European Union Aviation Safety Agency

List of approvals/Grandfathered approvals

How do I know whether my article has received EASA approval?

Answer

The lists of ETSO and JTSO certified articles are available here. There you will also find a list of parachutes under the responsibility of EASA. However please note that this list is complete only with regard to the ETSO authorizations and might not contain all JTSO certified articles.

How do I know whether an approval has been grandfathered?

Answer

Any article approved or validated by any member state before the establishment of EASA is deemed to be 'Grandfathered' under Commission Regulation (EU) No 748/2012 Article 6 . You can find the JAA approvals listed on our website.

There is a large number of old national approvals which were issued before 28th September 2003 but due to the lack of full national records a comprehensive database could not be published. We recommend any enquirer to contact the approval holder (manufacturer of the article) and check with them directly whether they have received any national approval for the subject article. Another option would be to check with the NAA that issued the approval.

In general the following applies for grandfathering:

APPROVAL ISSUED BY:	APPROVAL DATE						
	Before 28/09/03	28/09/03 - 01/05/04	01/05/04 - 01/06/05	01/06/05 - 01/12/06	01/12/06 - 01/01/07	01/01/07 - 01/07/13	After 01/07/13

15 OLD EU MEMBER STATES	grandfathered	EASA responsibility	
10 NEW EU MEMBER STATES	grandfathered	validation required	EASA responsibility
NORWAY, ICELAND	grandfathered	validation required	EASA responsibility
SWITZERLAND	grandfathered		EASA responsibility
BULGARIA, ROMANIA	grandfathered	validation required	EASA responsibility
CROATIA	grandfathered	validation required	EASA responsibility

Approvals issued during one of the time periods indicated with “validation required” are not grandfathered and need validation by EASA. EASA approvals and grandfathered approvals are valid in all EU member states as well as Norway, Iceland, Switzerland and Liechtenstein.
