				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
	Annex Standard or Recommended Practice									

1.1.2	Aeronautical fixed service (AFS). A telecommunication service between specified fixed points provided primarily for the safety of air navigation and for the regular, efficient and economical operation of air services.	Point (11) of Annex I of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.1.3	Aeronautical fixed telecommunication network (AFTN). A worldwide system of aeronautical fixed circuits provided, as part of the aeronautical fixed service, for the exchange of messages and/or digital data between aeronautical fixed stations having the same or compatible communications characteristics.	Point (12) of Annex I of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.1.4	Aeronautical mobile service (RR SI.32). A mobile service between aeronautical stations and aircraft stations, or between aircraft stations, in which survival craft stations may participate; emergency position-indicating radiobeacon stations may also participate in this service on designated distress and emergency frequencies.	Art. 2(14) of Regulation (EU) 923/2012	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.1.5	Aeronautical mobile (R)* service (RR SI.33). An aeronautical mobile service reserved for communications relating to safety and regularity of flight, primarily along national or international civil air routes.	CNS.TR.100 of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference				Not Applicable	Details of Difference	Remarks	
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes						
				Level of implementation of SARPs						Sigi nificant Differ ence
				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
	Annex Standard or Recommended Practice									

	----- * route									
1.1.6	Aeronautical mobile-satellite service (RR S1.35). A mobile-satellite service in which mobile earth stations are located on board aircraft; survival craft stations and emergency position-indicating radiobeacon stations may also participate in this service.	CNS.TR.100 of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.1.7	Aeronautical mobile-satellite (R)* service (RR S1.36). An aeronautical mobile-satellite service reserved for communications relating to safety and regularity of flights, primarily along national or international civil air routes.	CNS.TR.100 of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.1.8	Aeronautical radio navigation service (RR S1.46). A radio navigation service intended for the benefit and for the safe operation of aircraft. <i>Note.— The following Radio Regulations are quoted for purposes of reference and/or clarity in understanding of the above definition of the aeronautical radio navigation service:</i> <i>RR S1.10 Radio navigation: Radiodetermination used for the</i>	CNS.TR.100 of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference				Not Applicable	Details of Difference	Remarks	
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes

	Annex Standard or Recommended Practice									

	<i>purpose of navigation, including obstruction warning.</i> <i>RR S1.9 Radiodetermination: The determination of the position, velocity and/or other characteristics of an object, or the obtaining of information relating to these parameters, by means of the propagation properties of radio waves.</i>									
1.1.9	Aeronautical telecommunication service. A telecommunication service provided for any aeronautical purpose.	CNS.TR.100 of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.1.10	International telecommunication service. A telecommunication service between offices or stations of different States, or between mobile stations which are not in the same State, or are subject to different States.	CNS.TR.100 of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.1.11	System-wide information management (SWIM). SWIM consists of standards, infrastructure and governance enabling the management of ATM related information	Article 2 of Regulation (EU) No 923/2012;	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The amendmen t of the definitions	To be impleme nted under

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference					Not Applicable	Details of Difference	Remarks

				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
				Annex Standard or Recommended Practice						

	and its exchange between qualified parties via interoperable information services.	Annex I – Part-Definitions of Regulation (EU) 2017/373							will not be implemented at the applicability date.	Subtask 6 of RMT.04 76.
1.2.1	1.2 STATIONS <i>Aerodrome control radio station.</i> A station providing radiocommunication between an aerodrome control tower and aircraft or mobile aeronautical stations.	CNS.TR.100 of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.2	<i>Aeronautical fixed station.</i> A station in the aeronautical fixed service.	Point (113) of Annex I Part-DEFINITIONS of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.3	<i>Aeronautical station (RR SL81).</i> A land station in the aeronautical mobile service. In certain instances, an aeronautical station may be located, for example, on board ship or on a platform at sea.	Art. 2(15) of Regulation (EU) 923/2012	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference			Not Applicable	Details of Difference	Remarks		
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes						
				Level of implementation of SARPs					Signi ficant Differ ence	
				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance					C) Less protective or partially implemented or not implemented
	Annex Standard or Recommended Practice									

1.2.4	Aeronautical telecommunication station. A station in the aeronautical telecommunication service.	Point (124) of Annex I Part-DEFINITIONS of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.5	AFTN communication centre. An AFTN station whose primary function is the relay or retransmission of AFTN traffic from (or to) a number of other AFTN stations connected to it.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.6	AFTN destination station. An AFTN station to which messages and/or digital data are addressed for processing for delivery to the addressee.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.7	AFTN origin station. An AFTN station where messages and/or digital data are accepted for transmission over the AFTN.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.8	AFTN station. A station forming part of the aeronautical fixed telecommunication network (AFTN) and	CNS.TR.100 of Regulation	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference					Not Applicable	Details of Difference	Remarks	
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes

	Annex Standard or Recommended Practice										

	operating as such under the authority or control of a State.	2017/373								
1.2.9	Air-ground control radio station. An aeronautical telecommunication station having primary responsibility for handling communications pertaining to the operation and control of aircraft in a given area.	Art. 2(23) of Regulation (EU) 923/2012	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.10	Aircraft station (RR S1.83). A mobile station in the aeronautical mobile service, other than a survival craft station, located on board an aircraft.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.11	Communication centre. An aeronautical fixed station which relays or retransmits telecommunication traffic from (or to) a number of other aeronautical fixed stations directly connected to it.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.12	Mobile surface station. A station in the aeronautical telecommunication service, other than an aircraft	CNS.TR.100 of Regulation	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference				Not Applicable	Details of Difference	Remarks	
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes

				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
	Annex Standard or Recommended Practice									

	station, intended to be used while in motion or during halts at unspecified points.	2017/373								
1.2.13	Network station. An aeronautical station forming part of a radiotelephony network.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.14	Radio direction finding (RR S1.12). Radiodetermination using the reception of radio waves for the purpose of determining the direction of a station or object.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.15	Radio direction-finding station (RR S1.91). A radiodetermination station using radio direction finding. <i>Note.— The aeronautical application of radio direction finding is in the aeronautical radio navigation service.</i>	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.2.16	Regular station. A station selected from those forming an en-route air-ground radiotelephony network to communicate with or to intercept communications from aircraft in normal conditions.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference				Not Applicable	Details of Difference	Remarks	
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes						
				Level of implementation of SARPs						Sigi nificant Differ ence
				A) More Exact ing or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
	Annex Standard or Recommended Practice									

1.2.17	Tributary station. An aeronautical fixed station that may receive or transmit messages and/or digital data but which does not relay except for the purpose of serving similar stations connected through it to a communication centre.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.1	1.3 COMMUNICATION METHODS Air-ground communication. Two-way communication between aircraft and stations or locations on the surface of the earth.	Art. 2(22) of Regulation 923/2012; Point (128) of Annex I Part-DEFINITIONS of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.2	Air-to-ground communication. One-way communication from aircraft to stations or locations on the surface of the earth.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference				Not Applicable	Details of Difference	Remarks	
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes						
				Level of implementation of SARPs						Sigi nifi cant Differ ence
				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
	Annex Standard or Recommended Practice									

1.3.3	Blind transmission. A transmission from one station to another station in circumstances where two-way communication cannot be established but where it is believed that the called station is able to receive the transmission.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.4	Broadcast. A transmission of information relating to air navigation that is not addressed to a specific station or stations.	Point (147) of Annex I Part-DEFINITIONS of Regulation (EU) 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.5	Duplex. A method in which telecommunication between two stations can take place in both directions simultaneously.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.6	Ground-to-air communication. One-way communication from stations or locations on the surface of the earth to aircraft.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference			Not Applicable	Details of Difference	Remarks		
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes						
				Level of implementation of SARPs					Sigi nificant Differ ence	
				A) More Exact ing or Exceed s	B) Different in character or Other means of compliance					C) Less protective or partially implemented or not implemented
	Annex Standard or Recommended Practice									

1.3.7	Interpilot air-to-air communication. Two-way communication on the designated air-to-air channel to enable aircraft engaged in flights over remote and oceanic areas out of range of VHF ground stations to exchange necessary operational information and to facilitate the resolution of operational problems.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.8	Non-network communications. Radiotelephony communications conducted by a station of the aeronautical mobile service, other than those conducted as part of a radiotelephony network.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.9	Radiotelephony network. A group of radiotelephony aeronautical stations which operate on and guard frequencies from the same family and which support each other in a defined manner to ensure maximum dependability of air-ground communications and dissemination of air-ground traffic.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.10	Readback. A procedure whereby the receiving station repeats a received message or an appropriate part thereof back to the transmitting station so as to obtain confirmation of correct reception.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference				Not Applicable	Details of Difference	Remarks	
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes						Sigini ficant Differ ence
				Level of implementation of SARPs						
				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
				Annex Standard or Recommended Practice						

1.3.11	Simplex. A method in which telecommunication between two stations takes place in one direction at a time. <i>Note.— In application to the aeronautical mobile service this method may be subdivided as follows:</i> <i>a) single channel simplex;</i> <i>b) double channel simplex;</i> <i>c) offset frequency simplex.</i>	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.3.12	Telecommunication (RR SL3). Any transmission, emission, or reception of signs, signals, writing, images and sounds or intelligence of any nature by wire, radio, optical or other electromagnetic systems.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.4.1	1.4 DIRECTION FINDING	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference			Not Applicable	Details of Difference	Remarks		
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes						
				Level of implementation of SARPs					Sigi nifi cant Differ ence	
				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance					C) Less protective or partially implemented or not implemented
	Annex Standard or Recommended Practice									

	Homing. The procedure of using the direction-finding equipment of one radio station with the emission of another radio station, where at least one of the stations is mobile, and whereby the mobile station proceeds continuously towards the other station.									
1.4.2	Radio bearing. The angle between the apparent direction of a definite source of emission of electro-magnetic waves and a reference direction, as determined at a radio direction-finding station. A <i>true</i> radio bearing is one for which the reference direction is that of true North. A <i>magnetic</i> radio bearing is one for which the reference direction is that of magnetic North.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.5.1	1.5 TELETYPEWRITER SYSTEMS Automatic relay installation. A teletypewriter installation where automatic equipment is used to transfer messages from incoming to outgoing circuits. <i>Note.— This term covers both fully automatic and semi-automatic installations.</i>	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference				Not Applicable	Details of Difference	Remarks	
Annex Reference & SARP Identifier	AERONAUTICAL TELECOMMUNICATIONS - VOLUME II COMMUNICATION PROCEDURES INCLUDING THOSE WITH PANS STATUS		No	Yes						
				Level of implementation of SARPs						Sigi nifi cant Differ ence
				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
	Annex Standard or Recommended Practice									

1.5.2	Fully automatic relay installation. A teletypewriter installation where interpretation of the relaying responsibility in respect of an incoming message and the resultant setting-up of the connections required to effect the appropriate retransmissions is carried out automatically, as well as all other normal operations of relay, thus obviating the need for operator intervention, except for supervisory purposes.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.5.3	Message field. An assigned area of a message containing specified elements of data.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.5.4	Semi-automatic relay installation. A teletypewriter installation where interpretation of the relaying responsibility in respect of an incoming message and the resultant setting-up of the connections required to effect the appropriate retransmissions require the intervention of an operator but where all other normal operations of relay are carried out automatically.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.5.5	Teletypewriter tape. A tape on which signals are recorded in the 5-unit Start-Stop code by completely severed perforations (Chad Type) or by partially severed	CNS.TR.100 of Regulation	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

	European Union Aviation Safety Agency-Annex 10 Amendment 93	State Reference	Difference				Not Applicable	Details of Difference	Remarks

				A) More Exactin g or Exceed s	B) Different in character or Other means of compliance	C) Less protective or partially implemented or not implemented				
				Annex Standard or Recommended Practice						

	perforations (Chadless Type) for transmission over teletypewriter circuits.	2017/373								
1.5.6	“Torn-tape” relay installation. A teletypewriter installation where messages are received and relayed in teletypewriter tape form and where all operations of relay are performed as the result of operator intervention.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.6.1	1.6 AGENCIES Aeronautical telecommunication agency. An agency responsible for operating a station or stations in the aeronautical telecommunication service.	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
1.6.2	Aircraft operating agency. A person, organization or enterprise engaged in, or offering to engage in, an aircraft operation.	Art. 3(13) of Regulaion (EU) 2018/1139	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	Annex Standard or Recommended Practice										

1.9.10	Flight and flow — information for a collaborative environment (FF-ICE). Information necessary for planning, coordination, and notification of flights, exchanged in a standardized format between members of the ATM community, including those involved in flight operations and aerodrome operations.	Article 2 of Regulation (EU) No 923/2012; Annex I – Part-Definitions of Regulation (EU) 2017/373	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The amendmen t of the definitions will not be implement ed at the applicabilit y date.	To be impleme nted under Subtask 6 of RMT.04 76.
1.9.11	Flight and flow — information for a collaborative environment (FF-ICE) services. A set of services established for the purposes of facilitating the exchange of FF-ICE, accurate assessment of demands, appropriate resource planning, and optimizing flight planning and execution.	Article 2 of Regulation (EU) No 923/2012; Annex I – Part-Definitions of Regulation (EU) 2017/373	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The amendmen t of the definitions will not be implement ed at the applicabilit y date.	To be impleme nted under Subtask 6 of RMT.04 76.
1.9.12	Flight and flow — information for a collaborative environment (FF-ICE) services unit. A unit designated by the appropriate ATS authority for the provision of FF-ICE services. <i>Note.— The appropriate ATS authority may designate an existing unit, such as an air traffic services unit, or a local or regional air traffic flow management unit as an FF-ICE services unit.</i>	Article 2 of Regulation (EU) No 923/2012; Annex I – Part-Definitions of Regulation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The amendmen t of the definitions will not be implement ed at the applicabilit y date.	To be impleme nted under Subtask 6 of RMT.04 76.

5.2.4.1.1	<p>5.2.4 SELCAL procedures</p> <p><i>Note.— The procedures contained in 5.2.4 are applicable when SELCAL is used and replace certain of the procedures related to calling contained in 5.2.1.</i></p> <p>5.2.4.1 GENERAL</p> <p>5.2.4.1.1 PANS.— <i>With the selective calling system known as SELCAL, the voice calling is replaced by the transmission of coded tones to the aircraft over the radiotelephony channels. A single selective call consists of a combination of four pre-selected audio tones whose transmission requires approximately 2 seconds. The tones are generated in the aeronautical station coder and are received by a decoder connected to the audio output of the airborne receiver. Receipt of the assigned tone code (SELCAL code) activates a cockpit call system in the form of light and/or chime signals.</i></p> <p><i>Note.— Due to the limited number of SELCAL codes, similar code assignments to multiple aircraft may be expected. Therefore, the use of correct</i></p>	CNS.TR.100 of Regulation 2017/373	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	<p><i>sign, the SELCAL code in the aircraft should be listed against the flight number. In all other cases, the SELCAL code in the aircraft should be listed against the aircraft registration.</i></p> <p><i>Note.— The use of aircraft radio call signs, consisting of the airline abbreviation followed by the flight service number, is increasing among aircraft operators throughout the world. The SELCAL equipment in aircraft should, therefore, be of a type which permits a particular code being associated with a particular flight number, i.e. equipment which is capable of adjustment in code combinations. At this stage, however, many aircraft still carry SELCAL equipment of the single code type, and it will not be possible for aircraft with such equipment to satisfy the principle set out above. This should not militate against use of the flight number type of radio call sign by an aircraft so equipped if it wishes to apply this type of call sign, but it is essential when a single code airborne equipment is used in conjunction with a flight number type radio call sign that the ground stations be advised in connection with each flight of the SELCAL code available in the aircraft.</i></p>
