European Union Aviation Safety Agency

FAQ n.19351

FAQs:

E - Charging of travel costs, Fees & Charges - FAQ

Question:

E.6 - What is the “e” - component?

Answer:

When travelling to non-EU destinations to conduct certification or service related tasks, the travel costs inside the territories of the Member States have to be deducted from the total travel costs. This is done through the application of the "e" component. The "e" component covers the average time spent by experts in the means of transport inside the territories of the Member States multiplied by the hourly fee as well as the average ticket costs inside the member states. The "e" component shall be clearly indicated in the travel costs break downs provided by the Agency. The total amount of the "e" component shall be revised once a year.

Please find below the evolution of the e-component value, in Euro:

1/6/2009 -	**-**
31/5/2010	**1.175,00**
1/6/2010 -	**-**
31/5/2011	**1.187,00**
