Sunny Swift

“Collision avoidance: make yourself **seen**”

IT'S A BEAUTIFUL DAY FOR FLYING. SUNNY AND VLADO ARE PRACTICING NAVIGATION, ON THEIR WAY TO A SMALL AIRFIELD CLOSE TO THEIR HOME BASE. THE TRAINING IS GOING SMOOTHLY

MEANWHILE, AHEAD AND 1 000 FT BELOW THEIR POSITION, ANOTHER INSTRUCTOR IS ON A TRAINING FLIGHT WITH A STUDENT IN THEIR HELICOPTER. AS IT'S BELOW THE HORIZON, THE HELICOPTER IS VERY HARD TO SEE.

THIS WARNING MEANS: FOCUS OUTSIDE! THE AIRCRAFT MIGHT BE IN OUR BLIND SPOT, SO LET'S CHANGE THE ATTITUDE

PITCHING DOWN AND TURNING RIGHT... THERE IT IS, AT 12 O'CLOCK IT WAS HIDDEN BY THE NOSE

MAKE A GENTLE AVOIDANCE MANOEUVRE!

LUCKILY, THE HELICOPTER'S CONSPIQUITY EQUIPMENT WAS ACTIVE AND SIGNALLLED ITS POSITION. ALTHOUGH THE HELICOPTER COULDN'T DECODE THE AEROPLANE'S SIGNAL, IT WAS ENOUGH HELP FOR SUNNY AND VLADO TO AVOID A NEAR-MISS OR MID-AIR COLLISION. THE HELICOPTER CREW CONTINUED THEIR TRAINING EXERCISE, UNAWARE OF THE RISK AVOIDED.

AS SUNNY AND VLADO ARE APPROACHING THEIR DESTINATION, SUNNY DECIDES TO START THE DESCENT. THEIR COURSE IS SLOWLY CONVERGING WITH THE HELICOPTER'S, BUT THEY'RE STILL NOT AWARE OF IT BEING IN FRONT OF THEM AND BELOW THEM!

BACK IN THE FLYING CLUB...

BEING EQUIPPED WITH AN CONSPIQUITY DEVICE, AND ACTIVATING IT, CAN AVOID A MID-AIR COLLISION.

International Cooperation – EASA as ambassador of European HEMS industry in Thailand

*Find out how EASA is supporting you in promoting your expertise
on the South-East Asian market.*

The EASA team
promoted
European expertise
in Thailand.

South-East Asian
delegation on
an European
HEMS tour.

On December 9th 2019, a Helicopter Emergency Medical Services (HEMS) Demonstration and a meeting with EU representatives were held in Bangkok.

EASA was invited as a key actor under the scope of the EU-South East Asia Aviation Partnership Project ([EU SEA APP](#)).

The article on Passenger Pressure Management has been updated to include a Safety Notice from Robinson Helicopters and a great video they made.

WITH CAMERA

This drone is an aircraft.
Aviation law applies.

**As a drone pilot,
you are responsible
for flying your drone safely.**

Before flying, as a drone pilot, you must

- ✓ make sure the drone owner is registered at his or her national authority (unless already registered)
- ✓ make sure the owner registration number is displayed on the drone
- ✓ read and follow the manufacturer's instructions

Check how to register and where you are allowed to fly:
www.easa.europa.eu/drones/NAA

Offences are punishable by law.

Leonardo Helicopters @LDO_Helicopters · Oct 12

EASA's AW09 Project flight test team flew several times on the #AW09 third prototype to get an initial familiarization with the helicopter. These flights were the first of a series for @EASA to assess the development and progress of the helicopter on its way to certification.

EASA International Cooperation

Enhance relations between non EU States and European institutions in the field of civil aviation

Increase technical exchanges between non EU and European aviation industries

Support States and RSOOs meeting obligations under ICAO Convention & establishing an effective safety oversight system

Support partners in reducing aviation impact on environment and climate change

Support COVID-19 recovery / Public Health / Bio-Security

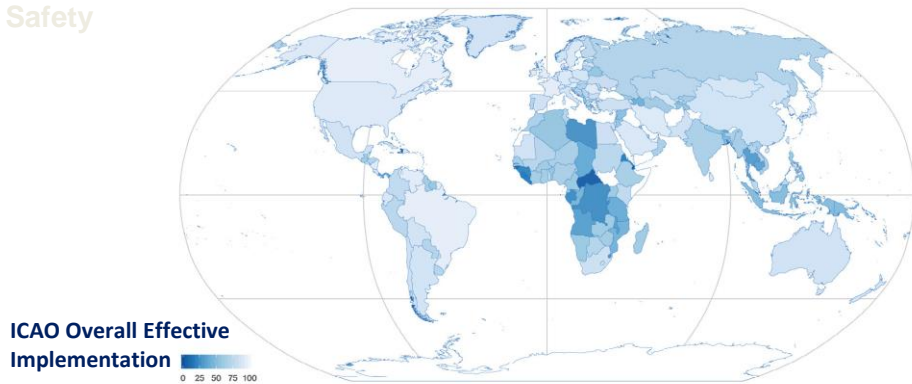

Enhance innovation and future developments

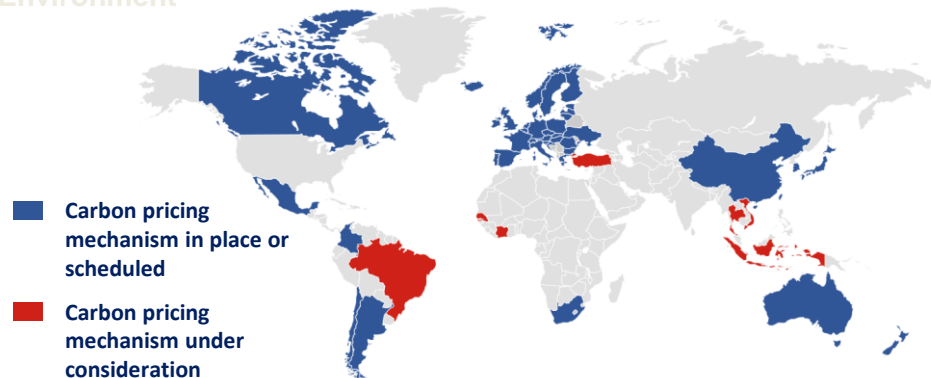

Our Aim

International Cooperation Drivers

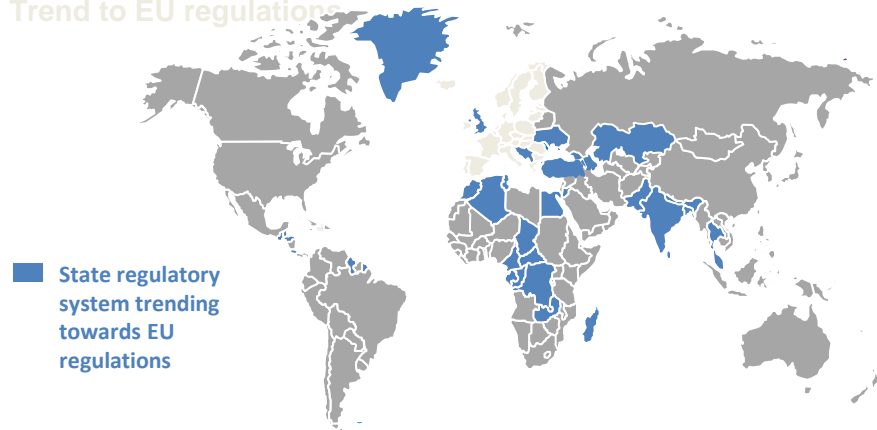

Safety

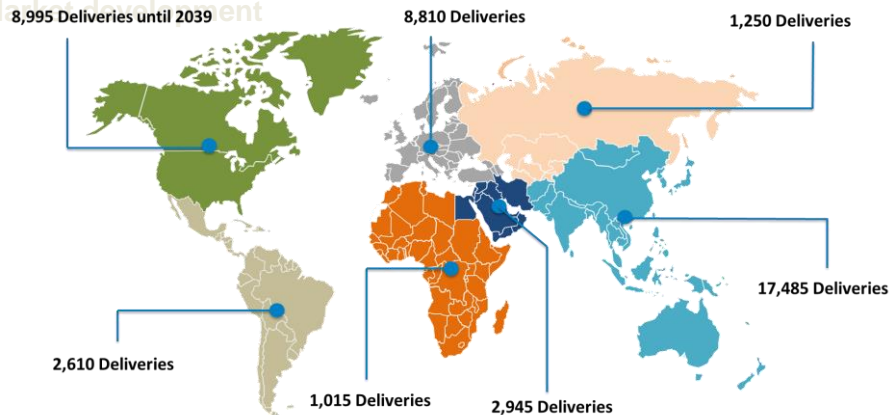

Environment

Trend to EU regulations

Market development

EU Aviation Partnership Projects

Promote EU safety and environmental standards / expertise, in the interest of citizens and industry

Establish a level playing field for the industry and facilitate market access

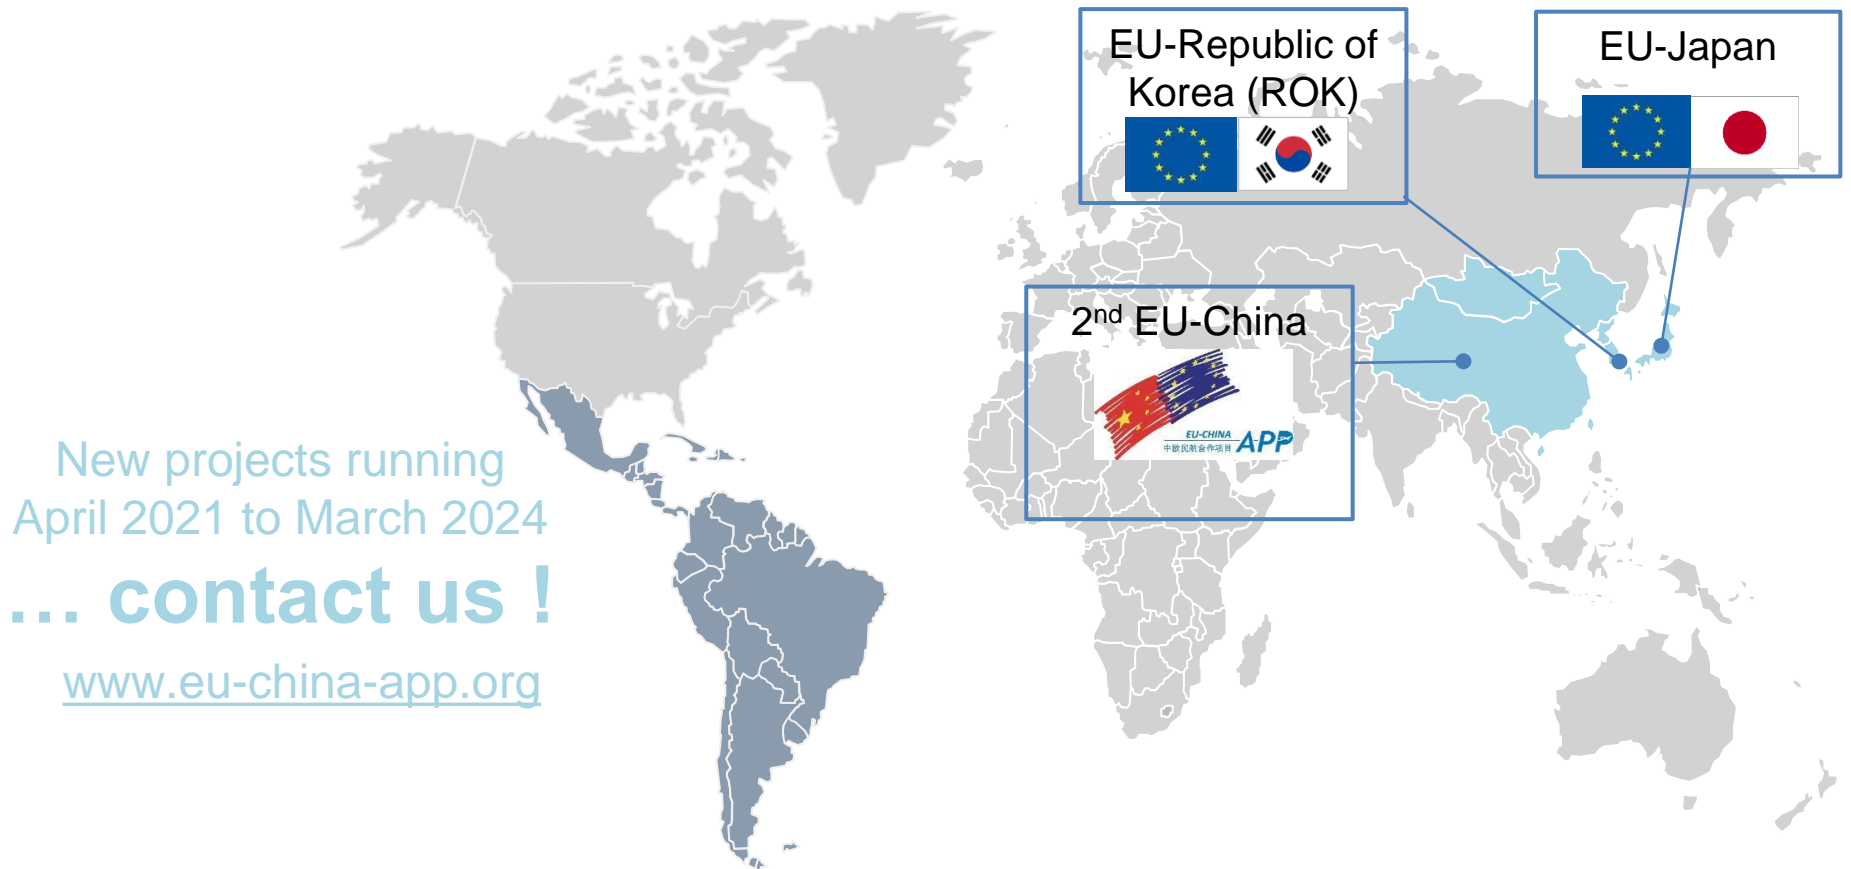

Promoting global aviation safety and a level playing field for the industry worldwide

Help to reduce administrative burden and lower market barriers

Support to minimise the impact of aviation on the environment & climate change
