DE TRANSPORTES, MOVILIDAD  
Y AGENDA URBANA

# Implementation of new regulations (IR's, AMC's & CS's)

Iraia María IRAZABAL

Head of Certified Aerodromes Safety Oversight Division in Spanish NCA

06-april-2022

# 1. The challenge

➔ The implementation of new regulation has been one of the biggest challenges once the certification processes finished, with two main “pain points”:

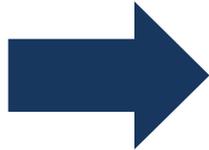

1. Considerable **increase of the already existing workload** (both within the Competent Authority and the Aerodrome Operators)
2. Need of a **feasible timeframe** for the implementation of the regulation.

## Main "pain-points"

Increase of the workload

Need of a feasible timeframe

## Mitigation measures

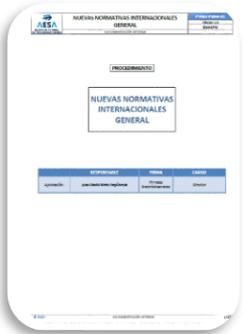

**Improvement of the procedures**  
(both of the NCA and the aerodrome operators)

**Strong coordination**  
between the NCA and the aerodrome operators

# 3. Developing specific procedures

Key aspects

Agreement of an specific timeframe for each regulation

Compliance assessment

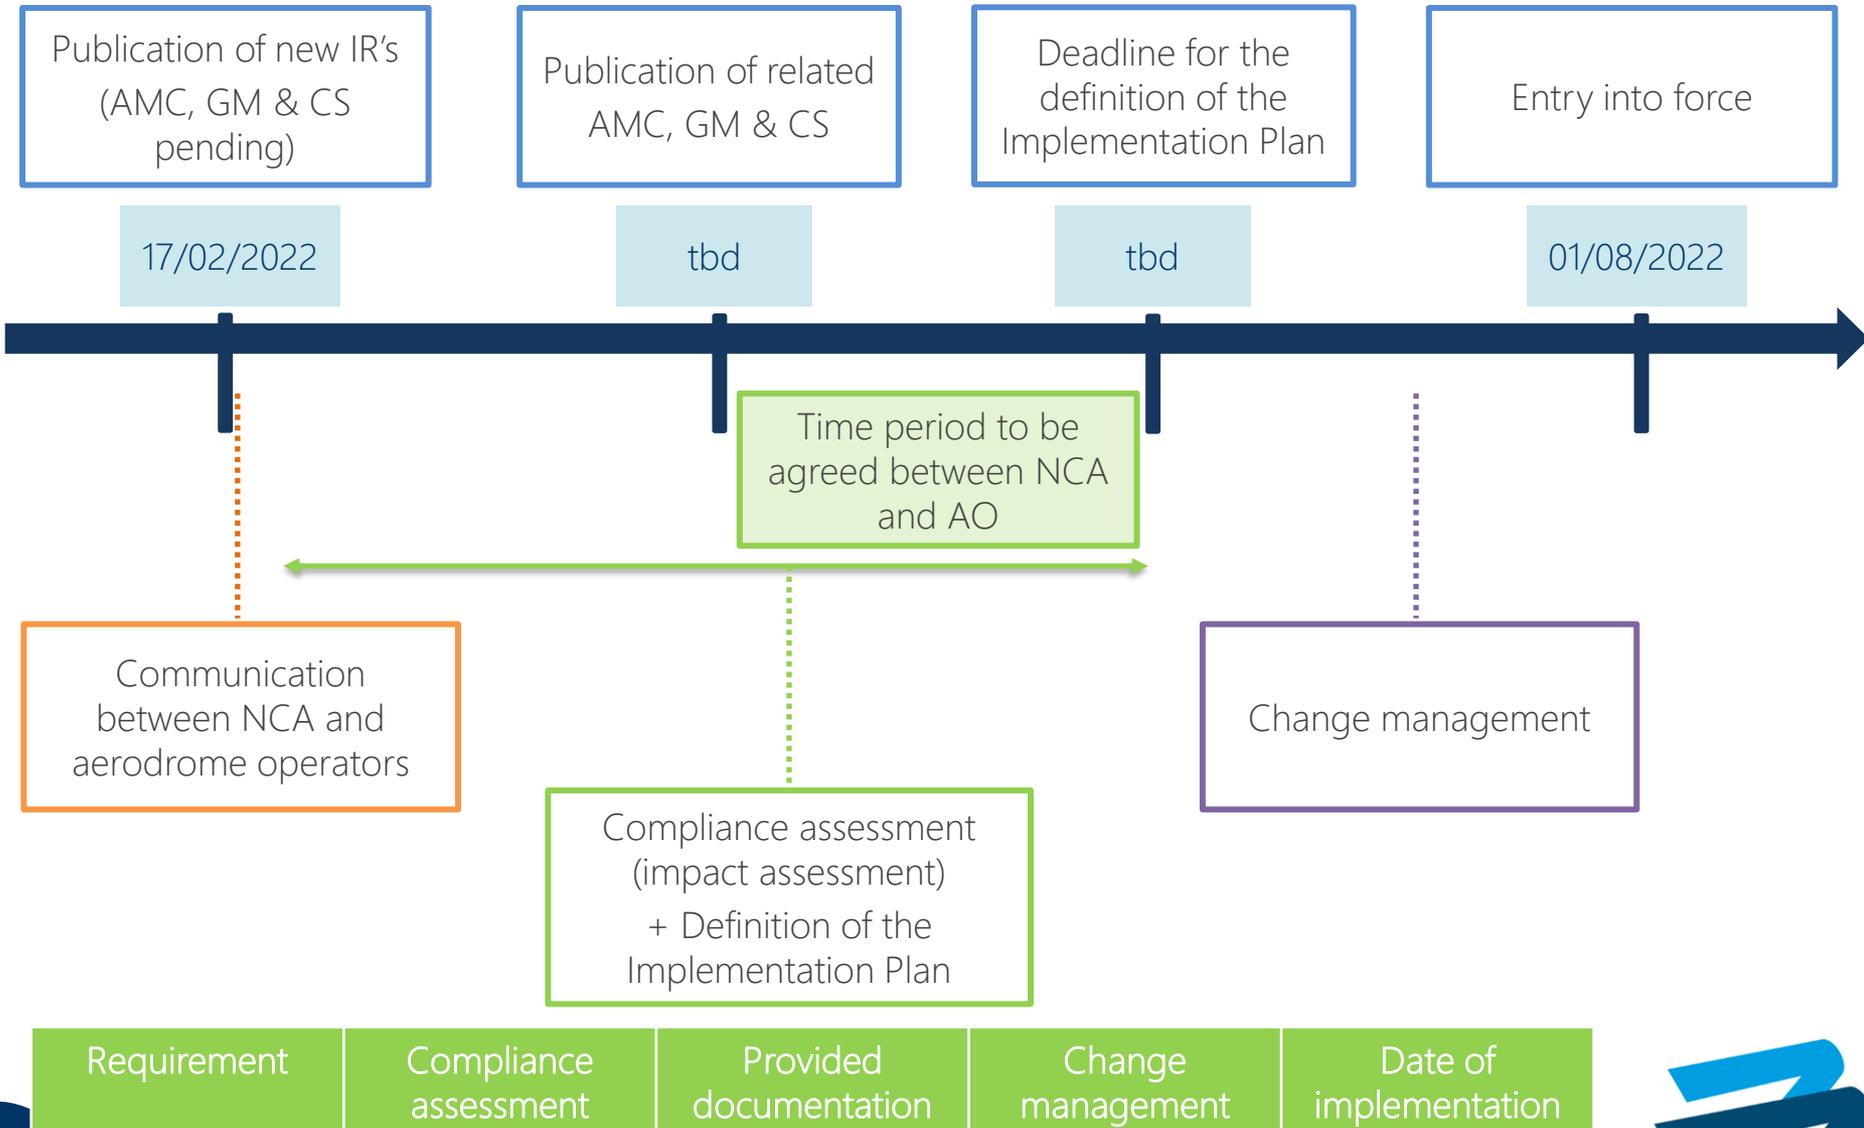

Definition of an implementation plan

Change management(s)

Evaluation of the impact of the new regulation

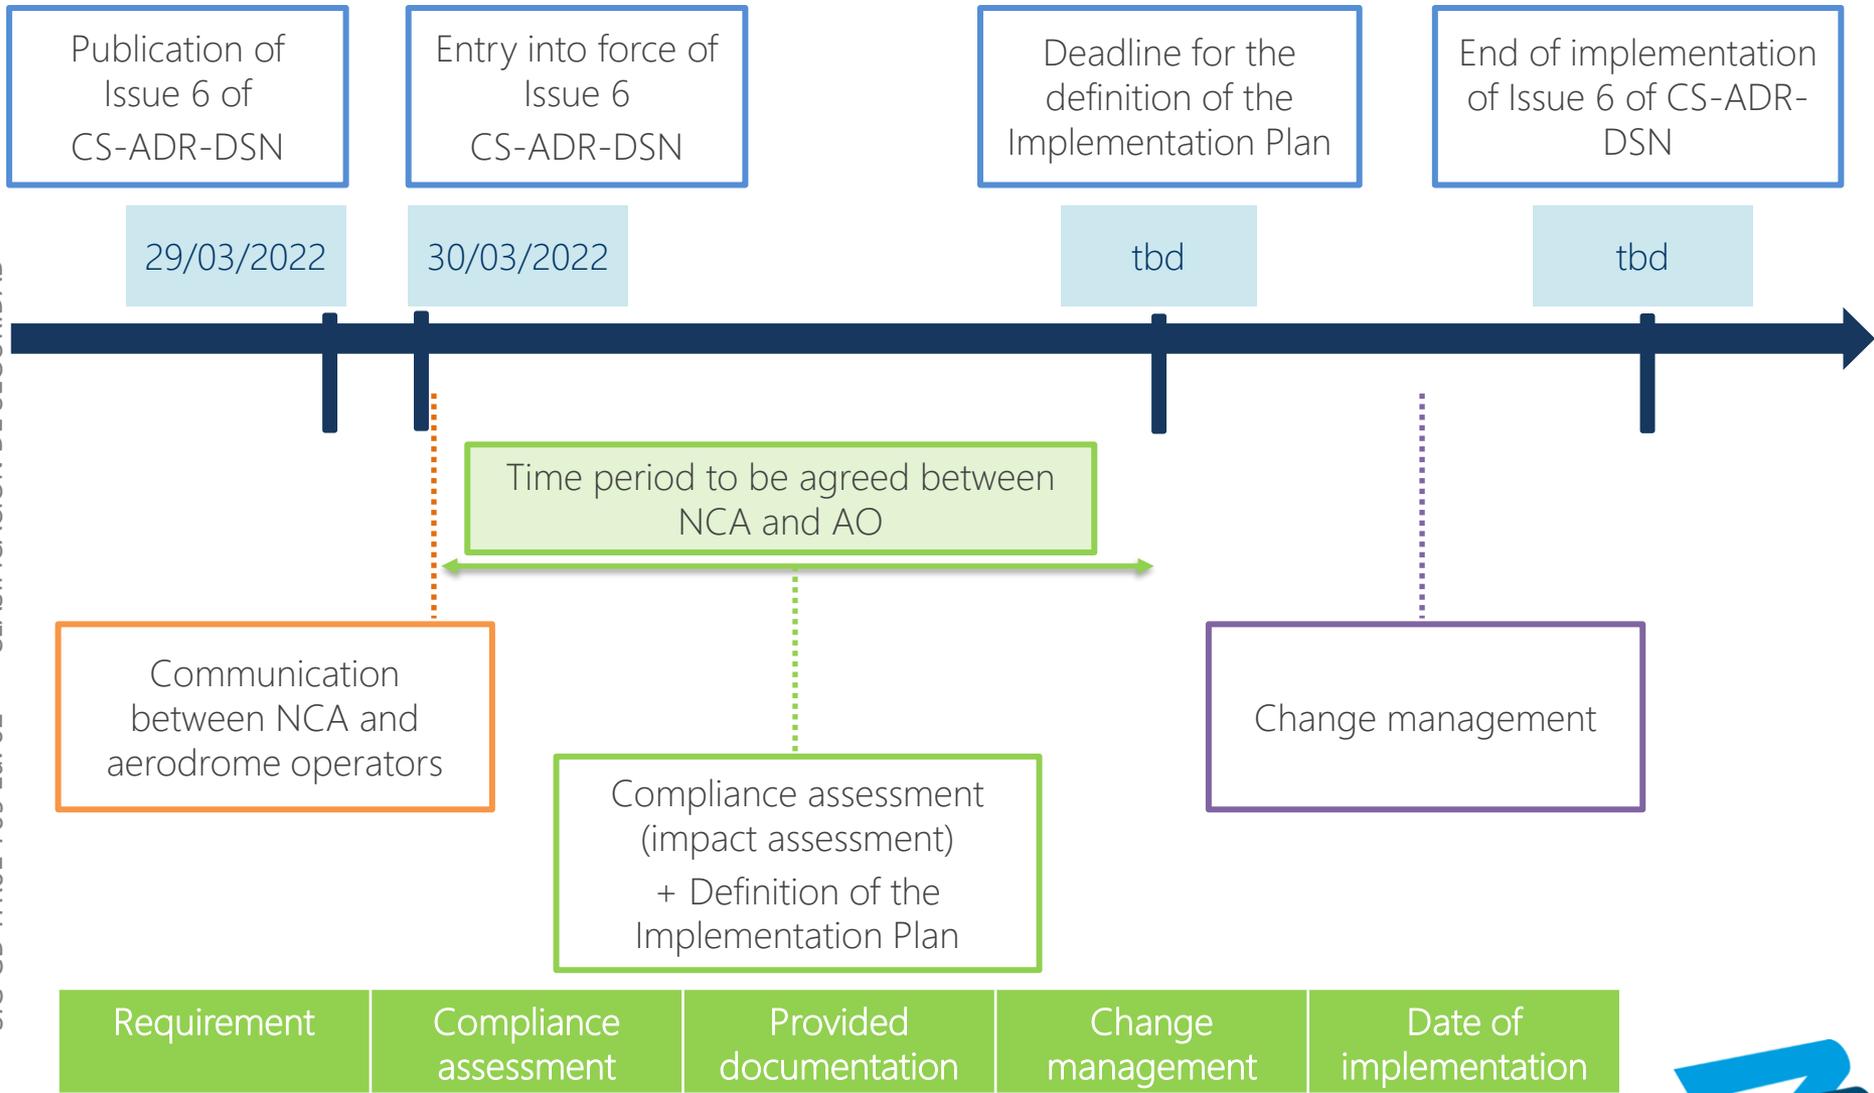

Evaluation of the workload needed for the implementation

CLASIFICACION DE SEGURIDAD

SIG-GD-ITR01-F09 Ed. 02

Requirement	Compliance assessment	Provided documentation	Change management	Date of implementation
