

**FAQs:**

[Specific Airworthiness Specifications](#), [General Aviation](#)

**Question:**

**How do I find out if my aircraft has an SAS or TC?**

**Answer:**

The EASA aircraft lists can be found in the [Product List](#) page.

These lists specify whether the aircraft has a TC or SAS. This only applies for aircraft (including rotorcraft and lighter-than-air) but not to propulsion. If an engine or propeller becomes an orphan, there is no SAS.
