

# FAQ n.115365

### FAQs:

Airspace Usage requirements – DLS/CPDLC (controller-pilot data link communication), Airspace Usage requirements, Regulations

# **Question:**

How can I determine if my aircraft is CPDLC multi-frequency capable?

# **Answer:**

Operators can check:

- the AFM, which should contain a statement such as "The aircraft ATC Data Link system does support multi-frequency operation as defined in ARINC Specification 631-5." or
- directly with the type certificate holder (TCH) or with the supplemental type certificate holder (STCH) if the system was installed by an STCH. or
- check the aircraft documentation for the indication that the system supports CPDLC multifrequency operation (e.g. ARINC Specification 631-5 or higher)
