ECCAIRS2: ICAO and EASA's International Strategy

ICF/8 Sri Lanka

March 2024

ECCAIRS2

E2

Your safety is our mission.

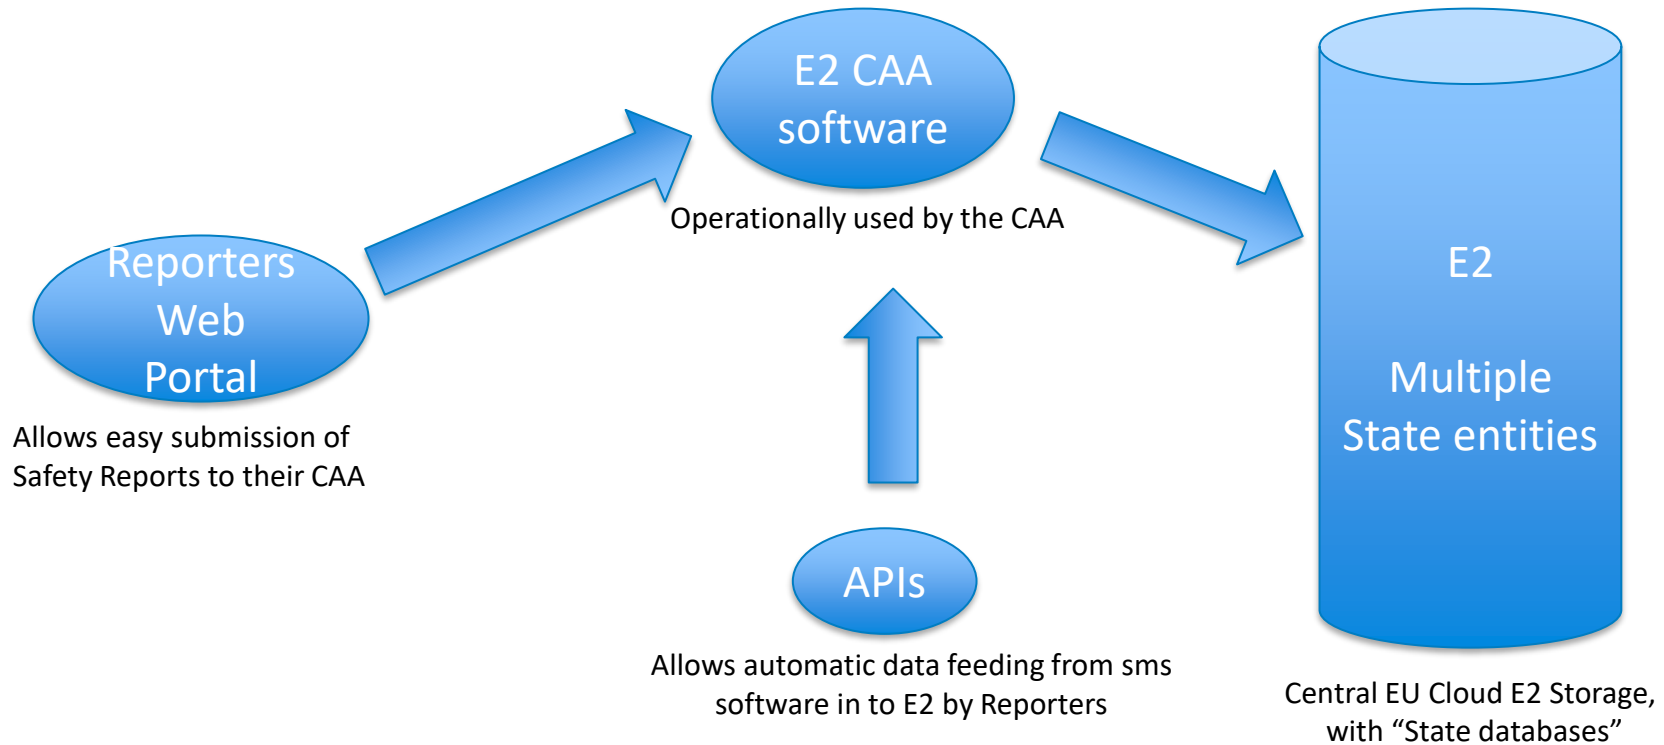

An Agency of the European Union

History of ECCAIRS and drivers for the creation of E2

- *The current ECCAIRS (E1) has been in existence for over 3 decades*
- *E1 was developed and supported by EU DG JRC*
 - *IT Technology behind E1 was from the “80ties” and had a heavy Architecture because of decentral and individual “PC & Server installations”*
- *E1 is no longer available for new installations and no longer under maintenance or support for running instances as of 2020*
- *EASA has not taken over E1 “as-is” from JRC, but has redeveloped the solution, naming it ECCAIRS 2 or E2 in short.*
- *E2 is a central, EU Cloud solution without any local PC/Server installation. Browser Internet access only.*
- *E1 is no longer available for new installations and no longer under maintenance or support for running instances as of 2020*

ECCAIRS 2 : the basic flow highlighted

Principles for ICAO States desiring to get their own E2 system

- *The EU has signed a revised Working Arrangement with ICAO on ECCAIRS*
- *The WA revision focusses on the potential use of E2 for ICAO States*
- *ICAO endorses that ICAO States can request their own E2 instance*
 - *Becoming part of the global, central E2 cloud system of EASA*
 - *E2 solutions cannot be installed locally at/on ICAO State IT systems*
- *Boarding trajectory:*
 - *Procure an ICAO iPack “ECCAIRS 2 Annex 19” when available. **This is a one-off cost.***
 - *This Ipack is being designed and created by ICAO with full support and input of EASA*
 - *Target of ICAO is to have it available by Q3 2024*
 - *This iPack will contain the setup and configuration and admin-training of the ICAO State’s own E2 instance*
- *In parallel to the procurement and delivery of this iPack, the ICAO State will have to sign a Service Agreement with EASA*
 - *This is a contract between the ICAO State and EASA directly*
 - *It enumerates the E2 services and support levels provided by EASA*
 - *For those services and support, the ICAO State will commit to pay a yearly E2 usage fee to EASA. **This is a yearly recurrent cost.***
 - *Height of the fee will be driven by the assessed size and usage of E2 by the ICAO State*
 - *Fee is based on cost elements for the E2 EU Cloud and the support services*

EASA eRules

Modern way of presenting aviation rules

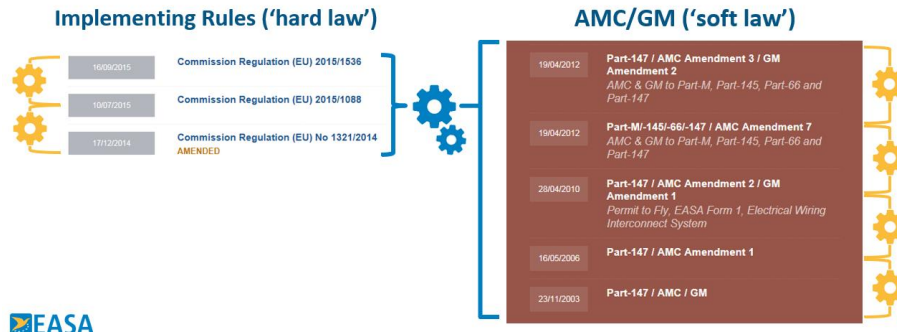

Your safety is our mission.

An Agency of the European Union

Trigger for eRules (back in 2016)

- Lack of single source of rules
- Complexity of European aviation regulatory system
- Inefficiency in internal and external processes

Business requirements (back in 2016)

- Consolidate regulatory material scattered over different sites
- Create consolidated outputs (**Easy Access Rules**) in different formats
- Share consolidated outputs with stakeholders

What is eRules?

- Platform for managing aviation rules based on a Component Content Management System (**CCMS**)
- **Easy Access Rules** are published from **eRules**

**eRules =
structured data**

ARO.GEN.120 Means of compliance

Regulation (EU) 2018/1234

(a) The Agency shall develop acceptable means of compliance (AMC) that may be used to establish compliance with Regulation (EU) 2018/1139 and its delegated and implementing acts.

(b) Alternative means of compliance may be used to establish compliance with Regulation (EU) 2018/1139 and its delegated and implementing acts.

(c) The competent authority shall establish a system to consistently evaluate whether the alternative means of compliance used by itself or by organisations and persons under its oversight comply with Regulation (EU) 2018/1139 and its delegated and implementing acts. That system shall include procedures to limit, revoke or amend approved alternative means of compliance, if it has been demonstrated by the competent authority that those alternative means of compliance do not comply with Regulation (EU) 2018/1139 and delegated and implementing acts adopted on its basis.

(d) The competent authority shall evaluate all alternative means of compliance proposed by an organisation in accordance:

- with point [ORO.GEN.120\(b\)](#) of Annex III (Part-ORO) to this Regulation;
- for balloons with point BOP.ADD.010 of Annex II (Part-BOP) to Commission Regulation (EU) 2018/395¹; or
- for sailplanes with point SAO.DEC.100(c) of Annex II (Part-SAO) to Commission Implementing Regulation (EU) 2018/1376²;

by analysing the documentation provided and, if considered necessary, conducting an inspection of the organisation.

When the competent authority finds that the alternative means of compliance are in accordance with the implementing Rules, it shall without undue delay:

- notify the applicant that the alternative means of compliance may be implemented and, if applicable, amend the approval, specialised operational authorisation or certificate of the applicant accordingly; and

Easy Access Rules – available in 3 formats

PDF format – as of 2017

- Consolidated, structured content
- One of most downloaded files on EASA website

Online format – as of 2020

- Adjustment to mobile views (tablets, phones)
- Online filters to provide a view tailored to users' needs

XML format – as of 2022

- Machine-readable format – for integration with stakeholders' applications

Data4Safety

Partnership for Data Driven Aviation Safety Analysis

Supported by EASA

D4S Briefing for ICF/8

Data4Safety explained in one paragraph

The Data4Safety Programme (D4S) is a **strategic initiative, objective and priority** of the Agency (ref. EASA Single Programming Document).

D4S is a **voluntary partnership** of the **EASA Members States** and the **Industry** that aims at **inferring unprecedented aviation intelligence**, e.g. to **identify and manage safety risks** or **support data driven change** in both the fields of **safety** and **sustainability**.

This is done by organising a **massive collection of aviation data sources** and, equally important, **organising the analytical capacity** amongst all **EASA aviation partners (both EASA MSs and Industry)**.

This will take the **collaborative work of EASA with the Industry and the EASA MSs** at a scale never achieved before in Europe.

D4S is led by EASA and powered by its Members

Programme key Principles

Collaborativeness

The success of the *Data4Safety* programme is reliant on a cooperative effort involving the entire aviation community, the European Union institutions, oversight authorities, industry and unions. The programme members contribute the programme in a cooperative manner.

Voluntariness

The programme is a partnership that is joined or left by the members on a voluntary basis.

Confidentiality

The programme members are obliged to confidentiality in relation to all data and intelligence derived from the programme. A member may voluntarily choose to allow access to the identified data it supplies under the conditions specified in the rules and procedures document.

Just Culture

The programme is aligned with the Just Culture principle as defined in European Union regulation 376/2014 and the European Corporate Just Culture Declaration.

Safety first

The primary goal of the programme is safety and as such the programme aims at supporting the identification and assessment of the systemic safety risks at European level as well as the measurement of safety performance. The programme also supports the members in enhancing their own safety performance. The programme has also the ability to support **sustainable aviation, security and cybersecurity** when they impact safety. The programme will not allow any other purpose contrary to its spirit such as seeking mercantile purposes or for a targeted oversight on a given organisation or individual

8TH EASA INTERNATIONAL COOPERATION FORUM

JOINING FORCES FOR
SAFER AND GREENER
AVIATION WORLDWIDE

European Union Aviation Safety Agency

Mission: Ever **Safer** & **Greener** Civil Aviation in Europe and Worldwide

Established
2002

800+

aviation experts
& administrators

Headquarters in
Cologne
Office in
Brussels

**Rulemaking
& Standards**

EASA drafts regulatory material,
including Certification
Specifications, Guiding Material

**International
Cooperation**

Cooperate with international actors
in order to achieve the highest
safety level for EU citizens globally

**Oversight
& Support**

EASA provides both oversight and
support to Member States in fields
where it has shared competence

**Certification
& Approvals**

EASA certifies aviation products
and approves organisations

**Safety
Intelligence**

EASA provides actionable safety
intelligence through the collection
and analysis of safety data.

**Research &
Innovation**

EASA supports research, innovation
and new developments of the
aviation sector

Resilience & Innovation as Agency's strategic objectives

Overcome COVID-19 - Tackle challenges into Opportunities: new topics embraced in aviation sector

EASA moves with changing times

Being resilient & adaptable to a dynamic sector

Return to 2019 traffic levels worldwide in 2025 is foreseen

Research/New technologies
Innovative air mobility solutions

EASA Enhanced Focus

Safety

A special attention to regional organisations

Environment

CORSIA, climate change actions (SAF, LTAG)

New airspace users / Aerodromes

(e)VTOL certification / Drones management / Aerodromes certif.

(Cyber)Security

New regulation (PART-IS) published end of 2022

Health Safety

Updated protocol published on 11th May 2022

ECCAIRS 2.0

New agreement signed with ICAO in 2023

Innovative Air Mobility

Drones, eVTOL, vertiports & -pads, start-ups

Sustainability

SAF, CORSIA, electrical propulsion, noise/emission reduction

Cyber Security

Impact on aircraft design, development and operation

International Strategic Objectives up to 2019

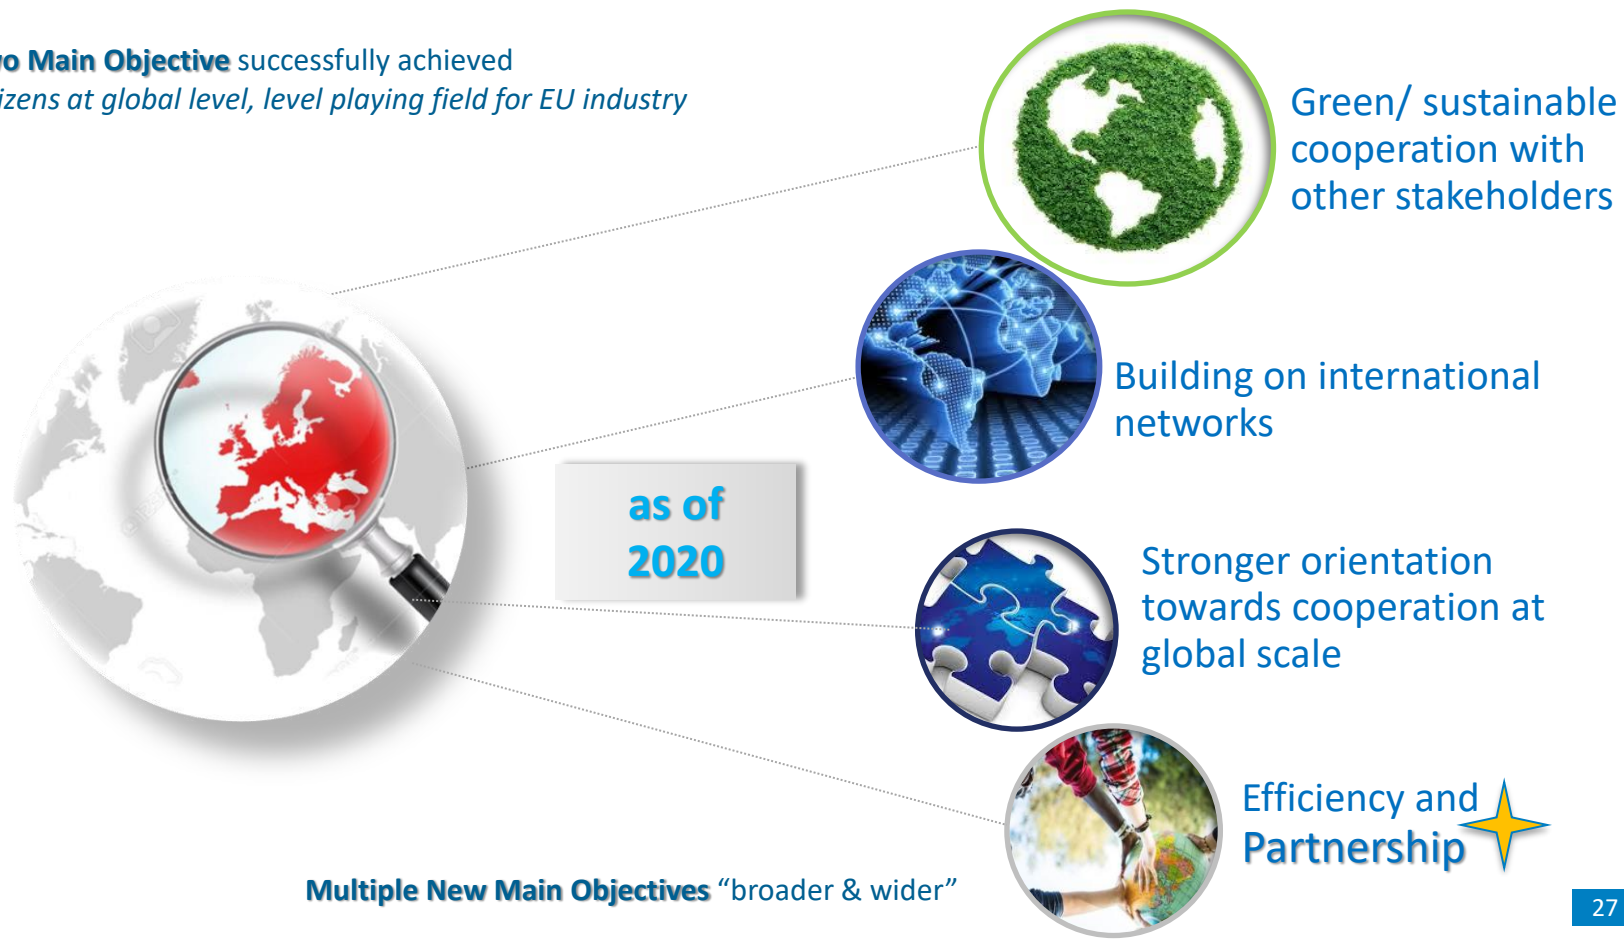

To protect citizens' interests in safety and environmental protection at global level

To facilitate and support aviation industry needs and interests at global level

Evolution of International Strategic Approach

Two Main Objective successfully achieved
Safety for EU citizens at global level, level playing field for EU industry

Multiple New Main Objectives “broader & wider”

The value of Partnership & EU's global footprint

EASA is aiming to increase cooperation based on a Partnership approach worldwide through joint initiatives with:

- ❑ National Aviation Authorities
- ❑ Accident Investigation Authorities
- ❑ Air Navigation Service Providers
- ❑ Industry

Thank you for your attention
