

FAQs:

[Introduction to ADS-L](#) , [Automatic Dependent Surveillance — Light \(ADS-L\)](#)

Question:

What are the transmission links supported by ADS-L?

Answer:

ADS-L is a protocol that can be transmitted over different links. A standard for ADS-L messages over the SRD860 frequency band is already available. Future specifications will follow to enable ADS-L to be transmitted over mobile networks such as 4G and 5G.
