Description

The European Safety Promotion Network Rotorcraft (ESPN-R) and the International Helicopter Safety Team (IHST) will host the rotorcraft Safety Workshop during Helitech International. Leading experts from various stakeholders will provide updates regarding safety enhancing programmes, thereby also seeking feedback from the audience. Finally the (interactive) workshop on human factors will work along some helicopter accident cases with related human factors topics.

The vital importance of safety in rotary wing operations is highlighted by this Safety Workshop and as such it will be an ideal platform to discuss helicopter safety issues and to further enhance the safety awareness.
