**Description**

Since its first occurrence in 2004, the ETSO workshop has grown in popularity and

attendance. It has become a regular forum for the worldwide community of ETSO/TSO manufacturers, installers and operators, where topics of common interest in the various fields of aviation equipment are presented and discussed, aiming at updating participants, and getting their feedback on industry and authority initiatives concerning operational, design, manufacturing and regulatory matters with the common scope of fostering safety. Besides EASA, also FAA, TCCA and ANAC representatives actively participate to the event, providing updates on their related activities and on cooperation/bilateral issues. Other CAA representatives may be present.

This is the first E/TSO workshop in physical presence after the pandemic.

Confirming arrangement of previous E/TSO workshops, the event will consist of a general part on day 1, covering topics of interest for all participants, like updates from Rulemaking, ADOA, foreign authorities; and two split sessions on day 2, with more detailed discussions in the domain of avionics as well as mechanical systems. Copies of all presentations held, as well as additional background material, will be made available on EASA website for download after the workshop.
