

**FAQs:**

[Introduction to ADS-L , Automatic Dependent Surveillance — Light \(ADS-L\)](#)

**Question:**

**What are the transmission links supported by ADS-L?**

**Answer:**

ADS-L is a protocol that can be transmitted over different links. A standard for ADS-L messages over the SRD860 frequency band is already available. Future specifications will follow to enable ADS-L to be transmitted over mobile networks such as 4G and 5G.
