

EASA's flight plan for Sport Aviation - Workshop on Initial Airworthiness

Date:

25 Apr 2008

Description

AeroExpo Prague 2008 - Pribram Airfield Prague, 'EASA Seminar Room', Czech Republic

The objective of the workshop is to present the NPA to Part 21 that is proposing a simplified process for European Light Aircraft (two sub-processes: one for aircraft less than 2.000 kg; one for aircraft less than 1.000 kg). This workshop will generate first reactions on the NPA and facilitate the preparation of comments to the NPA for authorities and stakeholders, in particular designers and producers of Light Aircraft.

Presentation developed by the MDM.032 EASA Working Group 'Developing a concept for a better regulation in General Aviation':

Participation is open to authorities and stakeholders interested in certification of Light Aircraft, in particular designers and producers of Light Aircraft
