Description

Day 1: 14:00 – 17:30

Day 2: 09:00 – 17:00

This time, our 3rd OPS Workshop will dedicate half a day to the implementation of Operational Suitability Data (OSD) directed to operators and training organisations, including one session on the new Commission Regulation Part 26 and the supporting Certification Specifications CS-26, applicable to operators of large aeroplanes.

The next day of the event will be dedicated to presentations and discussions focused on flight

crew training, operational procedures, management system, as well as organisation and oversight of AOC holders and any other issue addressed in Regulation (EU) No 965/2012 on air operations, Part- CAT, Part-SPA, Part-ORO, Subparts ORO.GEN/AOC and ORO.MLR.

The aim is to hold an interactive workshop attended by representatives from the commercial air transport fixed-wing and helicopter community, training organisations and National Aviation Authorities. The workshop will give the opportunity to provide an update to the latest regulatory developments, discuss various implementation issues and exchange views with the industry and NAA representatives across Europe.
