtualisation)

Description

The VIRTUA project is concluding its research on blockchain for airworthiness in aviation. Join us for this final event, where we will present the research carried out and the achieved results.

Agenda

- Welcome by EASA
- Overview of research scope and objectives, project implementation and structure, stakeholder engagement, key results, identified limitations and proposed solutions, solutions impact assessment, regulatory analysis and proposed roadmap, guidance and training material and the way forward.
- Q&A session
