SECTION 1: 737-100, -200, -200C, -300, -400, -500 VARIANTS

I. General

1.	Type / Model / Variant:	Boeing 737-100, -200, -200C, -300, -400, -500
2.	Performance Class:	A
3.	Certifying Authority:	Federal Aviation Administration (FAA) BASOO Branch 2200 S 216th St Des Moines, WA 98198 United States of America
4.	Manufacturer:	The Boeing Company P.O. Box 3707 Seattle, WA 98124-2207 United States of America
5.	EASA Validation Application Date	The 737-100, -200, -200C, -300, -400 and -500 series were not subject to a validation by JAA prior to EASA, therefore they are accepted by EASA under the provisions of EU Regulation 1702/2003.
6.	FAA Type Certification Date:	December 15, 1967 (737-100) (First Type Certificate issuance) December 21, 1967 (737-200) October 29, 1968 (737-200C) November 14, 1984 (737-300) September 02, 1988 (737-400) February 12, 1990 (737-500)
7.	EASA Type Validation Date	January 23, 1968 (737-130) (First TC issued within EU MS by LBA Germany) July 12, 1968 (737-204) (First TC issued within EU MS by UKCAA) September 9, 1969 (737-248C) (First TC issued within EU MS by IAA Ireland) January 29, 1985 (737-3T5) (First TC issued within EU MS by UKCAA) September 14, 1988 (737-4Y0) (First TC issued within EU MS by UKCAA) March 7, 1990 (737-505) (First TC issued within EU MS by CAA Norway)

SECTION 1: 737-100, -200, -200C, -300, -400, -500 VARIANTS – continued

II. Certification Basis

1. FAA Type Certificate Data Sheet: No. A16WE

2. FAA Certification Basis: Refer to FAA Type Certificate Data Sheet (TCDS) No. A16WE

3. JAA/EASA Airworthiness Requirements: In accordance with Regulation (EC) 1702/2003 FAR Part 25 as defined in FAA TCDS A16WE

4. Special Conditions: for adopted special conditions refer to FAA TCDS A16WE, as supplemented by the following:

CRI PTC/E-10	Flammability Reduction System INT/POL/25/12: Affected requirement FAR 25.981 (c), JAR 25.1309, NPA 10-2004, JAR 21.16(a)(1) (not applicable to the 737-100)
CRI E-15 PTC	Fuel Tank Safety – Including Lightning Protection for Structure INT/POL/25/12: Affected requirement CS 25.981 Amdt 1, CS 25.981(a)(3), CS 25.954 (applicable ot the 737-300/-400/-500 only)
CRI E-16/PTC	Fuel Tank Safety INT/POL/25/12: Affected requirement CS 25.981 Amdt 1 (not applicable to 737-600)
CRI F-GEN10 PTC	Non-rechargeable Lithium Batteries Installations CS 25.601, 25.863, 25.869, 25.1301, 25.1309, 25.1353(c), 25.1529, 25.1360 (b)
CRI H-01	"Instructions for Continued Airworthiness (ICA) on Electrical Wiring Interconnecting Systems (EWIS)" Affected requirement Part 21A.16(b)(3), 21A.21(c)(3), CS 25.1529 & Appendix H

5. Adopted FAA Exemptions: Refer to FAA TCDS A16WE

6. Adopted FAA Equivalent Safety Findings: Refer to FAA TCDS A16WE supplemented by the following:

CRI F-GEN9-1	Minimum Mass Flow of Supplemental Oxygen "Component Qualification" Equivalent Safety with JAR 25.1443(c) (not applicable to the 737-100/-200C)
CRI F-GEN9-3	Crew Determination of Quantity of Oxygen in Passenger Oxygen System Equivalent Safety with JAR 25.1441(c) (not applicable to the 737-100/-200/-200C)

SECTION 1: 737-100, -200, -200C, -300, -400, -500 VARIANTS – continued

7. Environmental Protection Standards: Noise: ICAO Annex 16, Volume I Special Federal Aviation Regulation 27

See also TCDSN EASA.IM.A.120

III. **Technical Characteristics and Operational Limitations**

1. Type Design Definition: Boeing Top Collector Drawing No. 65-73701

2. Description: Low wing jet transport with a conventional tail unit configuration, powered by two high bypass turbofan engines mounted on pylons beneath the wings

3. Equipment: The basic required equipment as prescribed in the applicable airworthiness regulations (see Certification Basis) must be installed in the aircraft for certification.

4. Dimensions:

Series	-100	-200/200C	-300	-400	-500
Length	28.65 m	30.48 m	33.4 m	36.45 m	31.01 m
Wingspan	28.35 m	28.35 m	28.88 m		
Height	11.28 m	11.28 m	11.13 m		

5. Engines

737-100, 200, and 200C: 2 Pratt and Whitney Turbofan Engines JT8D-7, JT8D-7A, JT8D-7B, T8D-9, JT8D-9A, JT8D-15, JT8D-15A, JT8D-17, and JT8D-17A

737-300, -400, -500: 2 CFM-56-3-B1, CFM-56-3B-2 or CFM-56-3C-1 Turbofan Engines.

Refer to the Approved Airplane Flight Manual for aircraft engine and engine intermix eligibility.

For limitations see FAA TCDS no E3NE (Pratt and Whitney engines) or E2GL/E21EU (CFM engines) or approved Airplane Flight Manual.

6. Auxiliary Power Unit: Honeywell GTCP 85-129
Honeywell GTCP 36-280
Hamilton Sundstrand APS 2000

7. Propellers: N/A

8. Fluids (Fuel, Oil, Additives, Hydraulics) See FAA TCDS A16WE and approved Airplane Flight Manual

9. Fluid Capacities: See appropriate Weight and Balance Manual, Boeing Document D6-15066

10. Airspeed Limits: See approved Airplane Flight Manual

11. Maximum Operating Altitude: See approved Airplane Flight Manual

12. All Weather Capability: See approved Airplane Flight Manual

SECTION 1: 737-100, -200, -200C, -300, -400, -500 VARIANTS – continued

13. Maximum Certified Masses: See approved Airplane Flight Manual for actual approved weights of individual airplanes

	-100/20(		-300		-400		-500	
	lbs	Kg	lbs	Kg	lbs	Kg	lbs	Kg
MTW	128600	58331	140000	63502	150500	68265	136500	61915
MTOW	128100	58105	139500	63276	150000	68038	136000	61688
MLW	107000	48534	116600	52888	124000	56245	110000	49895
MZFW	99000	44905	109600	49713	117000	53070	103000	46720

(Specified weights are Increased Design Weights approved post-initial Type Validation)

14. Centre of Gravity Range: See approved Airplane Flight Manual

15. Datum: See appropiate Weights and Balance Manual

The airplane reference origin of coordinates is a point located 540 inches forward of the center section wing front spar centerline, at buttock line zero, (i.e., aircraft fore/aft centerline as viewed in plane view) and at water line zero. (737-100 Series) All production body stations coincide numerically with moment arms. Horizontal distance of datum to nose gear jack point is286 inches for the 737-100 Series, 250 inches for the 737-200 Series, and 207.7 inches for the 737-300 Series, 135.7 inches for the 737-400 Series, 261.7 inches for the 737-500 Series.

16. Mean Aerodynamic Chord: (MAC) See appropriate Weights and Balance Manual Boeing Document No. D6-15066

17. Levelling Means: See approved Airplane Flight Manual

18. Minimum Flight Crew: Two (2): Pilot and Co-pilot, for all types of flight

19. Minimum Cabin Crew

The tables below provide the certified Maximum Passenger Seating Capacities (MPS), the corresponding cabin configuration (exit arrangement and modifications) and the associated numbers of cabin crew members used to demonstrate compliance with the evacuation certification requirements of CS 25.803. Additional cabin crew members may be required to comply with other regulatory requirements (e.g., cabin attendant direct view).

B737-300

Passenger Seating Capacity & Cabin Configuration	Cabin crew
From 101 to 149 passengers: (I, III, I) exit arrangement	3
100 or fewer passengers: (I, III, I) exit arrangement	2

SECTION 1: 737-100, -200, -200C, -300, -400, -500 VARIANTS – continued

B737-400

Passenger Seating Capacity & Cabin Configuration	Cabin crew
From 151 to 188 passengers: (I, III, III, I) exit arrangement	4
From 101 to 150 passengers: (I, III, III, I) exit arrangement	3
100 or fewer passengers: (I, III, III, I) exit arrangement	2

B737-500

Passenger Seating Capacity & Cabin Configuration	Cabin crew
From 101 to 140 passengers: (I, III, I) exit arrangement	3
100 or fewer passengers: (I, III, I) exit arrangement	2

20. Maximum Seating Capacity: For maximum number of passengers see item 20. Exits

Note: The maximum number of passengers approved for emergency evacuation is dependant on door configuration, see 20) below. See interior layout drawing for the maximum passenger capacities approved for each aeroplane delivered.

21. Exits:

	Type (LH and RH)	Maximum Passenger
-100	I-III-I	113 (124) *
-200	I-III-I	119 (136) *
-300	I-III-I	149
-400	I-III-III-I	188
-500	I-III-I	140

* See FAA TCDS A16WE for details

22. Baggage/Cargo Compartment: See appropriate Weights and Balance Manual Boeing Document No. D6-1506

23. Wheels and Tyres:

Nose Assy (Qty 2)
Main Assy (Qty 4)
Speed Rating: See approved Airplane Flight Manual
Refer to Boeing Wheel/Tire/Brake Interchangeability Drawing for further details.

IV. Operating and Service Instructions

1. Flight Manual: Since validation of the Boeing 737-100/-200/-200C/-300/-400/-500 model was conducted by individual NAAs and not under JAA process, there is no generic JAA AFM format. It is the responsibility of the State of Registry to establish that

SECTION 1: 737-100, -200, -200C, -300, -400, -500 VARIANTS – continued

the AFM for an individual aircraft contains appropriate and relevant data and limitations.

2. Mandatory Maintenance Instructions: See FAA TCDS A16WE
Life Limited Parts and required inspection intervals are listed in the EASA approved Airworthiness Limitations Section (Section 9) of the Boeing Maintenance Planning Data Document D6-38278.

3. Service Letters and Service Bulletins: As Published by Boeing and approved by the FAA

4. Required Equipment:

V.**Operational Suitability Data (OSD)**

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate IM.A.120 as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.

1. Master Minimum Equipment List
No MMEL available (Not required per Commission Regulation (EU) No 69/2014 of 27 January 2014)

2. Flight Crew Data
No FCD available (Not required per Commission Regulation (EU) No 69/2014 of 27 January 2014)

3. Cabin Crew Data
No CCD available (Not required per Commission Regulation (EU) No 69/2014 of 27 January 2014)

VI. Part 26 compliance information

For all variants in this section, compliance with point 26.300(a) of Part 26 is demonstrated by complying with points:

- 26.301 Compliance Plan for (R)TC holders
- 26.302 Fatigue and damage tolerance evaluation
- 26.303 Limit of Validity
- 26.304 Corrosion prevention and control program
- 26.305 Validity of the continuing structural integrity program
- 26.306 Fatigue critical baseline structure
- 26.307 Damage tolerance data for existing changes to fatigue critical structure
- 26.308 Damage tolerance data for existing repairs to fatigue critical structure
- 26.309 Repair Evaluation Guidelines

SECTION 1: 737-100, -200, -200C, -300, -400, -500 VARIANTS – continued

VII. **Notes**

1. Cabin Interior and Seating Configuration must be approved.
2. Additional information is provided in FAA Type Certificate Data Sheet A16WE.

SECTION 2: PERTINENT TO ALL NEXT GENERATION SERIES (NG: 737-600, -700, -800, -900, -900ER)

I. General

1.	Type / Model / Variant:	Boeing 737-600, -700, -800, -900, -900ER “Next Generation”, NG – Series
2.	Performance Class:	A
3.	Certifying Authority:	Federal Aviation Administration (FAA) BASOO Branch 2200 S 216th St Des Moines, WA 98198 United States of America
4.	Manufacturer:	The Boeing Company P.O. Box 3707 Seattle, WA 98124-2207 United States of America
5.	FAA Certification Application Date:	See individual data (Section 3 to 7)
6.	EASA Validation Application Date	See individual data (Section 3 to 7)
7.	FAA Type Certification Date:	See individual data (Section 3 to 7)
8.	EASA Type Validation Date	See individual data (Section 3 to 7)

II. Certification Basis

See individual data (Sections 3 to 7).

III. Technical Characteristics and Operational Limitations

1.	Production Basis:	Manufactured under Production Certificate 700
2.	Type Design Definition:	See individual data (Section 3 to 7)
3.	Description:	Low wing jet transport with a conventional tail unit configuration, powered by two high bypass turbofan engines mounted on pylons beneath the wings.

SECTION 2: PERTINENT TO ALL NEXT GENERATION SERIES
(NG: 737-600, -700, -800, -900, -900ER) – continued

4. Dimensions:

Series	-700	-800	-600	-900	-900ER
Length	32.18 m (105 ft 7 in)	39.5 m (129 ft 6 in)	31.2 m (102 ft 6 in)	42.1 m (138 ft 2 in)	42.1 m (138 ft 2 in)
Wingspan	34.32 m (112 ft 7 in)				
Span with Winglets	35.79 m (117 ft 5 in)				
Height	12.57 m (41 ft 3 in)				

5. Engines:

2 CFM 56-7B or -7B/2 or -7B/3 or -7BE Series Turbofan Engines. Refer to the Approved Airplane Flight Manual for engine limitations. The CFM56-7B/2 series have double annular combustors and provide the same thrust as the CFM56-7B series engines at the respective engine ratings and are approved for all models except the CFM56-7B-18/2 engine rating.

The CFM56-7B/3 series are the so-called “Tech Insertion” engines, they have single annular combustors and provide the same thrust as the CFM56-7B series at the respective engine ratings.

The CFM56-7BE series have single annular combustors and provide the same thrust as the CFM56-7B series at the respective engine ratings.

Engine ratings and all approved models are referred to in: EASA TCDS E.004 “CFM International CFM56-7B Engines”

6. Auxiliary Power Unit:

Auxiliary Power Unit (APU): Honeywell 131-9 [B]
Limitations: Refer to the APU TCDS / TSO

7. Propellers:

N/A

8. Fluids (Fuel, Oil, Additives, Hydraulics):

Eligible Fuels:
ASTM Specification D-1655 Jet A, JAR A1
MIL-T-5624G; JP-5
MIL-T-83133; JP-8
Refer to Airplane Flight Manual for other approved fuels.

Eligible Oils: See CFM 56-7B ServiceBulletin 79-001 as revised.

9. Fluid Capacities:

Fuel Capacity:
26024 litres (6875 US Gallons), consisting of two wing tanks, each of 4875 litres (1288 US Gallons) capacity, and one centre tank, capacity 16274 litres (4299 US Gallons).

Oil Capacity: 10.3 litres useable

10. Air Speeds:

See Airplane Flight Manual

SECTION 2: PERTINENT TO ALL NEXT GENERATION SERIES
(NG: 737-600, -700, -800, -900, -900ER) – continued

11. Maximum Operating Altitude:	12,497 m (41,000 ft) pressure altitude
12. All Weather Capability:	Cat 3
13. Maximum Certified Masses:	See individual data (Section 3 to 7)
14. Centre of Gravity Range:	See Airplane Flight Manual
15. Datum:	See Weights and Balance Manual
16. Mean Aerodynamic Chord: (MAC)	3.96m (155.81 in)
17. Levelling Means:	See approved Airplane Flight Manual
18. Minimum Flight Crew:	Two (Pilot and Co-pilot) for all types of flight
19. Maximum Seating Capacity:	See individual data (Section 3 to 7)
20. Exits:	See individual data (Section 3 to 7)
21. Baggage/Cargo Compartment:	See individual data (Section 3 to 7)
22. Wheels and Tyres:	Speed Rating: 225 MPH, (-900ER: 235 MPH) Nose Assy (Qty 2) Tyre: 27 x 7.75 - 15 or 27 x 7.75 - R15 Wheel: 27 x 7.75 – 15 Main Assy (Qty 4) Tyre: H43.5 x 16.0 - 21 or H44.5 x 16.5 – 21 Wheel: HR44.5 x 16.5 – 21 Refer to Boeing Wheel/Tire/Brake Interchangeability Drawing for further details
23. ETOPS:	737-600 / -700 / -800 / -900 / -900ER The type design reliability and performance of this airplane has been evaluated in accordance with AMC 20-6 and found suitable for extended range operations when configured in accordance with Boeing Document D044A007 "737-600/-700/-800/-900/-900ER ETOPS Configuration, Maintenance and Procedures". This finding does not constitute approval to conduct extended range operations. ETOPS approval for the -600, -700, -800, -900, and -900ER is determined by NAA operating policies 737-800BCF The type design reliability and performance of this airplane has been evaluated in accordance with AMC 20-6 and CS 25.1535 and found suitable for extended range operations when configured in accordance with Boeing Document D044A007 "737-600/-700/-800/-900/-900ER ETOPS Configuration, Maintenance and Procedures". This finding does not constitute approval to conduct extended range

SECTION 2: PERTINENT TO ALL NEXT GENERATION SERIES
(NG: 737-600, -700, -800, -900, -900ER) – continued

operations. ETOPS approval for the -800BCF is determined by NAA operating policies.

IV.**Operating and Servicing Instructions**

1.	Flight Manual:	Since validation of the 737-700 model was conducted under JAA process, there is a generic JAA/EASA AFM format.
2.	Mandatory Maintenance Instructions:	CMRs Model 737 MRB Report Life Limited Parts and required inspection intervals are listed in the EASA approved Airworthiness Limitations Section (Section 9) of the Boeing Maintenance Planning Data Document D626A001.
3.	Service Letters and Service Bulletins:	As published by Boeing and approved by FAA.
4.	Required Equipment:	All equipment as prescribed in Section II (Certification Basis) above must be installed in the aircraft.

V.**Operational Suitability Data (OSD)**

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate IM.A.120 as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.

1. Master Minimum Equipment List
    a. Master Minimum Equipment List (MMEL):
    The applicable certification specifications for the Boeing B737-600/-700/-800/-900/-900ER MMEL, reference D6-32545-ESEM, consist of JAR-MMEL/MEL Amendment 1, Section 1, Subpart A &B as recorded in CRI A-MMEL.
    b. Required for entry into service by EU operator.

2. Flight Crew Data
    a. The Flight Crew data, With regard to the transition of the OEB recommendations to OSD FC documents for the Boeing B737-600/-700/-800/-900/-900ER, reference D626A014, the data are agreed on the basis of elect to comply with CS-FCD, Initial Issue, dated 31 Jan 2014.
    b. Required for entry into service by EU operator.
    c. Pilot Type Rating: “B737-300-900”.

Note: These data cover the models B737-300/400/500/600/700/800/900/900ER. Differences are addressed in D926A105

3. Cabin Crew Data
    a. The Cabin Crew Data has been approved as per the defined Operational Suitability Data Certification Basis recorded in CRI A-CCD, and as demonstrated by the “Boeing Document D611A099 Operational Suitability Data - Cabin Crew Data - Boeing 737NG” certification basis for the

SECTION 2: PERTINENT TO ALL NEXT GENERATION SERIES
(NG: 737-600, -700, -800, -900, -900ER) – continued

establishment of Operational Suitability Data (OSD) Cabin Crew for B737-600/-700/-800/-900/-900ER is CS-CCD, Initial Issue dated 31 January 2014.

b. Required for entry into service by EU operator.

c. The “Next Generation” B737-600; B737-700; B737-800; 737-900 aircraft models are determined to be variants to the aircraft model B737-900ER (with Mid Exit Door (MED) activated).

VI. Part 26 compliance information

For all variants in this section, compliance with point 26.300(a) of Part 26 is demonstrated by complying with points:

- 26.301 Compliance Plan for (R)TC holders
- 26.302 Fatigue and damage tolerance evaluation
- 26.303 Limit of Validity
- 26.304 Corrosion prevention and control program
- 26.305 Validity of the continuing structural integrity program
- 26.306 Fatigue critical baseline structure
- 26.307 Damage tolerance data for existing changes to fatigue critical structure
- 26.308 Damage tolerance data for existing repairs to fatigue critical structure
- 26.309 Repair Evaluation Guidelines

VII. Notes:

1. Cabin Interior and Seating Configuration must be approved.
2. Additional information is provided in FAA Type Certificate Data Sheet A16WE.

SECTION 3: 737-700 Series

I. General

1. Type / Model / Variant: Boeing 737-700
2. FAA Certification Application Date: February 04, 1993
3. JAA Validation Application Date: August 04, 1993
   (Reference date for JAA validation)
4. FAA Type Certification Date: November 07, 1997
5. EASA/JAA Type Validation Date: February 18, 1998

II. Certification Basis

1. FAA Type Certificate Data Sheet: No. A16WE
2. FAA Certification Basis: FAR Part 25 Amendment 25-77 except where modified by the FAA Issue Paper G-1
3. JAA/EASA Airworthiness Requirements: JAR 25 Change 13, effective 5 October 1989
   Orange Paper 90/1, effective 11 May 1990
   Orange Paper 91/1, effective 12 April 1991
   JAR AWO Chg. 1, effective 29 November 1985
   Orange Paper AWO/91/1, effective 28 November 1991 (Note also see AWO Change 2)
   JAA IL-23 RVSM, effective April 1994 - (Boeing letter B-T111-96-1357 dated Dec 12, 1996)

The following NPAs have been applied:

NPA 25,B,D,G-244	CRI A.11-17	25.109	Accelerate Stop Distances and Related Performances
NPA 25C-213	CRI C-17	25.571(e); 25.903	Discrete source damage due to rotor burst
NPA 25B215	CRI B-02	25.103; 25.107; 25.119; 25.125; 25.143; 25.207	Stall and Stall Warning Speeds and Manoeuvre Capability
NPA 25B-217	CRI B-04	25.101-25.123; 25.149; 25.1582-25.1591	Reduced Thrust
NPA AWO 2			All Weather Operations
NPA AWO 5			All Weather Operations
NPA 25.B,C,D-236	CRI C-05	25.629	Flutter, Deformation and Fail Safe Criteria
NPA 25J-246	CRI J-03	25B1305	APU Instruments
NPA 25C260	CRI C-06	25.335(b)(2) with ACJ	Design Dive Speed (JAR 25.335(b)(2) plus ACJ at Ch.14)

SECTION 3: 737-700 SERIES – continued

NPA 25C260		25.499(e)	Nose Wheel Steering (JAR 25.499(e))
NPA 25B261	B-08; B-11; B-13; B-15	Flight requirements+ 201(d)	Harmonisation of JAR/FAR 25 Flight Requirements

In addition, the following requirements have been applied:

JAR AWO Change 2: All Weather Operations
Special Condition JAA/737-700/SC/C-07 (JAR 25.427(b)(3) FAA/JAA Harmonised version) in place of JAR 25.427(b)(3)
Static Ground Load Conditions (Jacking): JAR 25.519(b) in accordance with JAR 25 Amendment 25/96/1
Stalling Speeds for Structural Design (defined in CRI C-12)
Type III Emergency Exit Operating Handle Illumination JAR 25.811(e) at JAR 25 Chg. 14

3.1. Reversions:

The following reversions from the defined certification basis have been applied:

CRI A. 11-02	Pressurised Cabin Loads
JAR 25.365	Reversion to FAR 25.365 Amendment 0
CRI A. 11-04	Emergency Landing Dynamic Loads
JAR 25.562	Reversion to JAR 25 Change 12 which excludes para .562
CRI A. 11-05	Fatigue and Damage Tolerance
JAR 25.571	Partial Reversion to FAR 25.571 Amendment 0
CRI A. 11-06	Fasteners
JAR 25.607(a)	Reversion to FAR 25.607(a) Amendment 0
CRI A. 11-08	Lift and Drag Device Indicator
JAR 25.699(a)	Reversion to FAR 25.699 Amendment 0
CRI A. 11-11	Doors
JAR 25.783(f)	Reversion to FAR 25.783 Amendment 15
CRI A. 11-12	Seat, Berths, Safety Belts and Harness
JAR 25.785(a)	Reversion to JAR 25.785(a) Change 12
CRI A. 11-16	Equipment Systems and Installations
JAR 25.1309	Reversion to FAR 25.1309 Amendment 0
CRI A.11-23	Windshields and Windows
JAR 25.775(d)	Reversion to FAR 25.775(d) Amendment 0
CRI J-04	APU Fuel Shut Off Valve Indication
JAR 25A1141(f)(2)	Reversion to FAR 25.1141 Amendment 11

4. Special Conditions:

The following JAA Special Conditions have been applied defined in their respective CRI:

CRI B-10 JAA/737-700/SC/B-10	Stall Warning Thrust Bias Affected JAR 25.207(c) as amended by NPA 25B-215
CRI C-01 JAA/737-700/SC/C-01	Pressurised Cabin Loads INT/POL/25/7 Affected requirement JAR 25.365
CRI C-11 JAA/737-700/SC/C-11	Interaction of Systems and Structure Affected requirement JAR 25.302
CRI D-01 JAA/737-700/SC/D-01	Brakes Requirements Qualification and Testing INT/POL/25/6: Affected requirement JAR 25.735
CRI D-04 JAA/737-700/SC/D-04	Landing Gear Warning INT/POL/25/1: Affected requirement JAR 25.729(e)(2) to (4)
CRI D-14 JAA/737-700/SC/D-14	Exit Configuration Affected requirement JAR 25.807, JAR 25.562, JAR 25.813
CRI D-GEN01 PTC	Fire Resistance of Thermal Insulation Material Affected requirement CS25.856 & Appendix F
CRI D-GEN02 PTC	Application of Heat Release and Smoke Density Requirements to Seat Materials Affected Requirement CS 25.853(d) Appendix F Part IV & V Part 21 §21A.16B
CRI E-10	Installation of Seat Inflatable Restraint Systems
CRI PTC/E-10	Flammibility Reduction Systems (FRS) INT/POL/25/12: Affected requirement FAR 25.981 (c), JAR 25.1309, NPA 10-2004, JAR 21.16(a)(1) Affected requirement JAR 25.1301
CRI E-16/PTC	Fuel Tank Safety Affected requirement CS 25.981 Amdt 1
CRI F-01 JAA/737-700/SC/F-01	High Intensity Radiated Field (HIRF) INT/POL/25/2: Affected requirement JAR 25.1431(a)
CRI F-02 JAA/737-700/SC/F-02	Protection from Effects of Lightning Strike; Direct Effects INT/POL/25/3: Affected requirement JAR 25X899 and ACJ 25X899
CRI F-03 JAA/737-700/SC/F-03	Protection from Effects of Lightning Strike; Indirect Effects INT/POL/25/4: Affected requirement JAR 25.581, 25.899 25.954, 25.1309
CRI PTC/F-17	EGPWS Airworthiness Approval

SECTION 3: 737-700 SERIES – continued

	Affected requirement JAR 25.1301, JAR 25.1309(b)(c)(d), JAR 25.1431(a)(c), JAR 25.1459
CRI PTC/F-18	Multi-Sensor Navigation Systems for specified operational use Affected requirement JAR 25.1301, .1303, .1309, .1321, .1322, .1331, .1431, .1457, .1541, .X1524, .1583
CRI PTC F-23	CIAP/IRNAV and NPS Human Factors Evaluation Affected requirement INT/POL 25/14, JAR 25.771(a) and (e), 25.777(a), 25.1301, 25.1303, 25.1309, 25.1523
CRI PTC/F-27	GNSS Landing System (GLS) – Airworthiness Approval for Category I Approach Operations Affected requirement 25.1301, 25.1309, 25.1322, 25.1329, 25.1335, 25.1431, 25.1459, 25.1581, JAR-AWO, JAR-AWO NPA AWO-9
CRI F-29	Lithium Ion Batteries Affected requirement JAR 25.601, 25.863, 25.1309, 25.1353(c) and 25.1529
CRI F-30	Data Link Services for the Single European Sky EUROCAE ED-120, ED-78A, ED-110B, ED-92A (Radio VDL/M2); Affected Requirements: JAR/FAR 25.1301, 25.1307, 25.1309, 25.1321, 25.1322, 25.1431, 25.1459, 25.1581, 25.1585, Commission Regulation (EC) No 29/2009
CRI F-31(PTC)	Security Protection of Aircraft Systems and Networks Affected requirement JAR 25.1309
CRI F-GEN10 PTC	Non-rechargeable Lithium Batteries Installations CS 25.601, 25.863, 25.869, 25.1301, 25.1309, 25.1353(c), 25.1529, 25.1360 (b) (only for installation of Honeywell CVR P/N 980-6032-003 and FDR P/N 980-4750-003)
CRI F-GEN-11	Non-rechargeable Lithium Batteries Installations CS 25.601, 25.863, 25.1353(c) (for all installations not covered by F-GEN 10)
CRI G-01	ETOPS Approval (180 minutes) Affected Requirements JAA Information Leaflet No. 20
CRI H-01	"Instructions for Continued Airworthiness (ICA) on Electrical Wiring Interconnecting Systems (EWIS)" Affected requirement Part 21A.16(b)(3), 21A.21(c)(3), CS 25.1529 & Appendix H

5. Exemptions/Deviations:

The following Partial JAA Exemption has been applied:

CRI D-02	Hydraulic System Proof Pressure Testing
JAA/737-700/PE/D-02	Partial Exemption Against JAR 25

SECTION 3: 737-700 SERIES – continued

1435(b)(1)

The following EASA Deviation has been applied:

CRI PTC D-22	Tech Insertion engines and New Thrust Reverser Cascades Intermix for 737-600/-700/-800/-900 LN No. 1 Thru 2230 Deviation Against 25.305, 25.307(a), 25.601, 25.603(c), 26.613(a)(b), 25.1103(d) at Ch 13
CRI D-29	CFM 56-7B Technology Insertion Engines and new Thrust Reverser Cascades

6. Equivalent Safety Findings:

The following JAA Equivalent Safety Findings have been applied:

CRI PTC C-14	Landing Gear Safe Lives – Fatigue Scatter Factors Equivalent Safety with JAR 25.571 Change 15
CRI D-06 JAA/737-700/ES/D-06	Towbarless Towing Equivalent Safety with JAR 25X745(d)
CRI D-08 JAA/737-700/ES/D-08	Forward and Aft Door Escape Slide Low Sill Height Equivalent Safety with JAR 25.809(f)(1)(ii)
CRI D-10 JAA/737-700/ES/D-10	Overwing Hatch Emergency Exit Signs Equivalent Safety with JAR 25.812(b)(1)(i)
CRI D-16 JAA/737-700/ES/D-16	Automatic Overwing Exit Equivalent Safety with JAR 27.783(f)
CRI D-17 JAA/737-700/ES/D-17	Oversized Type I Exits, Maximum Number of Passengers Equivalent Safety with JAR 25.807
CRI D-18 JAA/737-700/ES/D-18	Slide/Raft Inflation Gas Cylinders Equivalent Safety with JAR 25X1436
CRI PTC/ D-19 JAA/757-300/ES/D-19	Door Sill Reflectance Equivalent Safety with JAR 25.811(f)
CRI PTC/D-21	Emergency Exit Marking Equivalent Safety with JAR 25.811(f)
CRI 9ER/ D-21	Door Sill Reflectance Equivalent Safety with JAR 25.811(f)
CRI PTC/ D-23 JAA/737-700/ES/D-23	Passenger Information Signs Equivalent Safety with JAR 853(d)
CRI E-09 JAA/737-700/ES/E-09	Automatic Fuel Shut Off Equivalent Safety with JAR 25.979(b)(1)
CRI E-11	New Interior Arrangement with Passenger Service Unit Life Vest Stowage Equivalent Safety with JAR 25.1411(f) (not applicable to the 737-600)
CRI F-15 JAA/737-700/ES/F-15	Wing Position Lights Equivalent Safety with JAR 25.1389(b)(3)
CRI F-GEN 9-1	Minimum Mass Flow of Supplemental Oxygen “Component

SECTION 3: 737-700 SERIES – continued

	Qualification" Equivalent Safety with JAR 25.1443(c)
CRI F-GEN9-3	Crew Determination of Quantity of Oxygen in Passenger Oxygen System Equivalent Safety with JAR 25.1441(c)
CRI G-GEN1	Instructions for Continued Airworthiness Equivalent Safety with CS 25.1529, CD25 Appendix H

7. OSD requirements

- As defined in CRI A-MMEL issue 1: for B737-600/-700/-800/-900/-900ER, JAR-MMEL/MEL Amendment 1, Section 1, Subpart A & B is applicable.
- As defined in document D926A105: B737-600/-700/-800/-900/-900ER, CS-FCD, Initial Issue, dated 31 Jan 2014 is applicable
- As defined in CRI A-CCD issue 1: for B737-600/-700/-800/-900/-900ER, CS-CCD, Initial Issue dated 31 January 2014 is applicable.

8. Environmental Protection Standards: Noise: ICAO Annex 16, Volume I (Third Edition)
Fuel: ICAO Annex 16, Volume II (Second Edition)
See also TCDSN EASA.IM.A.120

III. Technical Characteristics and Operational Limitations

1. Production Basis: Manufactured under Production Certificate 700

2. Type Design Definition: Defined by Boeing Top Drawing No. 001A0001-700 Rev. AG, dated January 12, 1998, and later approved changes and Production Revision Record (PRR) No. 38280.

(737-700 IGW) Boeing Top Drawing No. 001A0001-2703 Rev. CA, dated October 13, 1998, and later approved changes and Production Revision Record (PRR) No. 38280

3. Description: Refer to Section 2 (data pertinent to all NG Series)

4. Dimensions: Refer to Section 2 (data pertinent to all NG Series)

5. Engines:

CFM56-	7B20 7B20/2 7B20/3 7B20E	7B22 7B22/3 7B22E	7B24 7B24/2 7B24/3 7B24E	7B26 7B26/B1 7B26/3F 7B26E 7B26E/B1 7B26E/B2 7B26E/B2F 7B26E/F	7B27/B3 7B27/3B3 7B27E/B3

6. Auxiliary Power Unit: Refer to Section 2 (data pertinent to all NG Series)

7. Propellers: N/A

SECTION 3: 737-700 SERIES – continued

8. Fluids (Fuel, Oil, Additives,: Hydraulics) Refer to Section 2 (data pertinent to all NG Series)

9. Fluid Capacities: Refer to Section 2 (data pertinent to all NG Series)

10. Airspeed Limits: See Airplane Flight Manual

11. Maximum Operating Altitude: 12,497 m (41,000 ft) pressure altitude

12. All Weather Capability: See Airplane Flight Manual

13. Maximum Certified Masses:

	737-700*		737-700 IGW**	
Taxi and Ramp	155,000 lbs.	70,306 kg,	171,500 lbs.	77,791 kg.
Take-off	154,500 lbs.	70,080 kg.	171,000 lbs.	77,564 kg.
Landing	129,200 lbs.	58,604 kg.	134,000 lbs.	60,781 kg.
Zero Fuel	121,700 lbs.	55,202 kg.	126,000 lbs.	57,152 kg.

* Specified weights for -700 are Increased Design Weights approved post-initial Type Validation
** Reference Boeing PLOD B-T111-98-2097 (737-700 IGW Revision F)

14. Centre of Gravity Range: Refer to Airplane Flight Manual

15. Datum: See Weights and Balance Manual

16. Mean Aerodynamic Chord: in) (MAC) 3.96 m (155.81

17. Levelling Means: See Weight and Balance Manual

18. Minimum Flight Crew: Two (Pilot and Co-pilot) for all types of flight

19. Minimum Cabin Crew

The table below provides the certified Maximum Passenger Seating Capacities (MPS), the corresponding cabin configuration (exit arrangement and modifications) and the associated numbers of cabin crew members used to demonstrate compliance with the evacuation certification requirements of CS 25.803. Additional cabin crew members may be required to comply with other regulatory requirements (e.g., cabin attendant direct view).

Passenger Seating Capacity & Cabin Configuration	Cabin crew
From 101 to 149 passengers: (I, III, I) exit arrangement	3
100 or fewer passengers: (I, III, I) exit arrangement	2

20. Maximum Seating Capacity: (-) Passengers

Note: The maximum number of passengers approved for emergency evacuation is 149 with JAA / 737-700/SC/D- 14 applicable, otherwise 145.
See interior layout drawing for the maximum passenger capacities approved for each aeroplane delivered.

SECTION 3: 737-700 SERIES – continued

21. Exits:

B737-700	Number	Type	Size mm (inches)
1 Main Fwd LH	1	Type I	864W x 1829H (34 x 72),
2 Main Aft LH	1	Type I	762W x 1829H (30 x 72),
3 Service (Fwd, RH, Aft, RH)	1+1	Type I	762W x 1651H (30 x 65 - both)
4 Overwing/Emergency left	1	Type III	508W x 914H (20 x 36)
5 Overwing/Emergency right	1	Type III	508W x 914H (20 x 36)
6 Flight Crew Emergency Exits	1 + 1	Sliding	483W x 508H (19 x 20 - both)

22. Baggage/Cargo Compartment:

Location	Class	Volume m^3 ($ft^{3)}$
Front Fwd	C	11.37 (406)
Middle	N/A	N/A
Rear Aft	C	16.7 (596)
Underfloor	N/A	N/A

23. Wheels and Tyres: Refer to Section 2 (data pertinent to all NG Series)

24. ETOPS Operation: Refer to Section 2 (data pertinent to all NG Series)

25. Fuel Tank Flammability Reduction System (FRS): Aircraft which have made their first flight after 1 January 2012 must be equipped with a fuel tank Flammability Reduction System (EASA SIB 2010-10)

Flammability Reduction Systems have been installed on aircraft line numbers 1820 and 1831 in December 2005, and then since mid 2008 on aircraft line number 2517, 2620 and on.

This system shall remain installed and operative and can only be dispatched inoperative in accordance with the provisions of the MMEL

IV. Operating and Servicing Instructions

1. Flight Manual:

2. Service Information:

3. Required Equipment:

4. Universal Airplane Network Security Operator Guidance (UANSOG)

The Boeing Commercial Airplanes Universal Airplane Network Security Operator Guidance, D925W704-04, contains required Instructions for Continued Airworthiness and security guidance that when followed meets compliance requirements of the Network Cybersecurity Special Conditions.

SECTION 3: 737-700 SERIES – continued

V.**Operational Suitability Data (OSD)**

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate IM.A.120 as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.
Applicable OSD requirements are detailed in section 3.II.7.

1. Master Minimum Equipment List
   (see section 2.V)

2. Flight Crew Data
   (see section 2.V)

3. Cabin Crew Data
   (see section 2.V)

VI.**Notes**

1. Airplanes modified by Boeing design change "Lower Cabin Altitude" are capable of maintaining a cabin altitude of 6500 feet in lieu of the standard 8000 feet when operating at a cruising altitude of 41,000 feet. This modification has been approved by EASA STC 10042295.

SECTION 4: 737-800 Series

4.1 B737-800 Model

I. General

1.	Type / Model / Variant:	Boeing 737-800
2.	FAA Certification Application Date:	February 04, 1993
3.	JAA Validation Application Date: (Reference date for JAA validation)	August 04, 1993
4.	FAA Type Certification Date:	March 13, 1998
5.	EASA/JAA Type Validation Date:	April 09, 1998

II. Certification Basis

1.	FAA Type Certificate Data Sheet:	No. A16WE
2.	FAA Certification Basis:	As for Boeing 737-700, see Section 3

3. JAA/EASA Airworthiness Requirements:

   a. For aircraft without in-production winglets: As for Boeing 737-700, see Section 3

   b. For aircraft with in-production winglets:

      i. Applicable requirements for affected area:

      The affected area are the wingtip position and anti-collision lights, light fixtures and wiring within the wingtip, the winglets, wing box, wing spars and wing skins.

      The applicable requirements are defined in JAR 25 Change 14, effective 27 May 1994, Orange Paper 96/1, effective 19 April 1996, JAR AWO Change 2, effective 1st August 1996 and JAA IL-23-RVSM, effective April 1994.

      Two Equivalent Safety Findings apply:

      JAA/737-800/ES/F-01
      (PTC) CRI F-01 Forward Wingtip (Winglet) 8.5v Position Lights-Intensities
      Equivalent Safety with JAR 25.1389(b)(1), 25.1389(b)(2) 25.1391, 25.1395

      JAA/737-800/ES/F-02
      (PTC) CRI F-02 Forward Wingtip (Winglet) 8.5v Position Lights-Overlapping Intensities: Equivalent Safety with JAR 25.1389(b)(3) and 25.1395

      .

      ii. Applicable requirements for non-affected area

      The non-affected area are in particular (but not limited to) engine struts, fuselage, empennage, landing gear.
      The applicable requirements are those defined for Boeing 737-700 in Section 3

4. Special Conditions: As for Boeing 737-700, see Section 3

5. Exemptions/Deviations: As for Boeing 737-700, see Section 3

6. Equivalent Safety Findings: As for Boeing 737-700, see Section 3 and the following:

CRI C-15/PTC	Structural Certification Criteria for Large Antenna Installations Equivalent Safety with JAR 25.23, 25.251, 25.301, 25.365, 25.571, 25.581, 25.603, 25.605, 25.609, 25.613, 25.629, 25.631, 25.841, 25.901, 25.1419, 25.1529, and Appendix H
CRI F-01 PTC	Forward Wingtip (Winglet) 8.5 volt Position Litght Intensities Equivalent Safety with JAR 25.1389(b), 25.1391, 25.1395
CRI F-02 PTC	Forward Wingtip (Winglet) 8.5 volt Position Lights – Overlapping Intensities Equivalent Safety with Jar 25.1389(b)(3) and 25.1395

7. OSD requirements

- As defined in CRI A-MMEL issue 1: for B737-600/-700/-800/-900/-900ER, JAR-MMEL/MEL Amendment 1, Section 1, Subpart A &B is applicable.
- As defined in document D926A105: B737-600/-700/-800/-900/-900ER, CS-FCD, Initial Issue, dated 31 Jan 2014 is applicable
- As defined in CRI A-CCD issue 1: for B737-600/-700/-800/-900/-900ER, CS-CCD, Initial Issue dated 31 January 2014 is applicable.

8. Environmental Protection Standards: As for Boeing 737-700, see Section 3

III. Technical Characteristics and Operational Limitations

1. Production Basis: Manufactured under Production Certificate 700

2. Type Design Definition: Defined by Boeing Top Drawing No. 001A0001-800 Rev. AK, dated February 27, 1998, and later approved changes and Production Revision Record (PRR) No. 38280.

3. Description: Refer to Section 2 (data pertinent to all NG Series)

4. Dimensions: Refer to Section 2 (data pertinent to all NG Series)

5. Engines:

CFM56-	7B24 7B24/3 7B24/3B1 7B24E 7B24E/B1	7B26 7B26/2 7B26/3 7B26/3F 7B26E 7B26E/F	7B27 7B27/2 7B27/3 7B27/3F 7B27E 7B27E/F	7B27/B1 7B27/3B1 7B27/3B1F 7B27/3B3 7B27E/B1 7B27E/B1F 7B27E/B3

6. Auxiliary Power Unit: Refer to Section 2 (data pertinent to all NG Series)

SECTION 4: 737-800 SERIES – continued

7. Propellers: N/A

8. Fluids (Fuel, Oil, Additives,: Hydraulics) Refer to Section 2 (data pertinent to all NG Series)

9. Fluid Capacities: Refer to Section 2 (data pertinent to all NG Series)

10. Airspeed Limits: See Airplane Flight Manual

11. Maximum Operating Altitude: 12,497 m (41,000 ft) pressure altitude

12. All Weather Capability: See Airplane Flight Manual

13. Maximum Certified Masses:

Taxi and Ramp	174,900 lbs.	79,333 kg.
Take-off	174,200 lbs.	79,015 kg.
Landing	146,300 lbs.	66,360 kg.
Zero Fuel	138,300 lbs.	62,731 kg.

* Specified weight approved post-initial Type Validation

14. Centre of Gravity Range: Refer to Airplane Flight Manual

15. Datum: See Weights and Balance Manual

16. Mean Aerodynamic Chord (MAC): 3.96 m (155.81 in)

17. Levelling Means: See Weight and Balance Manual

18. Minimum Flight Crew: Two (Pilot and Co-pilot) for all types of flight

19. Minimum Cabin Crew

The table below provides the certified Maximum Passenger Seating Capacities (MPS), the corresponding cabin configuration (exit arrangement and modifications) and the associated numbers of cabin crew members used to demonstrate compliance with the evacuation certification requirements of CS 25.803. Additional cabin crew members may be required to comply with other regulatory requirements (e.g., cabin attendant direct view).

Passenger Seating Capacity & Cabin Configuration	Cabin crew
From 151 to 189 passengers: (I, III, III, I) exit arrangement	4
From 101 to 150 passengers: (I, III, III, I) exit arrangement	3
100 or fewer passengers: (I, III, III, I) exit arrangement	2

20. Maximum Seating Capacity: (-) Passengers

Note: The maximum number of passengers approved for emergency evacuation is 189 (with JAA/737-700/SC/D-14 applicable - or otherwise: 180).
See interior layout drawing for the maximum passenger capacities approved for each aeroplane delivered.

21. Exits:

SECTION 4: 737-800 SERIES – continued

B737-800	Number	Type	Size mm (inches)
1 Main Fwd LH	1	Type I	864W x 1829H (34 x 72),
2 Main Aft LH	1	Type I	762W x 1829H (30 x 72),
3 Service (Fwd, RH, Aft, RH)	1+1	Type I	762W x 1651H (30 x 65-both)
4 Overwing/Emergency left	2	Type III	508W x 914H (20 x 36)
5 Overwing/Emergency right	2	Type III	508W x 914H (20 x 36)
6 Cockpit side window (2)	Flight Crew Emerg. Exits		483W x 508H (19 x 20)

For crew emergency evacuation purposes, the side windows are available on both sides.

22. Baggage/Cargo Compartment:

Location	Class	Volume m^3 ($ft^{3)}$
Front Fwd	C	19.6 (692)
Middle	N/A	N/A
Rear Aft	C	25.46 (899)
Underfloor	N/A	N/A

23. Wheels and Tyres: Refer to Section 2 (data pertinent to all NG Series)

24. ETOPS Operation: Refer to Section 2 (data pertinent to all NG Series)

24. Fuel Tank Flammability Reduction System (FRS): Aircraft which have made their first flight after 1 January 2012 must be equipped with a fuel tank Flammability Reduction System (EASA SIB 2010-10)

Flammability Reduction Systems have been installed on aircraft line numbers 1820 and 1831 in December 2005, and then since mid 2008 on aircraft line number 2517, 2620 and on.

This system shall remain installed and operative and can only be dispatched inoperative in accordance with the provisions of the MMEL

IV. Operating and Servicing Instructions

1. Flight Manual: Airplane Flight Manual, Document No. D631A001.J02

2. Service Information: Maintenance Manual, Document No. D633A101

Maintenance Review Board Report Revision 1; 19 November 1997 or subsequent JAA/EASA approved revision

Airworthiness Limitations and Certification Maintenance Requirements: 737-600/700/800 Maintenance Planning Document (MPD) Document Section 9 Ref.: D626A001, Revision Dated September 1997, and later revisions thereof

Service Letters and Service Bulletins

3. Required Equipment: The approved equipment is listed in: (737-700) CRI A-10

V. Operational Suitability Data (OSD)

SECTION 4: 737-800 SERIES – continued

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate IM.A.120 as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.
Applicable OSD requirements are detailed in section 4.II.7.

1. Master Minimum Equipment List
   (see section 2.V)

2. Flight Crew Data
   (see section 2.V)

3. Cabin Crew Data
   (see section 2.V)

VI. Notes

None

4.2 B737-800 Model – Boeing Converted Freighter Major Change

I. General

The 737-800 BCF (Boeing Converted Freighter) is a 737-800 series passenger airplane that has been modified to operate in a freighter configuration.

This is a major change to the B737-800 model, not a new model. These aircraft remain 737-800 model aircraft for documentation purposes on this TCDS and with regard to the applicability of airworthiness directives.
Because of the magnitude of this design change, the certification basis for the changed aspects was required to be established and documented in accordance with section 21.101 (Changed Product Rule).

Paragraph numbering is consistent with that of section 4. Any paragraph not included in this section for the B737-800BCF is therefore unchanged from the B737-800 (including noise and emissions requirements).

1. Type-Model Variant:	Boeing 737-800 BCF (Boeing Converted Freighter)
2. FAA Certification Application Date:	October 29, 2014
3. EASA Validation Application Date:	March 23, 2016
4. FAA Type Certificate Date:	April 06, 2018
5. EASA Type Validation Date:	April 12, 2018

II. Certification Basis

1. FAA Type Certification Data Sheet:	No. A16WE
2. FAA Certification Basis:	14 CFR Part 25 Amendment 25-0 through 25-138 except where modified by the FAA Issue Paper G-1

3. EASA Airworthiness Requirements for non-affected Area:

As for Boeing 737-800 baseline model, see Section 4.1.

4 EASA Airworthiness Requirements for affected Area:

Affected Area definition:

- Main Deck Cargo Door (MDCD).
- Modification of fuselage surround structure for installation of MDCD:

MDCD surround structure perimeter located from STA 360 to STA 500H (S-4R to S24L) with the MDCD located from STA 440 to STA 500D (S-3L to S-17L.)

- Modification of floor structure to accommodate cargo loads and handling:

floor structure modified in Sections 41, 43, 44, 46 and 47. (STA 344 – STA 986)

- Removal of passenger interior configuration for installation of main deck Class E cargo compartment and supernumerary area.
- Installation of Class E main deck cargo Fire Detection System.

SECTION 4: 737-800 SERIES – continued

- Installation of new main deck Cargo Handling System (CHS) and Rigid Cargo Barrier (RCB) placards via third party STC.
- Airplane environmental control systems, mechanical, hydraulic, electrical systems revisions to support passenger to freighter modification.

Applicable JAR/CS Requirements:

CS-25 Amendment 15, effective July 21, 2014 with reversions identified in section 9.II.8.

CS-AWO, effective October 17 2003

5. Special Conditions:

The following Special Conditions have been defined in their respective CRI:

CRI D-30 PTC	Courier Compartment Affected requirement CS 25.857(e) amdt 15
CRI D-31 PTC	Access to class E cargo compartment in flight Affected requirement CS 25.855, 25.857, 25.1309, 25.1439, 25.1443 at amdt 15
CRI F-GEN-11	Non-Rechargeable Lithium Batteries Installations Affected requirement CS 25.601, 25.863, 25.1353(c)

5. Deviations:

N/A

6. Equivalent Safety Findings:

The following JAA/EASA Equivalent Safety Findings have been applied:

CRI F-39 PTC	737-800 BCF installation of a common supplemental oxygen system for flight crew and supernumeraries Equivalent Safety with CS 25.1445(a) amdt 15

7. Operational Suitability Requirements:

As for Boeing 737-800, see Section 4.

8. Reversions

All reversions from the applicable airworthiness standards to earlier standard, as per Part 21.101(b), are listed below.
The following reversions from the applicable airworthiness standards contain additional requirements that can be found in the associated CRI.

Applicable paragraph	Reversion	Conditions associated to the reversions are given in the following CRIs
CS 25.365(e)(1)(2)	Pressurised Compartment loads, Engine disintegration fragments Reversion to FAR 25.365 Amendment 0	737-700 CRI A.11- 02, plus JAA/737- 700/SC/C-1
CS 25.734	Protection Against Wheel and Tyre	

SECTION 4: 737-800 SERIES – continued

Applicable paragraph	Reversion	Conditions associated to the reversions are given in the following CRIs
	Failures Reversion to JAR 25.729(f) at Change 13	
CS 25.795(b)(1)	Security Considerations Not applicable	
CS 25.1301	Function and installation Reversion to JAR 25.1301 at Change 13 EWIS Components: reversion to 25.1703-1733, except for 1707(c)	CRI F-GEN-11, CRI F-GEN9-4
CS 25.1301(b)	Function and installation: EWIS Not applicable	CRI H-01
CS 25.1309	Equipment Systems and Installations Reversion to JAR 25.1309 at Change 13 with OP 90/1	CRI A.11-16, CRI F-GEN-11, CRI F-GEN9-4
CS 25.1309(d)	Equipment Systems and Installations: EWIS Not applicable	CRI H-01
CS 25.1322	Flight Crew Alerting Reversion to JAR 25.1322 at Change 13/14	
CS 25.1703-1733 excepted 1707(c)	Electrical Wiring Interconnection Systems (EWIS) Not applicable	CRI H-01

III. Technical Characteristics and Operational Limitations

(Characteristics not mentioned below are identical to those of the B737-800 baseline model)

1. Type Design Definition: Boeing Top Project Drawing 800A0003

2. Maximum Certified Masses: There are no increases to the 737-800 Operational Weights.

Taxi and Ramp	174,900 lbs.	79,333 kg.
Take-off	174,200 lbs.	79,015 kg.
Landing	146,300 lbs.	66,360 kg.
Zero Fuel	138,300 lbs.	62,731 kg.

3. Maximum Seating Capacity

Maximum Passenger Capacity 0 (Zero) Passengers. Up to 6 (six) Supernumeraries within the Flight Deck and courier compartment. 2 (two) Flight Crew members.

4. Exits

B737-800BCF	Number	Type	Size mm (inches)
1 Main Fwd LH	1	Type I	864W x 1829H (34 x 72),
3 Service (Fwd, RH)	1	Type I	762W x 1651H (30 x 65-both)
6 Cockpit side window (2)	Flight Crew Emerg. Exits		483W x 508H (19 x 20)

For crew emergency evacuation purposes, the side windows are available on both sides. Overwing and Aft exits are deactivated.

5. Baggage/Cargo Compartment:

Location	Class	Volume m^3 ($ft^{3)}$
Main Deck	E	144.4 (5100)
Front Fwd	C	19.0 (670)
Middle	N/A	N/A
Rear Aft	C	25.0 (883)
Underfloor	N/A	N/A

6. ETOPS Operation: Refer to Section 2 (data pertinent to all NG Series)

7. Other limitations: None

IV. Operating and Service Instructions

1. Airplane Flight Manual (AFM): Boeing Document D631A001

2. Service Information: Airworthiness Limitations and Certification Maintenance Requirements: 737-600/700/800 Maintenance Planning Document (MPD) Document Section 9 Ref.: D626A001, Revision Dated September 1997, and later revisions thereof.

Service Letters and Service Bulletins as published by Boeing and approved by the FAA.

4. Weight and Balance (WBM): Boeing Document D043A584

5. Universal Airplane Network Security Operator Guidance (UANSOG)

The Boeing Commercial Airplanes Universal Airplane Network Security Operator Guidance, D925W704-04, contains required Instructions for Continued Airworthiness and security guidance that when followed meets compliance requirements of the Network Cybersecurity Special Conditions.

V. Operating Suitability Data (OSD)

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate IM.A.120 as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.
Applicable OSD requirements are detailed in section 9.II.7.

1. Master Minimum Equipment List
OSD MMEL requirements as per section 2.V.
The EASA MMEL is defined in Boeing document D6-32545-ESEM, revision 4 dated April 05th, 2018, or later approved revisions.

2. Flight Crew Data
OSD FCD requirements as per section 2.V .
The Flight Crew Data is defined in Boeing document D626A014, revision A dated 19 February 2021 or later approved revisions.

SECTION 4: 737-800 SERIES – continued

3. Cabin Crew Data

OSD CCD requirements as per section 2.V .

VI. Notes

Following STC must be installed in conjunction with this installation:
-EASA.IM.A.S01078 LiteAir Aviation Products Inc. Window plugs (10015384)
-10065167 Ventura Aerospace Inc. 9g Rigid Cargo barrier
-10065171 Ancra International LLC Cargo Loading system

1. Airplanes modified by Boeing design change “Lower Cabin Altitude” are capable of maintaining a cabin altitude of 6500 feet in lieu of the standard 8000 feet when operating at a cruising altitude of 41,000 feet. This modification has been approved by EASA STC 10042295.

SECTION 5: 737-600 Series – continued

SECTION 5: 737-600 Series

I. General

1.	Type / Model / Variant:	Boeing 737-600
2.	FAA Certification Application Date:	February 04, 1993
3.	JAA Validation Application Date: (Reference date for JAA validation)	August 04, 1993
4.	FAA Type Certification Date:	August 12, 1998
5.	EASA/JAA Type Validation Date:	September 09, 1998

II. Certification Basis

1.	FAA Type Certificate Data Sheet:	No. A16WE
2.	FAA Certification Basis:	As for Boeing 737-700, see Section 3
3.	JAA/EASA Airworthiness Requirements:	As for Boeing 737-700, see Section 3
4.	Special Conditions:	As for Boeing 737-700, see Section 3
5.	Exemptions/Deviations:	As for Boeing 737-700, see Section 3
6.	Equivalent Safety Findings:	As for Boeing 737-700, see Section 3
7.	Operational Suitability Data:	As for Boeing 737-700, see Section 3
8.	Environmental Protection Standards:	As for Boeing 737-700, see Section 3

III. Technical Characteristics and Operational Limitations

1.	Production Basis:	Manufactured under Production Certificate 700
2.	Type Design Definition:	Defined by Boeing Top Drawing No. 001A0001-600 Rev. AW, dated June 08, 1998, and later approved changes and Production Revision Record (PRR) No. 38280.
3.	Description:	Refer to Section 2 (data pertinent to all NG Series)
4.	Dimensions:	Refer to Section 2 (data pertinent to all NG Series)
5.	Engines:	

CFM56-		7B18/3	7B20 7B20/2 7B20/3 7B20E	7B22 7B22/2 7B22/3 7B22E

6.	Auxiliary Power Unit:	Refer to Section 2 (data pertinent to all NG Series)
7.	Propellers:	N/A

SECTION 5: 737-600 Series – continued

8. Fluids (Fuel, Oil, Additives,: Hydraulics) Refer to Section 2 (data pertinent to all NG Series)

9. Fluid Capacities: Refer to Section 2 (data pertinent to all NG Series)

10. Airspeed Limits: See Airplane Flight Manual

11. Maximum Operating Altitude: 12,497 m (41,000 ft) pressure altitude

12. All Weather Capability: See Airplane Flight Manual

13. Maximum Certified Masses:

Taxi and Ramp	146,000 lbs.	66,224 kg.
Take-off	145,500 lbs.	65,997 kg.
Landing	120,500 lbs.	54,657 kg.
Zero Fuel	114,000 lbs.	51,709 kg.

14. Centre of Gravity Range: Refer to Airplane Flight Manual

15. Datum: See Weights and Balance Manual

16. Mean Aerodynamic Chord: 3.96 m (155.81 in) (MAC)

17. Levelling Means: See Weight and Balance Manual

18. Minimum Flight Crew: Two (Pilot and Co-pilot) for all types of flight

19. Minimum Cabin Crew

The table below provides the certified Maximum Passenger Seating Capacities (MPS), the corresponding cabin configuration (exit arrangement and modifications) and the associated numbers of cabin crew members used to demonstrate compliance with the evacuation certification requirements of CS 25.803. Additional cabin crew members may be required to comply with other regulatory requirements (e.g., cabin attendant direct view).

Passenger Seating Capacity & Cabin Configuration	Cabin crew
From 101 to 145 passengers: (I, III, I) exit arrangement	3
100 or fewer passengers: (I, III, I) exit arrangement	2

20. Maximum Seating Capacity: (-) Passengers

Note: The maximum number of passengers approved for emergency evacuation is 149 (with JAA/737-700/SC/D-14 applicable - or otherwise: 145).
See interior layout drawing for the maximum passenger capacities approved for each aeroplane delivered.

SECTION 5: 737-600 Series – continued

21. Exits:

B737-600	Number	Type	Size mm	(inches)
1 Main Fwd LH	1	Type I	864W x 1829H	(34 x 72),
2 Main Aft LH	1	Type I	762W x 1829H	(30 x 72),
3 Service (Fwd, RH, Aft, RH)	1+1	Type I	762W x 1651H	(30 x 65-both)
4 Overwing/Emergency left	1	Type III	508W x 914H	(20 x 36)
5 Overwing/Emergency right	1	Type III	508W x 914H	(20 x 36)
6 Cockpit side window (2)	Flight Crew Emerg. Exits		483W x 508H	(19 x 20)

For crew emergency evacuation purposes, the side windows are available on both sides.

22. Baggage/Cargo Compartment:

Location	Class	Volume m^3 ($ft^{3)}$
Front Fwd	C	7.59 (268)
Middle	N/A	N/A
Rear Aft	C	13.8 (488)
Underfloor	N/A	N/A

23. Wheels and Tyres: Refer to Section 2 (data pertinent to all NG Series)

24. ETOPS Operation: Refer to Section 2 (data pertinent to all NG Series)

25. Fuel Tank Flammability Reduction System (FRS): Aircraft which have made their first flight after 1 January 2012 must be equipped with a fuel tank Flammability Reduction System (EASA SIB 2010-10)

Flammability Reduction Systems have been installed on aircraft line numbers 1820 and 1831 in December 2005, and then since mid 2008 on aircraft line number 2517, 2620 and on.

This system shall remain installed and operative and can only be dispatched inoperative in accordance with the provisions of the MMEL

Equivalent Safety with CS 25.1529, CS25 Appendix H

7. OSD requirements
   - As defined in CRI A-MMEL issue 1: for B737-600/-700/-800/-900/-900ER, JAR-MMEL/MEL Amendment 1, Section 1, Subpart A & B is applicable.
   - As defined in document D926A105: B737-600/-700/-800/-900/-900ER, CS-FCD, Initial Issue, dated 31 Jan 2014 is applicable
   - As defined in CRI A-CCD issue 1: for B737-600/-700/-800/-900/-900ER, CS-CCD, Initial Issue dated 31 January 2014 is applicable.
8. Environmental Protection Standards: As for Boeing 737-700, see Section 3

III. **Technical Characteristics and Operational Limitations**

1. Production Basis: Manufactured under Production Certificate 700

2. Type Design Definition: Defined by Boeing Top Drawing No. 001A0001-900 Rev. HK, dated March 06, 2001, and later approved changes and Production Revision Record (PRR) No. 38906.

3. Description: Refer to Section 2 (data pertinent to all NG Series)

4. Dimensions: Refer to Section 2 (data pertinent to all NG Series)

5. Engines:

CFM56-	7B24 7B24/3 7B24/3B1 7B24E 7B24E/B1	7B26 7B26/3 7B26/3F 7B26E 7B26E/F	7B27 7B27/3 7B27/3F 7B27E 7B27E/F	7B27/B1 7B27/3B1 7B27/3B3 7B27E/B1 7B27E/B3

6. Auxiliary Power Unit: Refer to Section 2 (data pertinent to all NG Series)

7. Propellers: N/A

8. Fluids (Fuel, Oil, Additives,: Hydraulics) Refer to Section 2 (data pertinent to all NG Series)

9. Fluid Capacities: Refer to Section 2 (data pertinent to all NG Series)

10. Airspeed Limits: See Airplane Flight Manual

11. Maximum Operating Altitude: 12,497 m (41,000 ft) pressure altitude

12. All Weather Capability: See Airplane Flight Manual

13. Maximum Certified Masses:

Taxi and Ramp	174,700 lbs.	79,242 kg.
Take-off	174,200 lbs.	79,015 kg.
Landing	147,300 lbs.	66,814 kg.
Zero Fuel	140,300 lbs.	63,639 kg.

14. Centre of Gravity Range: Refer to Airplane Flight Manual

SECTION 6: 737-900 Series – continued

15. Datum: See Weights and Balance Manual

16. Mean Aerodynamic Chord (MAC): 3.96 m (155.81 in)

17. Levelling Means: See Weight and Balance Manual

18. Minimum Flight Crew: Two (Pilot and Co-pilot) for all types of flight

19. Minimum Cabin Crew

The table below provides the certified Maximum Passenger Seating Capacities (MPS), the corresponding cabin configuration (exit arrangement and modifications) and the associated numbers of cabin crew members used to demonstrate compliance with the evacuation certification requirements of CS 25.803. Additional cabin crew members may be required to comply with other regulatory requirements (e.g., cabin attendant direct view).

Passenger Seating Capacity & Cabin Configuration	Cabin crew
From 151 to 189 passengers: (I, III, III, I) exit arrangement	4
From 101 to 150 passengers: (I, III, III, I) exit arrangement	3
100 or fewer passengers: (I, III, III, I) exit arrangement	2

20. Maximum Seating Capacity: (-) Passengers

Note: The maximum number of passengers approved for emergency evacuation is 189 (with JAA/737-700/SC/D-14 applicable) or otherwise: 180
See interior layout drawing for the maximum passenger capacities approved for each aeroplane delivered.

21. Exits:

B737-900	Number	Type	Size mm (inches)
1 Main Fwd LH	1	Type I	864W x 1829H (34 x 72),
2 Main Aft LH	1	Type I	762W x 1829H (30 x 72),
3 Service (Fwd, RH, Aft, RH)	1+1	Type I	762W x 1651H (30 x 65-
4 Overwing/Emergency left	2	Type III	508W x 914H (20 x 36)
5 Overwing/Emergency right	2	Type III	508W x 914H (20 x 36)
6 Cockpit side window (2)	Flight Crew Emerg. Exits		483W x 508H (19 x 20)

For crew emergency evacuation purposes, the side windows are available on both sides.

22. Baggage/Cargo Compartment:

Location	Class	Volume m^3 ($ft^{3)}$
Front Fwd	C	23.5 (830)
Middle	N/A	N/A
Rear Aft	C	28.2 (996)
Underfloor	N/A	N/A

23. Wheels and Tyres: Refer to Section 2 (data pertinent to all NG Series)

24. ETOPS Operation: Refer to Section 2 (data pertinent to all NG Series)

25. Fuel Tank Flammability Reduction System (FRS): Aircraft which have made their first flight after 1 January

SECTION 6: 737-900 Series – continued

2012 must be equipped with a fuel tank Flammability Reduction System (EASA SIB 2010-10)

Flammability Reduction Systems have been installed on aircraft line numbers 1820 and 1831 in December 2005, and then since mid 2008 on aircraft line number 2517, 2620 and on.

This system shall remain installed and operative and can only be dispatched inoperative in accordance with the provisions of the MMEL

IV. **Operating and Servicing Instructions**

1. Flight Manual: Airplane Flight Manual, Document No. D631A001.J04

2. Service Information: Maintenance Manual, Document No. D633A101

Maintenance Review Board Report Revision 3 together with MRBR Supplement for 737-900 as JAA Approved 12 January 2000; subsequent JAA approved revision

Airworthiness Limitations and Certification Maintenance Requirements: 737-600/700/800 Maintenance Planning Document (MPD) Document Section 9 Ref.: D626A001, Revision dated March 2001, and later revisions thereof

Service Letters and Service Bulletins.

3. Required Equipment: The approved equipment is listed in:
(737-900) CRI 9/A-10

V. **Operational Suitability Data (OSD)**

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate IM.A.120 as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.
Applicable OSD requirements are detailed in section 6.II.7.

1. Master Minimum Equipment List
(see section 2.V)

2. Flight Crew Data
(see section 2.V)

3. Cabin Crew Data
(see section 2.V)

VI. **Notes**

None

SECTION 7: 737-900ER

I. General

1.	Type / Model / Variant:	Boeing 737-900ER
2.	FAA Certification Application Date:	June 05, 2002
3.	JAA Validation Application Date: (Reference date for JAA validation)	January 10, 2002 June 05, 2002
4.	FAA Type Certification Date:	April 20, 2007
5.	EASA/JAA Type Validation Date:	April 22, 2008

II. Certification Basis

1.	FAA Type Certificate Data Sheet:	No. A16WE
2.	FAA Certification Basis:	FAR Part 25 Amendment 25-108 except where modified by the FAA Issue Paper G-1
3.	JAA/EASA Airworthiness Requirements:	Applicable JAR Requirements (Reference CRI 9ER/A-01)* JAR 25 Change 15, effective 01 October 2000 JAR AWO Change 2, effective 01 August 1996 JAA IL-23 RVSM, effective April 1994

In addition to the -900 model the following NPAs have been applied in various CRIs:

NPA 25B, C, D-236	Flutter, Deformation and Fail Safe Criteria
NPA 25C, D, F-314	Better Plan for Harmonization – Cabin Safety
NPA 25F-274	Introduction of MLS and Upgrade of Equipment Software Standards
NPA 25D-301 Issue 1	Doors
NPA 25D-336	Reinforced Cockpit Doors to Enhance Aeroplane Security
NPA 25D-320	Revised Standards for Cargo or Baggage Compartments in Transport Category Aeroplanes

* *NOTE: CRIs initially raised for the model -700 as cross-referenced in CRI 9ER/A-01 as applicable do not have a prefix. CRIs initially raised for the model -900 as cross-referenced therein as applicable are identified by the prefix "9/".CRIs which are specific to the Boeing 737 submodel -900ER are identified by the prefix "9ER/".*

3.1. Reversions:

The following Reversions as defined by the respective (-700 or -900) CRI's, were identified and accepted as part of the JAA Validation of the Boeing 737-700 and -900 models and are requested by Boeing and agreed by EASA for the certification basis for the validation of the Boeing 737-900ER design change:

CRI A.11-06	Fasteners
JAR 25.607(a)	Reversion to FAR 25.607(a) Amendment 0
CRI A. 11-08	Lift and Drag Device Indicator
JAR 25.699(a)	Reversion to FAR 25.699 Amendment 0
CRI A.11-11	Doors
JAR 25.783(f)	Reversion to FAR 25.783(f) Amendment 15
CRI A. 11-16	Equipment, Systems and Installations
JAR 25.1309	Reversion to FAR 25.1309 Amendment 0
CRI A. 11-23	Windshields and Windows
JAR 25.775(d)	Reversion to FAR 25.775(d) Amendment 0
CRI 9/A. 11-03	Automatic Pilot System
JAR 25.1329	Reversion to JAR 25.1329 Change 13 and associated ACJ
CRI 9/A. 11-04	Electronic Display Systems
AMJ 25-11	Reversion to JAR 25 Change and associated ACJ
CRI J-04	APU Fuel Shut Off Valve Indication
JAR 25A1141(f)(2)	Reversion to FAR 25.1141 Amendment 11

Note: The CRI A.11-13 is applicable to the 737-900ER as well. This CRI A.11-13 has been reclassified from reversion to means of compliance and for this reason is not directly included in the list but remains applicable.

The following reversions as defined by the respective CRI's have been identified to be not applicable for the EASA Validation of the Boeing 737-900ER model:

JAR 25.571 ch. 15	Fatigue and Damage Tolerance
(CRI A.11-5)	Boeing requested re-reversion to Chg 15.

The following reversions as defined by the respective CRI's have been identified and accepted as part of the EASA Validation of the Boeing 737-900ER model:

JAR 25.571(c)	Fatigue Safe-Life Scatter Factors –
CRI 9ER/C-14	Harmonized Scatter Factor – JAR 25 Chg 15
JAR 25.365	Pressurized Cabin Loads (partly)
CRI 9/A. 11-01	Reversion to FAR 25.365 Amendment 0 (with exception
CRI 9ER/C-19	to the aft pressure bulkhead area, which is a significant change) JAR 25 Chr 15, CRI 9ER/C-19 applies
JAR 25.493	Braked Roll Conditions
CRI 9ER/C-21	Reversion to Chg 14 based on unchanged area.
JAR 25.562	Emergency Landing Dynamic Loads

SECTION 7: 737-900ER Series – continued

CRI 9ER/A.11-04	Partly reversion to JAR 25 Change 12 excluding Paragraph 25.562. Partly NPA 25C,D, F-314 except for (c)(5) and (c)(6)
JAR 25.729(f) and 25.1309	Protection of Equipment on the Landing Gear and in Wheel Wells. Reversion to Change 14 including OP 96/1

3.2. Elect to Comply:

Boeing elected to comply with the following requirements as part of the Models 737-700 and 737-900 JAA Validation. These updated CRIs are for the model (-900ER):

CRI 9ER/B-07	All Weather Operations JAR NPAs AWO 2 dtd. Nov 1991 and AWO 5 dtd. Jul 1994
CRI 9ER/C-05	Flutter, Deformation and Fail Safe Criteria JAR 25.629 in accordance with NPA-25B, C, D – 236 dated Dec 1996, SSG(98/8)
CRI 9ER/C-12 JAR 25.333, 335(c)(d)(e), 479(a), 481(a), 729(a)	Stalling Speeds for Structural Design TGM/25/6 is to be used for B737-900ER while Boeing proposed to use CRI C-12. JAR 25 Chg 15 applies
CRI 9ER/D-02	Towbarless Towing JAR 25X745(d) Introduce Special Condition CRI be reopened. INT/POL/25/13 instead of RNPA 25D-275
CRI 9ER/F-04	Software Policy JAR 25.1309 Chg 15 applies
CRI PTC G-01 (Rev. Sep/1999)	ETOPS Approval (180 minutes) AMC 20-6
CRI PTC G-02	Aeroplane Flight Manual JAR 25.1581, ACJ and AMJ 25.1581
CRI PTC G-03	ETOPS Approval (Performance Charts)
JAR 25.335(b)(2)	Design Dive Speed JAR 25 Chg 15 applies
JAR 25.427(b)(3) No CRI issued	Round the Clock Gust JAR 25 Chg 15 applied – CRI C-07 not applicable
JAR 25.499(e)	Nose Wheel Steering JAR 25 Chg 15 applies
JAR 25.519(b)	Jacking JAR 25 Chg 15 applies
JAR 25.415	Ground Gust JAR 25 Chg 15 applies

4. Special Conditions:

SECTION 7: 737-900ER Series – continued

The following JAA Special Conditions as defined by the respective (-700) CRI's, were identified as part of the JAA Validation of the Boeing 737-700 model and are applicable to, and form part of, the EASA Certification Basis for the Validation Boeing 737-900ER model:

JAA/737-700/SC/B-10 CRI B-10	Stall Warning Thrust Bias Affected Requirement JAR 25-207(c)
JAA/737-700/SC/D-01 CRI D-01 Interim Policy INT/POL/25/6	Brakes requirements qualification and testing Affected requirements JAR 25.735/NPA 25B,D,G-244 and JAA
JAA/737-700/SC/D-04 CRI D-04	Landing gear warning Affected requirements JAR 25.729 (e)(2) to (4)
JAA/737-700/SC/D-14 CRI D-14	Exit Configuration Affected requirements JAR 25.807, JAR 25.562 and JAR 25.813(c)(1)
JAA/737-700/SC/F-01 CRI F-01	High Intensity Radiated Field (HIRF) INT/POL/25/2: Affected requirement JAR 25.1431(a)
JAA/737-700/SC/F-02 CRI F-02 ACJ 25X899	Protection from Effects of Lightning Strike; Direct Effects INT/POL/25/3: Affected requirements: JAR 25X899 and
JAA/737-700/SC/F-03 CRI F-03	Protection from Effects of Lightning Strike; Indirect Effect INT/POL/25/4 Affected requirements: JAR 25.581, 25.899, J5.954, 25.1309
CRI F-GEN10 PTC	Non-rechargeable Lithium Batteries Installations CS 25.601, 25.863, 25.869, 25.1301, 25.1309, 25.1353(c), 25.1529, 25.1360 (b) (only for installation of Honeywell CVR P/N 980-6032-003 and FDR P/N 980-4750-003)
CRI F-GEN-11	Non-rechargeable Lithium Batteries Installations CS 25.601, 25.863, 25.1353(c) (for all installations not covered by F-GEN 10)

The following EASA Special Conditions have been applied defined in their respective CRI:

CRI D-GEN01 PTC	Fire Resistance of Thermal Insulation Material Affected requirement CS25.856 & Appendix F
CRI D-GEN02 PTC	Application of Heat Release and Smoke Density Requirements for Seat Materials Affected Requirements: CS 25.853(d); Appendix F part IV and V; Part 21 §21A.16B
CRI PTC/E-10	Flammibility Reduction Systems (FRS) INT/POL/25/12: Affected requirement FAR 25.981 (c), JAR 25.1309, NPA 10-2004, JAR 21.16(a)(1)
CRI E-16/PTC	Fuel Tank Safety Affected requirement CS 25.981 Amdt 1

CRI PTC F-23	CIAP/IRNAV and NPS Human Factors Evaluation Affected requirement INT/POL 25/14, JAR 25.771(a) and (e), 25.777(a), 25.1301, 25.1303, 25.1309, 25.1523
CRI F-29	Lithium Ion Batteries Affected requirement JAR 25.601, 25.863, 25.1309, 25.1353(c) and 25.1529
CRI F-30	Data Link Services for the Single European Sky EUROCAE ED-120, ED-78A, ED-110B, ED-92A (Radio VDL/M2); Affected Requirements: JAR/FAR 25.1301, 25.1307, 25.1309, 25.1321, 25.1322, 25.1431, 25.1459, 25.1581, 25.1585, Commission Regulation (EC) No 29/2009
CRI F-31(PTC)	Security Protection of Aircraft Systems and Networks Affected requirement JAR 25.1309
CRI H-01	"Instructions for Continued Airworthiness (ICA) on Electrical Wiring Interconnecting Systems (EWIS)" Affected requirement Part 21A.16(b)(3), 21A.21(c)(3), CS 25.1529 & Appendix H

The following Special Conditions have been identified which are specific to the model 737-900ER:

CRI 9ER/C-11	Interaction of Systems and Structure Affected requirement JAR 25.302

5. Exemptions/Deviations:

The following Partial Deviation/Exemption has been applied:

JAA/737-700/PE/D-02 CRI D-02	Hydraulic System Proof Pressure Testing Partial Deviation against JAR 25 1435(b)(1)

6. Equivalent Safety Findings:

The following Equivalent Safety Findings were identified as part of the JAA Validation of the models -700/-900 or 757-300 and have been requested by Boeing and agreed by EASA to be applicable for model -900ER:

CRI C-15/PTC	Structural Certification Criteria for Large Antenna Installations Equivalent Safety with JAR 25.23, 25.251, 25.301, 25.365, 25.571, 25.581, 25.603, 25.605, 25.609, 25.613, 25.629, 25.631, 25.841, 25.901, 25.1419, 25.1529, and Appendix H
JAA/737-700/ES/D-16 CRI D-16	Automatic Overwing Exit (AOE) Equivalent Safety with JAR 25.783(f)
JAA/737-700/ES/D-17 CRI D-17	Oversized Type I Exits, Maximum Number of Passengers up to 145/145/180 Equivalent Safety with JAR 25.807
JAA/737-700/ES/D-18	Slide/Raft Inflation Gas Cylinders CRI

SECTION 7: 737-900ER Series – continued

D-18	Equivalent Safety with JAR 25X1436
JAA/757-300/ES/D-19 CRI D-19	Emergency Exit Markings JAR 25.811(f)
JAA/737-700/ES/E-09 CRI E-09	Automatic Fuel Shut Off Equivalent Safety with JAR 25.979(b)(1)

7. OSD requirements

- As defined in CRI A-MMEL issue 1: for B737-600/-700/-800/-900/-900ER, JAR-MMEL/MEL Amendment 1, Section 1, Subpart A & B is applicable.
- As defined in document D926A105: B737-600/-700/-800/-900/-900ER, CS-FCD, Initial Issue, dated 31 Jan 2014 is applicable
- As defined in CRI A-CCD issue 1: for B737-600/-700/-800/-900/-900ER, CS-CCD, Initial Issue dated 31 January 2014 is applicable.

8. Environmental Protection Standards: As for Boeing 737-700, see Section 3

III. **Technical Characteristics and Operational Limitations**

1. Production Basis: Manufactured under Production Certificate 700

2. Type Design Definition: Defined by Boeing Document 737-900ER Amended Type Design Configuration, DDL 737-900ER Rev B, and later approved changes

3. Description: Refer to Section 2 (data pertinent to all NG Series)

4. Dimensions: Length 42.1m (138 ft 2 in)
Span 34.32 m (112 ft 7 in)
Height 12.57 m (41 ft 3 in)

5. Engines:

CFM56-					
	7B24 7B24/3 7B24/3B1 7B24E 7B24E/B1	7B26 7B26/3 7B26/3F 7B26E 7B26E/F	7B27 7B27/3 7B27/3F 7B27E 7B27E/F	7B27/B1 7B27/3B1 7B27/3B1F 7B27E/B1 7B27E/B1F	7B27/B3 7B27/3B3 7B27E/B3

6. Auxiliary Power Unit: Refer to Section 2 (data pertinent to all NG Series)

7. Propellers: N/A

8. Fluids (Fuel, Oil, Additives,: Hydraulics) Refer to Section 2 (data pertinent to all NG Series)

9. Fluid Capacities: Refer to Section 2 (data pertinent to all NG Series)

10. Airspeed Limits: See Airplane Flight Manual

SECTION 7: 737-900ER Series – continued

11. Maximum Operating Altitude: 12,497 m (41,000 ft) pressure altitude

12. All Weather Capability: See Airplane Flight Manual

13. Maximum Certified Masses:

Taxi and Ramp	188,200 lbs.	85,366 kg.
Take-off	187,700 lbs.	85,139 kg.
Landing	157,300 lbs.	71,350 kg.
Zero Fuel	149,300 lbs.	67,721 kg.

14. Centre of Gravity Range: Refer to Airplane Flight Manual

15. Datum: See Weight and Balance Manual

16. Mean Aerodynamic Chord: (MAC) 3.96 m (155.81 in)

17. Levelling Means: See Weight and Balance Manual

18. Minimum Flight Crew: Two (Pilot and Co-pilot) for all types of flight

19. Minimum Cabin Crew

The table below provides the certified Maximum Passenger Seating Capacities (MPS), the corresponding cabin configuration (exit arrangement and modifications) and the associated numbers of cabin crew members used to demonstrate compliance with the evacuation certification requirements of CS 25.803. Additional cabin crew members may be required to comply with other regulatory requirements (e.g., cabin attendant direct view).

Passenger Seating Capacity & Cabin Configuration	Cabin crew
From 216 to 220 passengers: (C, III, III, I, C) exit arrangement	5
From 201 to 215 passengers: (C, III, III, II, C) or (C, III, III, I, C) exit arrangement	5
From 190 to 200 passengers: (C, III, III, II, C) or (C, III, III, I, C) exit arrangement	4
From 151 to 189 passengers: (I, III, III, I), (C, III, III, II, C) or (C, III, III, I, C) exit arrangement	4
From 101 to 150 passengers: (I, III, III, I), (C, III, III, II, C) or (C, III, III, I, C) exit arrangement	3
100 or fewer passengers: (I, III, III, I) exit arrangement	2

20. Maximum Seating Capacity: (-) Passengers

Note: The maximum number of passengers approved for emergency evacuation is 220 (with Passenger Passageway acc. CRI 9ER/D-20), or otherwise: 215 (with downsized Passageway acc. CRI 9ER/D-20), or otherwise with blocked MED unserviceable: 189.

See interior layout drawing for the maximum passenger capacities approved for each aeroplane delivered.

SECTION 7: 737-900ER Series – continued

21. Exits:

B737-900ER	Number	Type	Size mm (inches)
1 Main Fwd LH	1	Type I	864W x 1829H (34 x 72),
2 Main Aft LH	1	Type I	762W x 1829H (30 x 72),
3 Service (Fwd, RH, Aft, RH)	1+1	Type I	762W x 1651H (30 x 65 – both)
4 Overwing/Emergency left	2	Type III	508W x 914H (20 x 36)
5 Overwing/Emergency right	2	Type III	508W x 914H (20 x 36)
6 Mid Emergency Door LH/RH	1+1	Type I(II)	660W x 1295H (26 x 51)
7 Cockpit side window (2)	Flight Crew Emerg. Exits		483W x 508H x 20(19)

For crew emergency evacuation purposes, the side windows are available on both sides.

22. Baggage/Cargo Compartment:

Location	Class	Volume m^3 ($ft^{3)}$
Front Fwd	C	23.4 (825)
Middle	N/A	N/A
Rear Aft	C	28.2 (996)
Underfloor	N/A	N/A

23. Wheels and Tyres: Nose Assy (Qty 2) Tyre: 27 x 7.75 - 15 or 27 x 7.75 - R15
Wheel: 27 x 7.75 – 15
Main Assy (Qty 4) Tyre: H44.5 x 16.5 – 21 Wheel: H44.5 x 16.5 – 21
Speed Rating: 235 MPH refer to Section 2 (data pertinent to all NG Series)

24. ETOPS Operation: Refer to Section 2 (data pertinent to all NG Series)

25. Fuel Tank Flammability Reduction System (FRS): Aircraft which have made their first flight after 1 January 2012 must be equipped with a fuel tank Flammability Reduction System (EASA SIB 2010-10)

Flammability Reduction Systems have been installed on aircraft line numbers 1820 and 1831 in December 2005, and then since mid 2008 on aircraft line number 2517, 2620 and on.

This system shall remain installed and operative and can only be dispatched inoperative in accordance with the provisions of the MMEL.

IV. **Operating and Servicing Instructions**

1. Flight Manual: Airplane Flight Manual, Document No. D631A001.J05 (04)

2. Service Information: Maintenance Manual, Document No. D633A101

Maintenance Review Board Document D626A001-MRBR with MRBR Supplement for 737-900ER as EASA approved June 12, 2006

	Airworthiness Limitations and Certification Maintenance Requirements: 737-600/700/800/900 Maintenance Planning Document (MPD) Document Section 9 Ref.: D626A001, Revision (R2) dated March 2007, and later revisions
	Service Letters and Service Bulletins.
3. Required Equipment:	The approved equipment is listed in: (737-700) CRI A-10

4. Universal Airplane Network Security Operator Guidance (UANSOG)

The Boeing Commercial Airplanes Universal Airplane Network Security Operator Guidance, D925W704-04, contains required Instructions for Continued Airworthiness and security guidance that when followed meets compliance requirements of the Network Cybersecurity Special Conditions.

V.**Operational Suitability Data (OSD)**

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate IM.A.120 as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.
Applicable OSD requirements are detailed in section 7.II.7.

1. Master Minimum Equipment List
   (see section 2.V)

2. Flight Crew Data
   (see section 2.V)

3. Cabin Crew Data
   (see section 2.V)

VI.**Notes**

1. Airplanes modified by Boeing design change “Lower Cabin Altitude” are capable of maintaining a cabin altitude of 6500 feet in lieu of the standard 8000 feet when operating at a cruising altitude of 41,000 feet. This modification has been approved by EASA STC 10042295.

SECTION 8: 737-8, 737-9, 737-8200

I. General

1. Type/ Model/ Variant: Boeing 737-8, -9, -8200 “MAX”

2. Performance Class A

3. Certifying Authority
Federal Aviation Administration (FAA)
BASOO Branch
2200 S 216th St
Des Moines, WA 98198
United States of America

4. Manufacturer
The Boeing Company
P.O. Box 3707
Seattle, WA 98124-2207
United States of America

5. FAA Type Certification Application Date:

Model	FAA Type Certification Application Date
737-8	January 26, 2012
737-9	June 12, 2013
737-8200	September 28, 2015

6. EASA Type Validation Application Date:

Model	EASA Type Validation Application Date
737-8	June 27, 2012
737-9	June 12, 2013
737-8200	October 22, 2015

7. FAA Type Certificate Date:

Model	FAA Type Certificate Date
737-8	March 8, 2017
737-9	February 15, 2018
737-8200	March 31, 2021

8. EASA Type Validation Date:

Model	EASA Type Validation Date
737-8	March 27, 2017
737-9	Oct. 17 2018
737-8200	April 06, 2021

II. Certification Basis

1. Reference Date for Determining the Applicable Airworthiness Requirements:

Model	Reference Date for Determining the Applicable Airworthiness Requirements
737-8	June 30, 2012
737-9	June 12, 2013
737-8200	April 17, 2016

2. Reference Date for Determining the Applicable Operational Suitability Requirements:

Model	Reference Date for Determining the Applicable Operational Suitability Requirements
737-8	June 30, 2012
737-9	June 12, 2013
737-8200	April 17, 2016

3. FAA Type Certification Data Sheet: No. A16WE

4. FAA Certification Basis

Model	FAA Certification Basis
737-8	14 CFR Part 25 Amendment 25-0 through 25-137 plus 25-141 except where modified by the FAA Issue Paper G-1
737-9	Same as 737-8
737-8200	14 CFR Part 25 Amendment 25-0 through 25-141 except where modified by the FAA Issue Paper G-1

5. EASA Airworthiness Requirements:

Model	EASA Airworthiness Requirements
737-8	Applicable JAR/CS Requirements (Reference CRI A-01)* CS-25 Amendment 11, effective July 4, 2011 with exceptions identified in Table A in Appendix A CS-AWO, effective October 17, 2003
737-9	Applicable JAR/CS Requirements (Reference CRI A-01)* CS-25 Amendment 12, effective July 13, 2012 with exceptions identified in Table A in Appendix A. CS-AWO, effective October 17, 2003
737-8200	Applicable JAR/CS Requirements (Reference CRI A-01)* CS-25 Amendment 17, effective July 15, 2015 with exceptions identified in Table A in Appendix A CS-AWO, effective October 17, 2003

SECTION 8: 737-8/-9/-8200 - continued

5.1 Special Conditions

The following Special Conditions have been defined in their respective CRI for 737-8/-9/-8200:

CRI – Special Condition	Title/ Applicable requirement	-8	-9	-8200
CRI C-02/MAX	Design Manoeuvre Requirements Affected requirement 25.331, 25.349, 25.351	X	X	X
CRI D-04/MAX	Towbarless Towing Affected requirement 25.745(d), 25.1309, 25.1322	X	X	X
CRI D-15/MAX	Emergency Exits Configuration Affected requirement 25.807, 25.562, 25.813	X	X	X
CRI D-27/MAX	Installation of Inflatable Restraint Systems Affected requirement 25.562, 25.785	X	X	X
CRI D-GEN02 PTC	Application of Heat Release and Smoke Density Requirements to Seat Materials Affected Requirement 25.853(d) Appendix F	X	X	X
CRI D-GEN 9	Incorporation of Inertia Locking Device in Dynamic Seats	X	X	X
CRI E-05/MAX	Engine Cowl Retention Affected Requirement 25.901(b)(2), 25.901(c), 25.1193(f)(3)	X	X	X
CRI E-27/MAX	Fan blade loss, effects at airplane level Affected Requirement 25.901(c), 25.903(d)(1), 25.1309(b)	X	X	X
CRI E-32/MAX	Fire Extinguishing Plumbing and Wiring Connections Affected Requirement 25.901, 25.903, 25.1195	X	X	X
CRI PTC F-01 JAA/737-700/SC/F-01	High Intensity Radiated Fields (HIRF) Affected requirement JAR 25.1431(a)	X	X	X
CRI PTC F-03 JAA/737-700/SC/F-03	Protection from the Effects of Lightning Strike; Indirect Effects Affected requirement 25.581, 25X899, 25.954, 25.1309, 25.1316 Note: 25.1316 is affected but the CRI does not list this regulation.	X	X	X
CRI F-03/MAX	HIRF Protection INT POL 25/2 Issue 2: Affected requirement CS 25	X	X	
CRI F-11/MAX	Airworthiness standard for aircraft operations under falling and blowing snow Affected requirement 25.1093(b), 25J1093(b)	X	X	X
CRI F-GEN-11	Non-Rechargeable Lithium Batteries Installations Affected requirement 25.601, 25.863, 25.1353(c)	X	X	X

SECTION 8: 737-8/-9/-8200 - continued

CRI – Special Condition	Title/ Applicable requirement	-8	-9	-8200
CRI PTC F-17	EGPWS Airworthiness Approval Affected requirement 25.1301, 25.1309, 25.1322, 25.1431(a)(c), 25.1459, AMJ 25-11, AMJ 25.1309, AMJ 25.1322	X	X	X
CRI PTC F-27	Global Navigation Satellite System (GNSS) Landing System (GLS) - Airworthiness Approval for Category I Approach Operations Affected requirement 25.1301, 25.1309, 25.1322, 25.1329, 25.1431, 25.1459, 25.1581, JAR-AWO, JAR-AWO NPA AWO-9	X	X	X
CRI PTC F-29	Lithium – Ion batteries Affected requirement 25.601, 25.863, 25.1309, 25.1353(c), and 25.1529	X	X	X
CRI PTC F-30	Data Link Services for the Single European Sky Affected requirements: CS 25.1301, 25.1307, 25.1309, 25.1321, 25.1322, 25.1431, 25.1459, 25.1581, 25.1585, or equivalent of CS 23, Commission Regulation (EC) No 29/2009	X	X	X
CRI PTC F-31	Security Protection of Aircraft Systems and Networks Affected requirement 25.1309	X	X	X
CRI PTC F-37	Flight Recorders and Data Link Recording Affected requirement 25.1301, 25.1457, 25.1459	X	X	X

5.2 Deviations:

The following EASA deviations have been applied for 737-8/-9/-8200:

CRI - Deviation	Title/ Affected Requirement	-8	-9	-8200
CRI E-30/MAX	Time Limited Deviation to Special Condition CRI E-05/MAX (Engine cowl retention) Affected requirement: 737-7/-8/-9 CRI E-05/MAX, 25.901(b)(2), 25.901(c), 25.1193	X	X	
CRI E-31/MAX	Fuel Quantity Indication System (FQIS) Electrostatics Threat Affected requirement: 25.899, 25.901(c), 25.981(a)(3), and 25.1309(b)(1)	X	X	
CRI E-36/MAX	Right Main Fuel Tank Indication of Refuel System Failure at Full Fuel Tank Level Affected requirement: 25.979(b)(2)		X	X

Notes:

CRI E-30/MAX is a time limited Deviation. EASA has accepted to delay to June 30,2022 the initial limit in this deviation, therefore individual Certificates of Airworthiness for 737-8/-9 airplanes become

SECTION 8: 737-8/-9/-8200 - continued

invalid after June 30, 2022, unless the Boeing Service Bulleting 737-71-1894 revision 1 or later revision is incorporated by the owner or operator.

CRI E-31/MAX is a line number limited Deviation only for the first (36) 737MAX models for the -8/-9 only. It is not needed for the 737-8200 those models all have resistors.

CRI E-36/MAX is a line number limited Deviation. This line number limited deviation is for 737-9 and 737-8200 airplanes delivered to EASA customers before line number 7650. Line number 7650 estimated delivery is late June or early July 2019. This deviation is also time limited: The 737-9 and 737-8200 airplanes delivered to EASA customers before line number 7650 cannot be operated after October 05th 2022 (4 years after EASA certification), unless the appropriate design changes are incorporated by the owner or operator.

5.3 Equivalent Safety Findings:

The following JAA/EASA Equivalent Safety Findings have been applied:

CRI - ESF	Title/ Equivalent Safety Requirement	-8	-9	-8200
CRI B-05/MAX	Longitudinal Trim at Vmo Equivalent Safety with 25.161(a), 25.161(c)(3), 25.1301	x	x	x
CRI B-06/MAX	En route Climb Equivalent Safety with CS 25.123(a) and (b)	x	x	x
CRI D-08 JAA/737-700/ES/D-08	Forward and Aft Door Escape Slide Low Sill Height Equivalent Safety with 25.810(a)(1)(ii)	x		
CRI 9ER/D-08	Forward and Aft Door Escape Slide Low Sill Height Equivalent Safety with 25.810(a)(1)(ii)		x	x

CRI G-GEN1	Instructions for Continued Airworthiness Equivalent Safety with 25.1529, 25.1729, 25 Appendix H	x	x	x
CRI J-03/MAX	APU Engine Mount Equivalent Safety with 25.865	x	x	x
CRI F-40 PTC	First Aid Portable Pulse Oxygen System Equivalent Safety with 25.1443(d)	x	x	x

5.4 Reversions

All reversions from the applicable airworthiness standards to earlier standard, as per Part 21.101(b), are listed in the Table A of appendix A.
The following reversions from the applicable airworthiness standards contain additional requirements that can be found in the associated CRI.

Applicable paragraph	Title/ Reversion	Conditions associated to the reversions are given in the following CRIs	-8	-9	-8200
25.562	Emergency Landing Dynamic Loads (Partly reversion to JAR 25 Change 12 excluding 25.562. Partly NPA 25C,D, F-314 except for (c)(5) and (c)(6))	CRI A.11-04	X		
25.562	Emergency Landing Dynamic Loads (Partly reversion to JAR 25 Change 12 excluding 25.562. Partly NPA 25C,D, F-314 except for (c)(5) and (c)(6))	CRI 9ER/A.11-04		X	
25.607(a)	Fasteners Reversion to FAR 25.607(a) Amendment 0	CRI A. 11-06	X	X	X
25.783(f)	Doors Reversion to FAR 25.783 Amendment 15	CRI A. 11-11	X	X	X
25.785(h)(1), (h)(2)	Direct View and Cabin Attendant Seat Reversion to FAR 25.785 Amendment 32	CRI A.11-13	X	X	X
25.1309	Equipment, Systems and Installations Reversion to FAR 25.1309 Amendment 0	CRI A. 11-16	X	X	X
25.775(d)	Windshields and Windows Reversion to FAR 25.775(d) Amendment 0	CRI A.11-23	X	X	X
25.21(g)(1), 25.125(b)(2)(ii)(B), 25.143(j), 25.207(e), 25.253(c), and Appendix C	Flight in Icing Conditions Reversion to CS 25.21(g)(1), 25.125(b)(2)(ii)(B), 25.143(j), 25.207(e), 25.253(c), and Appendix C Amendment 2	B-07/MAX	X	X	X
25.365(e)(1)	Pressurised Compartment loads, Engine disintegration fragments Reversion to FAR 25.365 Amendment 0	C-03/MAX	X	X	X

SECTION 8: 737-8/-9/-8200 - continued

Applicable paragraph	Title/ Reversion	Conditions associated to the reversions are given in the following CRIs	-8	-9	-8200
25.1322	Flight Crew Alerting Reversion to JAR 25,1322(b) at Amendment 13	F-14/MAX	X	X	X
25J1141(b)(2),	APU Fuel Shut-Off Valve Indication Reversion to B737-800 CRI J-04, Reversion to FAR 25.1141 Amendment 11	J-01/MAX	X	X	X

Note: The Boeing Model 737-8/-9/-8200 was granted an exception per Part 21.101(b) for CS 25.795(c)(2) based on the demonstration and justification that security features were present in the type design. These security features must be in consideration in any subsequent type design change, modification, or repair, to ensure that the level of safety designed into the 737-8/-9/-8200 is maintained. In lieu of the following, compliance to CS 25.795(c)(2), at amendment 11 (737-8), amendment 12 (737-9), and amendment 17 (737-8200) may be shown:

'Modifications that reduce flight critical system separation or adversely impact survivability of systems are not acceptable.'

6. Environmental Protection Requirements:

   Noise: ICAO Annex 16, Volume I (Sixth Edition, Amendment 10 for 737-8/-9, Amendment 11-B for 737-8200)

   Fuel Venting: ICAO Annex 16, Volume II (Fourth Edition, Amendment 9)

   See also TCDSN EASA.IM.A.120

7. Operational Suitability Requirements:

   CS-MMEL Initial Issue January 31, 2014
   CS-CCD Initial Issue January 31, 2014
   CS-FCD Initial Issue January 31, 2014

SECTION 8: 737-8/-9/-8200 - continued

III. **Technical Characteristics and Operational Limitations**

1. Type Design Definition:

Model	Boeing Document
737-8	D926A006
737-9	D926A010
737-8200	D926A020-2

2. Description:

Low wing jet transport with a conventional tail unit configuration, powered by two high bypass turbofan engines mounted on pylons beneath the wings.

3. Equipment:

The basic required equipment as prescribed in the applicable airworthiness regulations (see Certification Basis) must be installed in the aircraft for certification.

4. Dimensions:

Model	Fuselage Length	Height	Wingspan with Winglets
737-8	39.5 m (129 ft 6 in)	12.29 m (40 ft 4 in)	35.92 m (117 ft 10 in)
737-9	42.11 m (138 ft 2 in)	12.29 m (40 ft 4 in)	35.92 m (117 ft 10 in)
737-8200	39.5 m (129 ft 6 in)	12.29 m (40 ft 4 in)	35.92 m (117 ft 10 in)

5. Engines:

Two CFM LEAP-1B Series Engines. Refer to the approved Airplane Flight Manual for engine limitations.
Engine ratings, engine limitations, and all approved models are referred to in: EASA TCDS E.115 "CFM International LEAP-1B Series Engines"

Engine Configurations	Models		
	737-8	737-9	737-8200
LEAP-1B25	x		x
LEAP-1B27	x	x	x
LEAP-1B28	x	x	x
LEAP-1B28B1	x	x	x
LEAP-1B28BBJ1	x	x	

6. Auxiliary Power Unit:

Auxiliary Power Unit (APU): Honeywell 131-9 [B]
Limitations: See approved Airplane Flight Manual

7. Propellers: N/A

SECTION 8: 737-8/-9/-8200 - continued

8. Fluids (Fuel, Oil, Additives, Hydraulics):

Eligible Fuels:

Kerosene jet fuels conforming to the Boeing document D6-85140-101, revision C or later FAA approved revision, "Aviation Fuel and Fuel Additives Properties, Composition and Performance Requirements", are authorized for unlimited use with this airplane provided the limitations and requirements specified in the AFM are met. Kerosene jet fuels produced to other specifications and having properties meeting or exceeding the minimum requirements defined in the Boeing document D6-85140-101, revision C or later FAA approved revision, are acceptable for use. The engines will operate satisfactorily with any of the approved fuels or any mixture thereof. Kerosene jet fuels specifications that have been shown to meet the fuel minimum performance and specification requirements as described in the Boeing document D6-85140-101, revision C or later FAA approved revision, are the following:

- Jet A, Jet A-1 as specified in ASTM D1655
- Jet A-1 as specified in UK MoD Def-Stan 91-091
- JP-5 as specified in MIL-DTL-5624
- JP-8 as specified in MIL-DTL-83133

The above list is not exhaustive: other fuel specification/designation (e.g. GOST 10227 [TS-1], GB 6537 [Chinese No. 3 Jet Fuel], etc.) may be used provided the Boeing document D6-85140-101, revision C or later FAA approved revision, requirements are met.

Fuel specifications are often changed and updated. It is the responsibility of the operator to ensure the fuel and any additive that are put in the fuel meet the requirements specified in the Boeing document D6-85140-101, revision C or later FAA approved revision, and the AFM.

The approved fuel additives at the allowable maximum concentrations are listed in the Boeing document D6-85140-101, revision C or later FAA approved revision. A list of tolerated "incidental materials" and respective maximum concentrations allowed is also provided in the same Boeing document D6-85140-101, revision C or later FAA approved revision.

Operation of the CFM LEAP-1B series engines with fuel containing Kathon FP1.5 biocide is prohibited.

The use of any Wide Cut Fuel as defined in the Boeing document D6-85140-101, revision C or later FAA approved revision (e.g. Jet B as specified in ASTM D6615, JP-4 as specified in MIL-DTL-5624) is prohibited.

The maximum tank fuel temperature should not exceed 49°C (120°F).

Tank fuel temperature prior to take-off and inflight must not be less than -43°C (-45°F) or 3°C (5°F) above the fuel freezing point temperature, whichever is higher. The use of Fuel System Icing Inhibitor additives does not change the minimum fuel tank temperature limit.

Eligible Oils: Refer to the applicable associated manuals.

9. Fluid Capacities

Fuel Capacity:
25817 litres (6820 gallons), consisting of two wing tanks, each of 4819 litres (1273 gallons) capacity, and one center tank, capacity 16179 litres (4274 gallons).

Oil Capacity: 19.25 litres useable

SECTION 8: 737-8/-9/-8200 - continued

10. Airspeed Limits: See Airplane Flight Manual.

11. Maximum Operating Altitude: 12,497 m (41,000 ft) pressure altitude

12. Operating Limitations: See Airplane Flight Manual.

12.1 Approved Operations:

The airplane is approved for the following kinds of flight and operation, both day and night, provided the required equipment is installed and approved in accordance with the applicable regulations/specifications:

- Visual (VFR)
- Instrument (IFR)
- Icing Conditions
- Low weather minima (CAT I, II, III operations)
- RVSM
- Gear down dispatch
- Towbarless Towing
- Wet and Contaminated runway operations
- Extended Over-Water
- Narrow Runway

All Weather Capability
The aircraft is qualified to Cat III precision approach and autoland.

12.2 Other Limitations:

Operational Limits
Runway slope – ±3%

Maximum Takeoff and Landing Tailwind Component – 15 knots*
Maximum Operating Altitude – 41,000 feet pressure altitude

10 Minute Takeoff Thrust

* The capability of the airplane has been satisfactorily demonstrated for takeoff and manual and automatic landings with tailwinds up to 15 knots. This finding does not constitute operational approval to conduct take-offs and landings with tailwind components in excess of 10 knots.

13. Maximum Certified Masses: See Airplane Flight Manual.

Model	**Maximum Taxi and Ramp Weight**		**Maximum Take-off Weight**		**Maximum Landing Weight**		**Zero Fuel Weight**	
737-8	182,700 lbs.	82,871 kg.	182,200 lbs.	82,645 kg.	152,800 lbs.	69,308 kg.	145,400 lbs.	65,952 kg.
737-9	195,200 lbs.	88,541 kg.	194,700 lbs.	88,314 kg.	163,900 lbs.	74,343 kg.	156,500 lbs.	70,987 kg.
737-8200	181,700 lbs.	82,417 kg.	181,200 lbs.	82,190 kg.	152,800 lbs.	69,308 kg.	145,400 lbs.	65,952 kg.

14. Centre of Gravity Range: See Airplane Flight Manual

15. Datum: See Weights and Balance Manual

16. Mean Aerodynamic Chord (MAC): 3.96m (155.81 in)

17. Levelling Means: See Airplane Flight Manual

SECTION 8: 737-8/-9/-8200 - continued

18. Minimum Flight Crew: Two (Pilot and Co-pilot) for all types of flight

19. Minimum Cabin Crew:

The table below provides the certified Maximum Passenger Seating Capacities (MPS), the corresponding cabin configuration (exit arrangement and modifications) and the associated numbers of cabin crew members used to demonstrate compliance with the evacuation certification requirements of CS 25.803. Additional cabin crew members may be required to comply with other regulatory requirements (e.g., cabin attendant direct view).

737-8 Passenger Seating Capacity & Cabin Configuration	**Cabin crew**
From 151 to 189 passengers: (I, III, III, I) exit arrangement	4
From 101 to 150 passengers: (I, III, III, I) exit arrangement	3
100 or fewer passengers: (I, III, III, I) exit arrangement	2

737-9 Passenger Seating Capacity & Cabin Configuration	**Cabin crew**
From 216 to 220 passengers: (C, III, III, I, C) exit arrangement	5
From 201 to 215 passengers: (C, III, III, II, C) exit arrangement	5
From 151 to 200 passengers: (C, III, III, I, C) or (C, III, III, II, C) exit arrangement	4
From 151 to 189 passengers: (I, III, III, I) exit arrangement	4
150 or fewer passengers: (C, III, III, I, C) or (C, III, III, II, C) exit arrangement	3
From 101 to 150 passengers: (I, III, III, I) exit arrangement	3
100 or fewer passengers: (I, III, III, I) exit arrangement	2

737-8200 Passenger Seating Capacity & Cabin Configuration	**Cabin crew**
From 201 to 202 passengers: (C,III,III,II, C) exit arrangement	5
From 201 to 202 passengers: (C,III,III,III (de-rated Type II), C) attended MED exit arrangement	5
From 190 to 200 passengers: (C,III,III,III (de-rated Type II), C) attended MED exit arrangement	4
From 151 to 189 passengers: (I, III, III, I) exit arrangement	4
From 101 to 150 passengers: (I, III, III, I) exit arrangement	3
100 or fewer passengers: (I, III, III, I) exit arrangement	2

Note:

737-8200 only: The total number of passengers and cabin crew member is limited to 207 due to the Environmental Control System ventilation rate per occupant as defined in CS 25.831(a).

20. Maximum Seating Capacity:

Model	**Maximum Number of Passengers Approved for Emergency Evacuation**
737-8	189 passengers with special condition CRI D-15/MAX and NG ESF CRI D-17 applied, otherwise 180 passengers

SECTION 8: 737-8/-9/-8200 - continued

737-9	220 passengers with (C-III-III-I-C) exit arrangement; 215 passengers with a (C-III-III-II-C) exit arrangement and CRI 9ER/D-20 applied; 189 passengers with a (I-III-III-I) exit arrangement and special condition CRI D-15/MAX and NG ESF CRI D-17 applied, otherwise 180 passengers.
737-8200	189 passengers with a (I-III-III-I) exit arrangement and special condition CRI D-15/MAX and NG ESF CRI D-17 applied, otherwise 180 passengers. 202 passengers with a (C-III-III-derated II (III)-C) exit arrangement with flight attendant, and CRI D-28/MAX applied; 202 passengers with a (C-III-III-II-C) exit arrangement and CRI 9ER/D-20 applied;

Notes:

See interior layout drawing for the maximum passenger capacities approved for each aeroplane delivered.

737-8200 only: The total number of passengers and cabin crew member is limited to 207 due to the Environmental Control System ventilation rate per occupant as defined in CS 25.831(a).

21. Baggage/ Cargo Compartment:

737-8		
Location	**Class**	**Volume m^3 (ft^3)**
Front Fwd	C	19.0 (672)
Middle	N/A	N/A
Rear Aft	C	24.6 (869)
Underfloor	N/A	N/A

737-9		
Location	**Class**	**Volume m^3 (ft^3)**
Front Fwd	C	23.2 (818)
Middle	N/A	N/A
Rear Aft	C	28.2 (996)
Underfloor	N/A	N/A

737-8200		
Location	**Class**	**Volume m^3 (ft^3)**
Front Fwd	C	19.0 (672)
Middle	N/A	N/A
Rear Aft	C	24.6 (869)
Underfloor	N/A	N/A

22. Wheels and Tyres: Speed Rating: 225 MPH, 235 MPH

Model	**Speed Rating**	**Nose Assy (Qty 2) Tyre**	**Wheel**	**Main Assy (Qty 4) Tyre**	**Wheel**

SECTION 8: 737-8/-9/-8200 - continued

737-8	225 MPH, 235 MPH	27 x 7.75R15/12PR	27 x 7.75 – 15	H44.5x16.5R21/30PR	HR44.5 x 16.5 – 21
737-9	225 MPH, 235 MPH	27 x 7.75R15/12PR	27 x 7.75 – 15	H44.5x16.5R21/32PR	HR44.5 x 16.5 – 21
737-8200	225 MPH, 235 MPH	27 x 7.75R15/12PR	27 x 7.75 – 15	H44.5x16.5R21/30PR	HR44.5 x 16.5 – 21

Refer to Boeing Wheel/Tire/Brake Interchangeability Drawing for further details

23. ETOPS:

The 737-8 and 737-9 have been evaluated in accordance with the type design requirements of CS 25.1535 and found suitable for up to and including 180-minute Extended Operations (ETOPS) when operated and maintained in accordance with Boeing Document No. D044A032, “Model 737 MAX ETOPS Configuration, Maintenance, and Procedures (CMP)”. This finding does not constitute approval to conduct ETOPS.

24. Exits:

B737-8	**Number**	**Type**	**Size mm (inches)**
1 Main Fwd LH	1	Type I	864W x 1829H (34 x 72)
2 Main Aft LH	1	Type I	762W x 1829H (30 x 72)
3 Service (Fwd, RH, Aft, RH)	1+1	Type I	762W x 1651H (30 x 65, both)
4 Overwing/Emergency left	2	Type III	508W x 914H (20 x 36)
5 Overwing/Emergency right	2	Type III	508W x 914H (20 x 36)
6 Cockpit side window (2)	Flight Crew Emerg. Exits		483W x 508H (19 x 20)

B737-9	**Number**	**Type**	**Size mm (inches)**
1 Main Fwd LH	1	Type I (C)	864W x 1829H (34 x 72)
2 Main Aft LH	1	Type I (C)	762W x 1829H (30 x 72)
3 Service (Fwd, RH, Aft, RH)	1+1	Type I (C)	762W x 1651H (30 x 65, both)
4 Overwing/Emergency left	2	Type III	508W x 914H (20 x 36)
5 Overwing/Emergency right	2	Type III	508W x 914H (20 x 36)
6 Mid Emergency Door LH/RH	1+1	Type I (II)	660W x 1295H (26 x 51)
7 Cockpit side window (2)	Flight Crew Emerg. Exits		483W x 508H (19 x 20)

B737-8200	**Number**	**Type**	**Size mm (inches)**
1 Main Fwd LH	1	Type I (C)	864W x 1829H (34 x 72)
2 Main Aft LH	1	Type I (C)	762W x 1829H (30 x 72)
3 Service (Fwd, RH, Aft, RH)	1+1	Type I (C)	762W x 1651H (30 x 65, both)
4 Overwing/Emergency left	2	Type III	508W x 914H (20 x 36)
5 Overwing/Emergency right	2	Type III	508W x 914H (20 x 36)
6 Mid Emergency Door LH/RH	1+1	Type II	660W x 1321H (26 x 52)
7 Mid Emergency Door LH/RH	1+1	Type III (de-rated	660W x 1321H (26 x 52)

SECTION 8: 737-8/-9/-8200 - continued

		Type II)	
8 Cockpit side window (2)	Flight Crew Emerg. Exits		483W x 508H (19 x 20)

For crew emergency evacuation purposes, the side windows are available on both sides.

25. Fuel Tank Flammability Reduction System (FRS):
The Fuel Tank Flammability Reduction System shall remain installed and operative and can only be dispatched inoperative in accordance with the provisions of the MMEL.

IV. Operating and Service Instructions

1. Airplane Flight Manual (AFM): Boeing Document D631A002

2. Instructions for Continued Airworthiness and Airworthiness Limitations:

Boeing Document	Title
D626A009	737-7/8/8200/9/10 Maintenance Review Board (MRB) Report
D626A011-9-01	737-7/8/8200/9/10 Airworthiness Limitations
D626A011-9-02	737-7/8/8200/9/10 Airworthiness Limitations – Line No. Specific
D626A011-9-03	737-7/8/8200/9/10 Certification Maintenance Requirements
D626A011-9-04	737-7/8/8200/9/10 Special Compliance Items

3. Service Information:

Boeing Document	Title
D626A011	737-7/8/8200/9/10 Maintenance Planning Document (MPD)
D633AM101	Airplane Maintenance Manual

4. Weight and Balance (WBM):

Model	Boeing Document
737-8/-8200	D636A080
737-9	D737A090

5. Universal Airplane Network Security Operator Guidance (UANSOG)

The Boeing Commercial Airplanes Universal Airplane Network Security Operator Guidance, D925W704-04, contains required Instructions for Continued Airworthiness and security guidance that when followed meets compliance requirements of the Network Cybersecurity Special Conditions.

V. Operating Suitability Data (OSD)

SECTION 8: 737-8/-9/-8200 - continued

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate IM.A.120 as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014. Applicable OSD requirements are detailed in section 8.II.7.

1. Master Minimum Equipment List

   a. The EASA MMEL for the 737-8 and 737-9 is defined in Boeing document D639A001-02, revision 2 dated 25 September 2020, or later approved revisions.
   b. The EASA MMEL for the 737-8200 is defined in Boeing document D639A001-02, revision 3 dated 05 March 2021, or later approved revisions.

2. Flight Crew Data

   The Flight Crew Data is defined in Boeing document D626A014, revision A dated 19 February 2021 or later approved revisions.
   The Flight Crew Data is required for entry into service by EU operator.

3. Cabin Crew Data

   a. The Cabin Crew Data has been approved as per the defined Operational Suitability Data Certification Basis, namely CS-CCD- Initial Issue, and as demonstrated by the "Boeing Document D611A099 - Operational Suitability Data - Cabin Crew Data, B737NG and B737-8/-9/-8200 MAX, First Issue, Revision D, dated 29 March 2019", or later approved revisions.
   b. Required for entry into service by EU operator.
   c. For Cabin Crew, the aircraft models: B737-9 MAX without Mid Exit Doors (MED) activated and B737-8 MAX are determined to be the same aircraft type.
   d. For Cabin Crew, the model B737-9 MAX with MED activated is determined to be a variant to the B737-8 MAX model.
   e. For Cabin Crew the model B737-9 MAX "with" or "without" MED activated is determined to be a variant to the aircraft model B737-900ER (with Mid Exit Door (MED) activated), thus, also a variant to the models: B737-600, B737-700, B737-800, B737-900, B737-900ER.
   f. For Cabin Crew, the model B737-8200 MAX is determined to be a variant to the B737-900ER (with MED activated) model.
   g. For Cabin Crew, the models: B737-600, B737-700, B737-800, B737-900, B737-900/ER, B737 MAX-8/-9, and the B737-8200 are variants to the B737-900ER (with MED activated).
   h. For Cabin Crew, the model B737-8200 MAX "with" or "without" MED activated is determined to be a variant to the aircraft model B737-900ER (with Mid Exit Door (MED) activated), thus, also a variant to the models: B737-600, B737-700, B737-800, B737-900, B737-900ER.

VI. Part 26 compliance information

For all variants in this section, compliance with point 26.300(a) of Part 26 is demonstrated by complying with points:

- 26.301 Compliance Plan for (R)TC holders
- 26.302 Fatigue and damage tolerance evaluation
- 26.303 Limit of Validity
- 26.304 Corrosion prevention and control program
- 26.305 Validity of the continuing structural integrity program
- 26.306 Fatigue critical baseline structure

SECTION 8: 737-8/-9/-8200 - continued

- 26.307 Damage tolerance data for existing changes to fatigue critical structure
- 26.308 Damage tolerance data for existing repairs to fatigue critical structure
- 26.309 Repair Evaluation Guidelines

VII. **Notes**

1. Cabin Interior and Seating Configuration must be approved.
2. 737-8 airplanes modified by Boeing Service Bulletin 737-21-1217 Lower Cabin Altitude (LCA) modification are capable of maintaining a cabin altitude of 6,500 feet in lieu of the standard 8,000 feet when operating at a cruising altitude of 41,000 feet. This modification has been approved for airplanes listed in Boeing Service Bulletin 737-21-1217 Revision 1, dated July 17, 2018, or later approved revision.
   737-9 airplanes modified by Boeing Service Bulletin 737-21-1217 Lower Cabin Altitude (LCA) modification are capable of maintaining a cabin altitude of 6,500 feet in lieu of the standard 8,000 feet when operating at a cruising altitude of 41,000 feet. This modification has been approved for airplanes listed in Boeing Service Bulletin 737-21-1217 Revision 4, dated August 14, 2020, or later approved revision.
3. Additional information is provided in FAA Type Certificate Data Sheet A16WE.

III. **Change Record**

Starting with issue 07

Issue	Date	Changes	TC issue
Issue 07	11/10/2011	Section 2-7.III.5 (NG): Addition of engine variants Section 2.III.17: Added term “approved” wrt AFM Section 3.II.4: JAR 25.562 added to text CRI D-14 Section 3 II.4, 6.II.4, 7.II.4: CRI PTC/E-10 added Section 7.II.3: Paragraph 4.4 MOCs deleted Section 7.II.4: CRI PTC/D-GEN02 added Section “Administrative” added	Issue 02 07/07/2008
Issue 08	03/11/2011	Section 3.II.4 Removal of the duplicate sentence before CRI PTC/E-10. Section 3.III.24 Added Fuel Tank Flammability Reduction System Requirments Section 4.III.24 Added Fuel Tank Flammability Reduction System Requirments Section 5.III.23 Corrected list to sequential numbers Section 5.III.24 Added Fuel Tank Flammability Reduction System Requirments Section 6.II.4 Removal of the duplicate sentence before CRI PTC/E-10. Section 6.III.23 Corrected list to sequential numbers Section 6.III.24 Added Fuel Tank Flammability Reduction System Requirments Section 7.III.24 Added Fuel Tank Flammability Reduction System Requirments	
Issue 09	12/07/2012	Section 1.II.4.and Section 2.II: Introduction of CRI H-01 for ICA on EWIS	
Issue 10	10/01/2014	1st page: The Boeing Company address Section 1.II.3, 3.II 3 JAA Airworthiness requirements: - Change the title to JAA/EASA Airworthiness Requirements Section 3.II.3 JAA Airworthiness requirements: - Change the title to JAA/EASA Airworthiness Requirements - Identification of applicable paragraphs and CRI associated to each NPA. - Correction of applicable paragraph 25.519(b) instead of 25.X519(b) - For the CRI C-11, removal of affected requirement 25.310(b) - For the CRI D-14, addition of affected requirement JAR 25.813 - Addition of two Special Conditions: CRI F-29 and CRI F-30 Sections 3. III.12; 4.III.12; 5.III.12; 6.III.12; 7.III.12: All weather capability: Reference to the AFM instead of the category. Section 6.II.3 JAA Airworthiness requirements: - Change the title to JAA/EASA Airworthiness Requirements - Identification of applicable paragraphs and CRI associated to each NPA. - Correction of applicable paragraph 25.519(b) instead

Issue	Date	Changes	TC issue
		of 25.X519(b) -For the CRI D-14, addition of affected requirement JAR 25.813 -Addition of two Special Conditions: CRI F-29 and CRI F-30 Section 7 II.3 JAA/EASA Airworthiness Requirements -Change the title to JAA/EASA Airworthiness Requirements -For the CRI D-14, addition of affected requirement JAR 25.562 -Addition of two Special Conditions: CRI F-29 and CRI F-30	
Issue 11	14/12/2015	-Editorial changes to page one -OSD implementation in Sections V -Section 1.II.4: Addition of Special Condition CRIs PTC/E-10, E-15 PTC E-16/PTC and F-GEN10 PTC -Section 1.II.6: Addition of Equivalent Safety Finding CRIs F-GEN 9-1, F-GEN9-3 and G-GEN1 -Section 1.III.13: Updated the maximum weight values to incorporate increases that were approved post type validation -Section 1.III.22: Corrected typo “Oty” to Qty” -Section 2.II: Removed Special Condition CRI H-01 -Section 2.III.9: Corrected “Gall” to “Gallons” -Section 3.II.3.1: Added Reversion CRI A.11-13 -Section 3.II.4: Added Special Conditions CRIs D-GEN02 PTC, E-10, E-16/PTC, PTC F-23, PTC/F-17, PTC/F-18, PTC/F-27, F-31(PTC) , F-GEN10 PTC, G-01 and H-01 -Section 3.II.5: Added Deviation CRI PTC D-22 -Section 3.II.6: Added Equivalent Safety Finding CRIs PTC C-14, PTC/D-21, 9ER/D-21, F-GEN 9-1, F-GEN9-3 and G-GEN1 -Section 3.III.13: Corrected the kilogram value of maximum taxi and ramp weight -Section 4.II.6: Added Equivalent Safety Finding CRIs C-15/PTC, F-01 PTC and F-02 PTC -Section 4.III.13: Updated the maximum taxi and ramp weights to incorporate increases that were approved post type validation. Also corrected the kilogram values of each of the certified masses -Section 5.III.13 Updated the maximum weight values to incorporate increases that were approved post type validation -Section 6.II.4: Added Special Condition CRI E-16/PTC, PTC F-23, PTC/F-27, F-31(PTC) , F-GEN10 PTC and H-01 Section 6.II.5: Added Deviation CRI PTC D-22 -Section 6.II.6: Added Equivalent Safety Finding CRIs PTC C-14, PTC/D-21, 9ER/D-21, F-GEN 9-1, F-GEN9-3 and G-GEN1 -Section 6.III.13: Updated the maximum landing weight values to incorporate increases that were approved post type validation. Corrected the kilogram value of maximum taxi and ramp, take-off and landing weights.	Issue 02 07/07/2008

SECTION: ADMINISTRATIVE – continued

Issue	Date	Changes	TC issue
		-Section 7.II.3.1: Corrected the JAR referenced under Reversion CRI A.11-5 from "2571" to "571". Moved CRIs 9ER/F04 and 9ER/C-21 to present them in sequence -Section 7.II.3.2: inserted CRI PTC/G-02 -Section 7.II.4: Added Special Condition CRIs F-GEN10 PTC, D-GEN01 PTC, D-GEN02 PTC, E-16/PTC, PTC F-23, F-31(PTC) and H-01 -Section 7.II.6: Added Equivalent Safety Finding CRIs C-15/PTC, E-11, F-GEN 9-1, F-GEN9-3, G-GEN1, and 9ER/D-21. Moved several CRIs to present the listing in sequence -Section 7.III.13: Corrected each of the kilogram values	
Issue 12	27/03/2017	-Section 8 "737-8" added. To be completed with inputs by CVU -Page1: references to B737-8 and Max series added -Section 4.II.3: B737-800 Winglets affected/non-affected area as per letter B-H320-2000-00472 -Sections 3 to 7: applicable OSD requirements detailed in the respective sub-sections II	Issue 02 07/07/2008
Issue 13	28/07/2017	-Section 8.III.23 ETOPS completed -OSD data: statement "or later approved revisions" added to the document rev. number if mentioned. -F-GEN-11 CRI added to sections 1.II, 3.II, 6.II and 7.II -clarification about F-GEN10 PTC applicability added in sections 1.II, 3.II, 6.II and 7.II -typos corrected	Issue 02 07/07/2008
Issue 14	12/04/2018	- Section 4: split into 4.1 for the B737-800 baseline model and 4.2 for the B737-800 BCF significant major change - Section 2.V OSD requirements explicitly stated Section 8: III.13 Weights corrected (metric values)	Issue 02 07/07/2008
Issue 15	13/09/2018	- B737-8 LEAP engines section III.5 amended with – G06 variants. - Minimum Cabin Crew indications added in section III.19 for models -300/-400/-500/-600/-700/-900 and -900ER - FAA postal address updated - Lower Cabin Altitude Notes added in Section VI of B737-700/-800/-900ER/-8	Issue 02 07/07/2008
Issue 16	05/10/2018	- B737-9 Model added in Section 8 - former "Section 9" renumbered to "Section 8" - B737-9 certification basis integrated in Table A of Appendix A	Issue 02 07/07/2008
Issue 17	17/10/2018	- B737-9 LEAP engines section III.5 amended with – G06 variants.	Issue 02 07/07/2008
Issue 18	24/05/2019	- B737-8/9 certification basis updated with reference to CRI PTC F-30 and PTC F-37 (table 8.II.5.1 and Appendix A) - Section 3.II.4 amended to include F-GEN11 in the 737-700 certification basis	Issue 02 07/07/2008
Issue	**Date**	**Changes**	**TC issue**

SECTION: ADMINISTRATIVE – continued

Issue	Date	- Changes	TC issue
Issue 19	14 Jun 2019	- Section 4.2/ III / 5 operating limitations for 737-800 BCF updated.	Issue 02 07/07/2008
Issue 20	12 Dec 2019	- Section 8 II 6 B737-8/9 Fuel Venting and Exhaust Emission Requirements updated. - EASA new logo and footer introduced.	Issue 02 07/07/2008
Issue 21	26 Jan 2021	- Section 1/ II/ 6. CRI G-GEN1 removed. - Section 2/ III/ 6. Honeywell included as APU supplier - Section 8/ III/ 8. Kathon prohibition introduced for LEAP-1B. - Section 8/ V/ 1. And 2. OSD documentation for MAX RTS updated. - Appendix A CRI PTC F-30 removed from 737-8/-9 CRI list.	Issue 02 07/07/2008
Issue 22	06 Apr 2021	- 737-8200 model added in Section 8. - B737-8200 certification basis integrated in Table A of Appendix A. - Section 8/ VI. Note added for 737-8 airplanes modified by Boeing Service Bulletin 737-21-1217 Lower Cabin Altitude (LCA).	Issue 02 07/07/2008
Issue 23	26 May 2021	- Section 8/ II/ 5.2. Deviation E-30 limit delayed to the end of June 2022.	Issue 02 07/07/2008
Issue 24	11 June 2021	- Section 4/ III/ 6. Limitation to 2,000 flight cycles or 1 year removed.	Issue 02 07/07/2008
Issue 25	17 Nov 2021	- Section 8/I/8. 737-9 Certification date modified. - Section 8/ II/ 5.2. Boeing Service Bulleting reference included for Deviation E-30. - Section 8/ III/13. Certified masses updated. - Section 8/ VI. Note added for 737-9 airplanes modified by Boeing Service Bulletin 737-21-1217 Lower Cabin Altitude (LCA). - Section 8 and appendix A references to CRIs and requirements corrected.	Issue 02 07/07/2008
Issue 26	10 Jan 2023	Section 7/II/3.1 Explanatory note for CRI A.11-13 added. Section 8/III/5 LEAP-1B G variants removed.	Issue 02 07/07/2008
Issue 27	13 Dec 2024	Section 1,2 and 8/VI Compliance with Part 26 included. Section 4/III/19 Minimum Cabin Crew data included. Section 8/II/6 Environmental Requirements updated. Section 8/II/7 MMEL Certification Basis corrected. Section 8/III/20 Correction of ESF CRI D-15 designation	Issue 02 07/07/2008

SECTION: ADMINISTRATIVE – continued

Issue 28	16 April 2025	In first page Boeing address changed. Section 2/III/23 and Section 4/V/6 ETOPS added for 737-800BCF. Section 3/II/3.1 CRI A.11-13 removed. Section 3/III/22, Section 4/III/22, Section 4/V/5 and Section 5/III/22 cargo compartment class changed from D to C. Section 3 737-700, Section 4 737-800, Section 7 737-900ER and Section 8 737Max models IV new Operating and Service Instructions added for UANSOG.	Issue 02 07/07/2008

	25.809(a)			CS 11	**Interiors:** (737-8200 Only) • Emergency Exits (Flight Deck Windows, Forward / Aft Doors, Overwing)	
25.810	Emergency egress assist means and escape routes	JAA/737-700/ESF/D-08 applies to CS 25.810(a)(1)(ii) for forward and aft doors. Note: CRI D-08 was issued against JAR 25.809(f)(1)(ii) Change 13, originally. However, to harmonize with the FAA, the same requirement was moved to JAR 25.810(a)(1)(ii) at Change 14 which is now in CS25.810(a)(1)(ii).
