

European Union Aviation Safety Agency

## FAQ n.143007

### FAQs:

#### Higher Airspace Operations (HAO)

### Question:

**How will stakeholders be engaged?**

### Answer:

Through advisory boards, targeted workshops, meetings, and consultations on draft impact assessments and regulatory options.

Specific external stakeholders will be directly involved in the research activities through the outsourced tasks. Specific key stakeholders like the EDA and EUROCONTROL will be engaged through direct cooperation and consultation. In addition, EASA will organise dedicated workshops and technical meetings and conduct focused consultations. Stakeholder input will be sought throughout the project, during the development of impact assessments and the elaboration of regulatory concepts and options, as well as through formal public consultation on draft regulatory proposals.
