European Union Aviation Safety Agency

FAQ n.21111

FAQs:

Technical Issues, Third Country Operators (TCO), Regulations

Question:

Can EASA issue a TCO authorisation in the absence of any aircraft compliant with the applicable standards of the Annexes to the Chicago Convention?

Answer:

No, if an applicant for a TCO authorisation does not declare at least one aircraft compliant with all applicable technical standards of the Annexes to the Chicago Convention, EASA will not issue a TCO authorisation and will mark the aircraft as ‘Not authorised’ in the online TCO web-interface.

Should a TCO authorisation holder remove all authorised aircraft from the aircraft listing in the web-interface, then EASA will render the TCO authorisation invalid.
