

The undersigned partners, collectively forming the ADS-L Coalition, hereby affirm our commitment to and support of the ADS-L protocol as an essential means of enhancing situational awareness and improving aviation safety.

In particular, the ADS-L Coalition:

- Fully supports and endorses the ADS-L standard as the future unified interoperable protocol for enhancing pilot situational awareness to complement See and Avoid in Europe.
- Commits to integrate ADS-L into our current or future products in line with EASA strategic initiatives.
- Encourages wide adoption of ADS-L to ensure consistency, interoperability and maximise safety benefits.
- Will actively support the evolution of the ADS-L protocol to incorporate further improvements.

Together, we believe that adopting ADS-L alongside existing protocols will ultimately benefit the entire aviation community through improved safety.
