European Union Aviation Safety Agency

FAQ n.142360

FAQs:

Applicability, Information Security (Part-IS)

Question:

Does the ELA2 exemption referred to in art. 2(1) of Delegated Regulation 2022/1645 apply also to an approved production organisation that manufactures parts or components for ELA2 aircraft?

Answer:

Yes. The term ELA2 aircraft should be understood to include as encompassing aircrafts constituent components, such as their engines, propellers, parts. Consequently, organisations that can clearly demonstrate that they are involved in the production of products or parts to be exclusively installed on ELA1 or ELA2 aircraft are also exempted from complying with Part-IS.
