## FAQ n.22610

### FAQs:

[Part-SPO](#), [Air Operations](#), [Regulations](#)

### Question:

**Is 'MOPSC' (Maximum Operational Passenger Seating Configuration) applicable in case of parachute dropping, where only task specialists are carried?**

### Answer:

*MOPSC - Reference: Reg. (EU) No 965/2012 on air operations: SPO.IDE.A.130*

For the purpose of SPO.IDE.A.130, only one of the two values is used: either MCTOM of more than 5 700 kg or MOPSC of more than nine.

MOPSC is established for operational purposes. Where MOPSC is not established or is not relevant for a particular operation, the value of MCTOM should be used.
