

European Union Aviation Safety Agency

FAQ n.19395

FAQs:

[Approval of Flight Conditions, General Aviation](#)

Question:

Who can Approve Flight Conditions?

Answer:

In accordance with Part 21A.710 EASA is normally responsible for the approval of Flight Conditions where they relate to safety of the design. However, certain DOA holders may have the privileges to approve flight conditions related to safety of the design. Where the Flight Conditions are not related to safety of the design, they may be approved by the competent authority.
