European Union Aviation Safety Agency

FAQ n.104878

FAQs:

Certification Processes, Supplemental Type Certificates

Question:

What can EASA do to improve consistency of STC timescales? - In my experience some have been very good but some appalling.

Answer:

Each project is being consedered individually by the responsible product certification manager. While we try to keep a maximum reponse time of 4 weeks after the delivery of a technical package, we cannot avoid specific situations that might impact the overall timescale of the project.
