

**FAQs:****Regulatory Framework and Recognition****Question:**

**Are there any upcoming deadlines or regulatory changes related to ADS-L adoption in Europe?**

**Answer:**

There are no foreseen mandates requiring the use of ADS-L. However, electronic conspicuity mandate in SERA.6005(c) already recognises it as one of a few means to be conspicuous in U-Space (e.g. as an alternative to ADS-B out certified solutions).
