[Day 1 - Sustainable Pilot Training](#)

[Day 1 - The Label Project](#)

[Day 1 - Student Pilot Footprint](#)

[Day 2 - Sustainable Pilot Training 2](#)

[Day 2 - Reducing the Pilot Training Carbon Footprint](#)

[Day 2 - Experience with Electrically Powered Aircraft in Training](#)

[Day 2 - What are Sustainable Aviation Fuels \(SAF\) exactly?](#)

Description

As part of EASA's sustainable aviation programme, developed in the context of the

European Green Deal, a number of initiatives are being launched across the aviation domains consisting of various measures (technology, operations, airports, market-based measures). As pilot training is also considered an important area that can contribute to overcoming the environmental challenges, EASA will host a webinar to foster the sharing and promoting of ideas and best practices regarding sustainability in pilot training. Together with Industry, EASA aims to develop a set of good practices for use by approved (ATO) and declared (DTO) training organisations, including the introduction of a voluntary based Eco-merit system.
