[Changes in CS-23](#)

Description

The workshop is organised to explain the change of CS-23 to objective based requirements supported by detailed Acceptable Means of Compliance.

The workshop is the opportunity for designers (CS-VLA & CS-23) to learn about the transition to the new CS-23 concept and the impact of this change to the certification process. What is

changing in respect of special conditions, ELOS, compliance checklists and TCDS data?

This workshop will start with the generic concept of objective requirements supported by detailed AMC and ASTM standards as one of those means. The second half of the workshop will focus on the technical changes and on the impact that it has on the certification process.

Workshop is fully booked

Cancellations and Refund Policy

Substitutions and cancellations can be made until 17/03/2017. Please notify us as soon as possible at CT7-Workshops [at] easa.europa.eu (CT7-Workshops[at]easa[dot]europa[dot]eu).
