3. Updated Flextool for exemptions

Presented by: *S. Chollet*

EASA provided an update on the new Flextool platform. NCAs are requested to describe the subject of their exemption in the Flextool when registering their exemption and to avoid unnecessary text describing a reference to the BR. Please refer to presentation.

4. Remote Audit

Presented by: *K. Specht*

Please refer to presentation, no questions raised.

5. Aircrew and Medical Standardisation Update

Presented by: *EASA staff*

5.1. Review of Standardisation Activities in 2021

Please refer to presentation. EASA clarified that it may develop training courses for FSTD inspectors, but due to COVID and related resource issues this training could not yet be fully developed.

EASA clarified some comprehensive inspections/audits could be done remotely during the on-going uncertainties caused by the pandemic. However, normally on-site inspections of organisations should be conducted especially those relating to initial certification.

5.2. Standardisation Inspection Annual Programme 2022

Please refer to presentation

5.3. Single-pilot certified aircraft operated in multi-pilot operation

Please refer to presentation.

Different proposals about the endorsements were discussed.

#AI: NCAs to provide feedback to this EASA proposal, feedback to be considered for GM development (licence endorsement tables)- deadline **17.12.2021**

5.4. Enhanced monitoring approach UPRT implementation

Please refer to presentation in relation to monitoring UPRT provisions through enhanced CMA. No questions raised.

6. Aircrew and Medical Regulatory and ECQB Update

Presented by: *EASA staff*

6.1. Rulemaking:

6.1.1. MPL with CPL privileges – endorsement or new licence?

Feedback from NCAs: Operators do not like MPL with CPL privileges endorsed, they prefer “real” CPLs and are requiring CPL/IR. There is a lack of MPL acceptance. The proposal is to replace MPL with CPL and transfer MP type ratings to the new CPL with a MP restriction. The IR SP/MP privileges need to be considered as well.

The participants support the idea of allowing MPL/CPL replacement.

#AI: EASA to consider a solution/rulemaking proposal, agreement to replace with CPL rather than keep MPL with CPL privileges.

6.1.2. ICAO Personnel Training and Licensing Panel (PTLP): EASA guidance on replies to questionnaires for States

EU-coordination for Panel activities has started and will be further developed and improved, once the technical work will start.

#AI: EASA to ensure that ICAO PTLP update will become a standing TeB agenda item.

6.1.3. Update on FSTD activities including Special Conditions process

Some questions on acceptability of the new FNPT II for licensing training, review ongoing for potential clarification in the rule.

6.1.4. Definition of complex motor-powered aircraft

No questions raised.

6.2. ECQB

Please refer to presentation. No questions raised.

6.3. Report from the MEG and EAMR

Please refer to presentation.

#AI: EASA to share MoM from MEG once ready- beginning 2022

#AI: EASA to clarify internally question from Germany: After BIS consultation, how will comment responses be made visible to the public / TeB?

7. Topics raised by NCAs

Presented *by*: EASA staff/NCAs

Please refer to Annex 1 with topics for discussion.

8. AOB

Presented *by*: EASA staff/NCAs

Remaining MS topics to be discussed in a separate follow-up meeting (virtual only) on 16 December 2021.
