Cologne

Some Background...

Heart Aerospace and the ES-30

An aerospace start-up in 2019; now 200+ team members from around 30 countries uniting to build our company

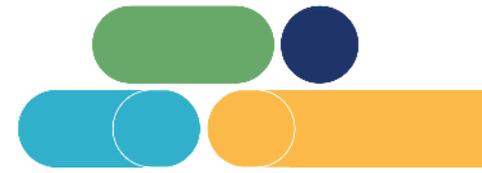

More than 460 commitments (orders and LOIs) from airlines and lessors in Europe, North America, Oceania

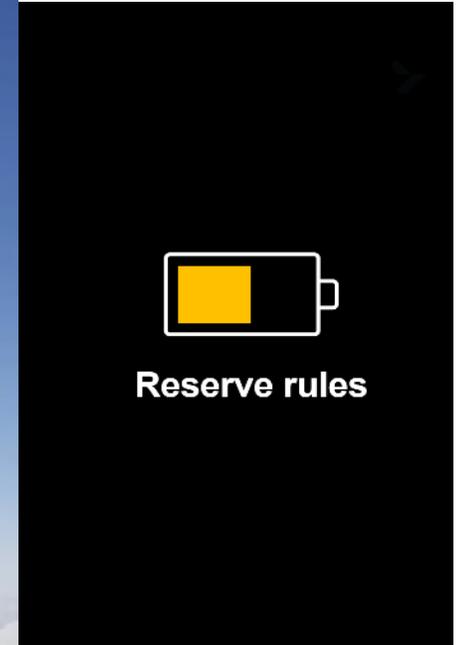

30 seat, electric-hybrid aircraft designed and built in Sweden, entering commercial service in 2028

350km/h cruise speed, 200km all electric range, 800km Reserve Hybrid™ range.

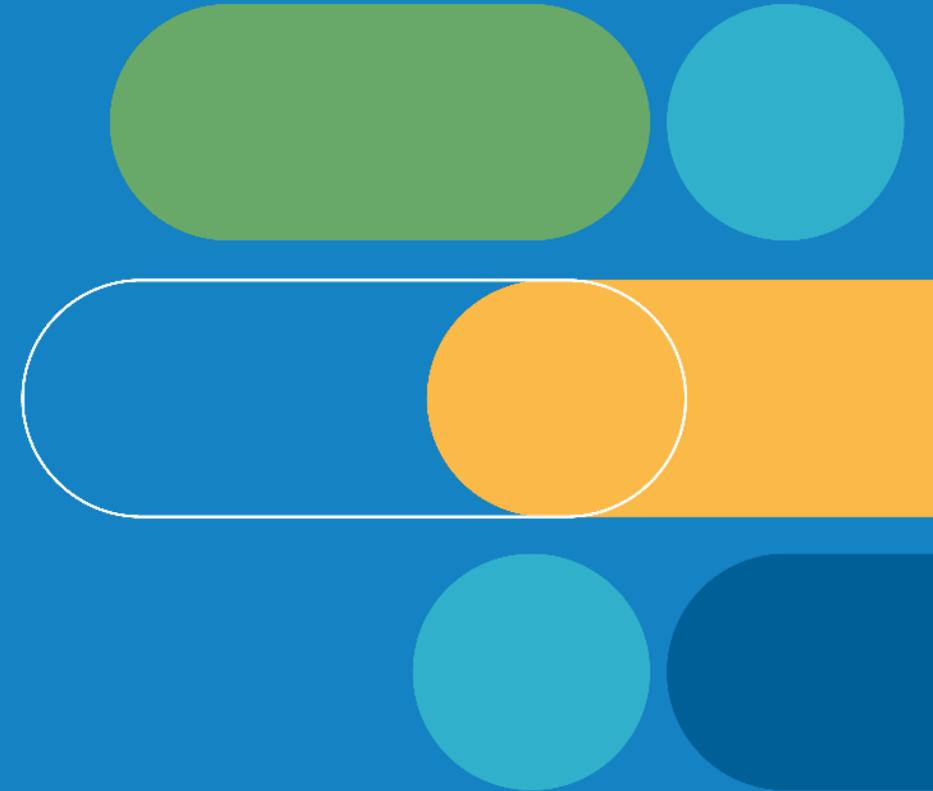

Our Journey

Certification Conference

October 24, 2023
Cologne

Our Challenges

To name a few:

- Regulatory framework under development, particularly on CS-25
- Means of compliance for novel technologies yet to be developed
- Propulsion battery considerations
- International harmonisation: authorities, regulations, standards

...and all that:

- Being a start-up company
- Building on the legacy of safety already established by consolidated OEMs

Certification Conference

October 24, 2023
Cologne

Thank you!
