

General Aviation Committee of the SAB (GA.COM)

The main task of the GA.COM is to advise the Agency on the implementation of a more tailored regulatory approach towards GA, ensuring at the same time an adequate level of safety. The GA.COM is working in close cooperation with the GA.TEB, the group representing the National Aviation Authorities. Due to the cross-sectoral character of General Aviation, cooperation and information exchange with other committees of the SAB will play a major role in the Committee's activities. The GA.COM is representing National associations for all domains: Design & manufacture, aircraft maintenance, pilot licenses, operations, airspace and aerodromes.
