

## FAQs:

Personnel requirements, Part-145, Continuing Airworthiness, Regulations

## **Question:**

## What are the training requirements for personnel within a Part-145 organisation, other than those contained in Part-66?

## **Answer:**

Requirement	Reference
The accountable manager shall demonstrate a <b>basic understanding</b>	145.A.30(a)
of Part-145.	point 3.
The person or group of persons nominated responsible for ensuring	
that the organisation complies with Part-145 (including the Quality	
Manager) shall be able to demonstrate	145.A.30(b
<ul> <li>relevant knowledge, background and satisfactory</li> </ul>	point 3.
experience related to aircraft or components maintenance	
as applicable,	
<ul> <li>a working knowledge of Part-145,</li> </ul>	
The organisation shall establish and control the competence of	
personnel involved in any maintenance, airworthiness	145.A.30(e)
review management and/or quality audits in accordance with a	and
procedure and to a standard agreed by the competent authority.	associated
In addition to the necessary expertise related to the job	AMC/GM.
function, competence must include an understanding of the	Appendix I\
application of human factors and human performance issues	to AMC
appropriate to that person's function in the organisation.	145.A.30(e)
This should include also:	and
inis snould include also:	145.B.10(3)
<ul> <li>Fuel Tank Safety training (AMC3 145-A-30(e) and Appendix</li> </ul>	
IV to AMC 145.A.30(e) and 145.B.10(3)).	AMC 20-22.
• EWIS training (AMC 20-22)	

	Page 2 of 5
The organisation shall ensure that personnel who carry out and/or control a continued airworthiness non-destructive test of aircraft	
structures and/or components are <b>appropriately qualified for the</b>	
particular non-destructive test in accordance with the	
European or equivalent Standard recognised by the Agency.	
Personnel who carry out any other specialised task shall be appropriately qualified in accordance with officially recognised Standards.	145.A.30(f) and AMC 145.A.30(f).
By derogation to this paragraph those personnel specified in paragraphs (g) and (h)(1) and (h)(2), qualified in category B1, B3 or L in accordance with Annex III (Part-66) may carry out and/or control colour contrast dye penetrant tests.	
By derogation to paragraphs (g) and (h), in relation to the obligation to comply with Annex III (Part-66), the organisation may use certifying staff qualified in accordance with the following provisions:	
1. For organisation facilities located outside the Community territory certifying staff may be qualified in accordance with the national aviation regulations of the State in which the organisation facility is registered subject to the conditions specified in Appendix IV to this Part.	
2. For line maintenance carried out at a line station of an organisation which is located outside the Community territory, the certifying staff may be qualified in accordance with the national aviation regulations of the State in which the line station is based, subject to the conditions specified in Appendix IV to this Part.	
3. For a repetitive pre-flight airworthiness directive which specifically states that the flight crew may carry out such airworthiness directive, the organisation may issue a limited certification authorisation to the aircraft commander and/or the flight engineer on the basis of the flight crew licence held. However, the organisation shall ensure that sufficient practical training has been carried out to ensure that such aircraft commander or flight engineer can accomplish the airworthiness directive to the required	
standard.	145.A.30(j)
	and

detailed in an exposition procedure. 5. In the following unforeseen cases, where an aircraft is grounded at a location other than the main base where no appropriate certifying staff are available, the organisation contracted to provide maintenance support may issue a one-off certification authorisation: (i) to one of its employees holding equivalent type authorisations on aircraft of similar technology, construction and systems; or (ii) to any person with not less than five years maintenance experience and holding a valid ICAO aircraft maintenance licence rated for the aircraft type requiring certification provided there is no organisation appropriately approved under this Part at that location and the contracted organisation obtains and holds on file evidence of the experience and the licence of that person. All such cases as specified in this point shall be reported to the competent authorisation. The organisation issuing the one-off authorisation shall ensure that any such maintenance that could affect flight safety is re-checked by an appropriately approved organisation. In addition to the appropriate requirements of 145.A.30(g) and (h), the organisation shall ensure that certifying staff and support staff have an <b>adequate understanding of the relevant aircraft and/or</b>	age 3 of

an <b>adequate understanding of the relevant aircraft and/or</b> 145.A.	
a manage of both to be maintained and of the associated	35(a)
components, or both, to be maintained and of the associated and AN	1C
organisation procedures. In the case of certifying staff, this shall be 145.A.	35(a)
accomplished before the issue or reissue of the certification authorisation.	

	Page 4 of	
The organisation shall ensure that all certifying staff and support staff are involved in at least six months of actual relevant aircraft or component maintenance experience in any consecutive two-	145.A.35(c) and AMC 145.A.35(c)	
year period.	143.A.33(C)	
The organisation shall ensure that all certifying staff and support staff		
receive sufficient continuation training in each two-year period	145.A.35(d)	
to ensure that such staff have up-to-date knowledge of	and AMC	
relevant technology, organisation procedures and human	145.A.35(d)	
factor issues.		
The organisation shall establish a programme for continuation		
<b>training</b> for certifying staff and support staff, including a procedure to ensure compliance with the relevant paragraphs of 145.A.35 as the basis for issuing certification authorisations under this Part to certifying staff, and a procedure to ensure compliance with Annex III (Part 66).	145.A.35(e) and AMC 145.A.35(e)	
Except where any of the unforeseen cases of 145.A.30(j)(5) apply, the organisation shall assess all prospective certifying staff for their		
competence, qualification and capability to carry out their	145.A.35(f)	
intended certifying duties in accordance with a procedure as	and AMC 145.A.35(f)	
specified in the exposition prior to the issue or reissue of a certification		
authorisation under this Part.		
The holder of a category A aircraft maintenance licence may only		
exercise certification privileges on a specific aircraft type following the		
satisfactory completion of the <b>relevant category A aircraft task</b>		
training carried out by an organisation appropriately approved in	145.A.35(n) and AMC	
accordance with Annex II (Part-145) or Annex IV (Part-147). <b>This</b>		
training shall include practical hands on training and	145.A.35(n)	
theoretical training as appropriate for each task authorised.		
Satisfactory completion of training shall be demonstrated by an		
examination or by workplace assessment carried out by the organisation.		

	Page 5 of !
The holder of a category B2 aircraft maintenance licence may only	
exercise the certification privileges described in point 66.A.20(a)(3)(ii)	
of Annex III (Part-66) following the satisfactory completion of (i) the	
relevant category A aircraft task training and (ii) six months of	
documented practical experience covering the scope of the	
authorisation that will be issued. The task training shall	145.A.35(o)
include practical hands on training and theoretical training as	and AMC
appropriate for each task authorised. Satisfactory completion of	145.A.35(o)
training shall be demonstrated by an examination or by workplace	
assessment. Task training and examination/assessment shall be	
carried out by the maintenance organisation issuing the certifying staff	f
authorisation. The practical experience shall be also obtained within	
such maintenance organisation.	
Pre-flight inspections (when the 145 organisation has an	ML.A.301(a)
agreement with an operator)	or
It should be demonstrated that the personnel carrying out pre-flight inspections have received appropriate training for the relevant pre-flight inspection tasks based on the operator's CAME.	M.A.301(a) and AMC M.A.301(a)
