

Third EASA Industry Meeting

Date:**18 Nov 2004**

Description

Cologne, Germany

EASA industry meetings address a broad cross-section of stakeholders from the industry: aircraft manufacturers, trade organisations, airlines, maintenance organisations, etc. They aim to provide information on the latest developments of the Agency's activities, acting as a forum for questions and answers and direct contact with decision-makers. The Agency's industry meetings play an additional role as a networking opportunity for professionals to exchange safety best practices across the aviation community
