

2nd European Aviation Safety Plan (EASp) implementation and review summit

Event

Category: European Aviation Safety Plan (EASp) implementation and review summit

Date:

16 Nov 2012

Description

Meeting Room 04.049

- Starting 09h00
- Ending 17h00

Following the first EASp summit which showed the benefits and importance of coordinating the activities to manage safety at European level with the ones being carried out at Member State Level, it has been decided to organise a second summit on Friday 16th November 2012.

During this one day activity we will together evaluate how the EASp is being implemented in the Member States as well as in which ways we could improve the approach to better coordinate our efforts; hence making a difference in the way we manage safety in aviation.

During the summit the draft third edition of the EASp addressing the period between 2013 and 2016 will be presented. We believe that it would be an excellent opportunity to validate and discuss specific actions with the States involved in the implementation of the EASp.

Useful documents/links

- The two published editions of the EASp as well as the Communication and the European Aviation Safety Programme (EASP) published by the Commission available at easa.europa.eu/sms.
