Description

Tuesday 8th of November: High level meeting

Wednesday 9th of November: Technical workshop

Location and organisational details: The exact venue and further organisational details about the conference are available at the conference website: http://www.cybersecurity.krakow2017.eu/.

Registration: You can register to the event at the following address: http://www.cybersecurity.krakow2017.eu/registration/

Cyber-threats to the civil aviation system are considered a major concern. Cyber-attacks

against civil aviation operations could potentially be catastrophic with significant casualties, disruption to civil aviation services, and/or damage to critical infrastructure. Equally endangered are airlines, airports and air traffic management. The conference will bring together States, industry, partners and other key players to raise awareness of the threats as well as discuss and develop practical and sustainable policies, approaches and measures to protect against them and mitigate their impact.

A workshop will be held the day after the conference on the 9th of November. It will be dedicated to discuss technical matters.

The event is organized in close co-operation with the Polish Ministry Infrastructure and Construction, the European Aviation Safety Agency (EASA) and the Civil Aviation Authority of Poland.

For more information on the workshop, please visit the High Level Conference Cybersecurity in Civil Aviation website.
