3. EASA presentations and Q&A

Presented by: *EASA staff/ NCAs*

- Digitalisation in the EU aviation domain
Presentation from A. Spaccatrosi, please see DMS :
<https://docs.easa.europa.eu/case/eab/mabtebs/layouts/15/DocIdRedir.aspx?ID=EASAEAB-2063309588-178>
No questions/comments from participants. Open action item on providing update on Digitalisation can be closed.
- Feedback on notifying ICAO target exemptions (TE)
F. Gaetani reports on EASA Target Exemptions (TE) Guidelines with an operator-centric approach needed and where there is no need for separate FCL TEs. For isolated (non-operator) cases of pilots who need exemptions (inside Europe), EASA general exemptions apply.
- Update on digital licensing for aviation pilots (dLAP)
D. Dousi informs that the rulemaking for dLAP will start at the end of this year, once ICAO Standards are finalised. NPA planned for November 2022, adoption in 2023.
- IP – Standardisation

4. Paper for decision of Aircrew TeB

Presented by: *EASA staff*

- IP – Integrated Course
Discussion took place during Combined Aircrew TeB-FS.TEC 25.05.2021. EASA highlighted that there is a need for a standardised approach and emphasised that theoretical knowledge training must be integrated with practical flying training prior to completing the theoretical knowledge examinations as intended by the regulations. Should there be a need to complete the theoretical knowledge training and examinations prior to practical flying training than only a module course approval is issued. Industry requested more time to review this topic. At the next plenary Aircrew TeB EASA aims to reach a final conclusion on the matter in the interest of a standardised EU approach.
