EASA
European Union Aviation Safety Agency

FAQ n.46837

FAQs:
CS-STAN, General Aviation

Question:
Does CS-STAN allow the installation of Garmin GTN devices?

Answer:
The functionality of the Garmin GTN series exceeds the one covered by CS-SC052b and thus its installation is not eligible for CS-STAN.

Garmin is holding an STC with a comprehensive AML for the installation of the GTN series. In cases where a European type is not listed on that AML, due to the absence of a FAA TC, the process of a minor modification or Form 134 could be used to extend the applicability of the STC, if agreed by EASA.
