European Union Aviation Safety Agency

FAQ n.141889

FAQs:

Regulatory Framework and Recognition , Automatic Dependent Surveillance — Light (ADS-L)

Question:

Are there any upcoming deadlines or regulatory changes related to ADS-L adoption in Europe?

Answer:

There are no foreseen mandates requiring the use of ADS-L. However, electronic conspicuity mandate in SERA.6005(c) already recognises it as one of a few means to be conspicuous in U-Space (e.g. as an alternative to ADS-B out certified solutions).
