Description

On 1 November 1993 the first issue of JAR-21 including DOA requirements was published. 2013 marks the 20th anniversary of the DOA concept in its current form and will be celebrated during our Part 21 Design Organisation Approval (DOA) Implementation Workshop.

The objective of the workshop is to give to Authorities staff involved in EASA DOA and Industry representatives an update on EASA Design Organisation (DO) Section working procedures. It will also specifically focus on several subjects of significance

to be shared equally between Authorities staff and EASA Staff working in a DO environment and the Industry representatives.
