Description

The highly successful EASA ETSO workshop is back for the 11th time. It will be held on **17 & 18 June 2015** at the **Pullman Hotel, Helenenstr.14 in Cologne**. The workshop is scheduled for two full days, a detailed agenda will be provided nearer the time.

Since the first workshop in 2004, this event has grown in popularity and attendance. It has become a regular forum for the worldwide community of ETSO/TSO manufacturers, installers and operators, where topics of common interest in the various fields of aviation equipment are presented and discussed, aiming at updating participants, and getting their feedback on industry and authority initiatives concerning operational, design, manufacturing and regulatory matters with the common scope of fostering safety. Besides EASA, FAA, TCCA also

representatives from CAAC and ANAC may be present.

According to the feedback from the last ETSO workshop, we have planned to include a general session, covering topics of interest for all participants, like updates from Rulemaking, ADOA, foreign authorities, and two split sessions with more detailed discussions in the domain of avionics as well as seats/mechanical systems. Copies of all presentations held as well as additional background material will be made available on the EASA website for download after the workshop; considering the environmental impact we have decided not to print any hand-outs this year.

Your contribution to the Workshop

To better prepare the workshop, we would like to get your questions, views and proposals in advance. Also if there are subjects that you, industry would like to present. We would also like to know about areas in which you see problems that should be addressed or areas where you need further information. So if we could kindly ask you to submit your questions or proposals no later than **13 May 2015** to etsoa [at] easa.europa.eu (subject: Questions%20ETSO%20Workshop) (etsoa[at]easa[dot]europa[dot]eu). This will allow us to prepare for the workshop.
