EASA ER 2024 Rotorcraft Safety Zone - Educational Programme - presentations

EASA ER 2024 Rotorcraft Safety Zone - presentations - Part I

EASA ER 2024 Rotorcraft Safety Zone - presentations - Part II

Description

The EASA Rotorcraft and VTOL Safety Symposium is a unique forum in Europe to discuss the latest developments in rotorcraft safety. This event gives the opportunity for Authorities, Industry, Operators, Pilots, Safety Investigators, Researchers to actively exchange ideas,

innovations and best practices.

The program covers a wide range of topics on the following themes: “Best practices on Operational Safety improvements”, “Latest news on eVTOL and UAS Certification requirements and policies” and “The Future of Rotorcraft Automation and the benefits for training”.

The Symposium will take place on 4 November 2024 as the kick-off event of EUROPEAN ROTORS that will open the exhibits to public on 5 November. EASA will contribute also to other technical conferences, side meetings and technical debriefs with a “talk to the EASA experts” and to the Rotorcraft Safety Zone, co-organised with ESPN-R. (EUROPEAN ROTORS takes place from 5 to 7 November, at the “RAI” Convention Centre in Amsterdam).
