

CPR-IIT Industry Outreach Meeting

Date:

23 Sep 2009

Location

Ottoplatz 1, 50679

close to EASA Offices at Köln-Triangle

[More info on the EASA offices](#)

Description

RHEIN Conference Room

The objective of the workshop is to inform European industry about results of continued efforts of the three Authorities - the FAA, Transport Canada, and the European Aviation Safety Agency - which joined forces in the International Implementation Team (IIT) to monitor and, as far as necessary, to improve implementation of the paragraphs 21.101 and 21.19 of Part 21 related to the Changed Product Rule (CPR) and Substantial changes. The workshop will focus on major issues identified in the certification practise with implementation of these two paragraphs and will present the substance of the proposed changes to the related guidance material (FAA AC 21.101/EASA GM 21A.101/TCCA AC 500-01). The workshop is intended to give Industry an early notice about these changes before the formal consultation processes are launched by each Authority and to receive a preliminary Industry feedback.

Participation:

- European industry representatives
- Transport Canada
- FAA
- EASA
