Subject: Information on recent publications

Dear Sir or Madam,

Please be informed that EASA has recently published revision 1 of SIB 2014-032 providing further guidance to the Commission Decision (EU) 2016-2357 on the necessary investigations in relation to Certificates of Recognition issued by the Hellenic CAA approved Part 147 training organisation named HATA and related Part-66 licences. You can find the revised SIB on the EASA website:

<http://ad.easa.europa.eu/ad/2014-32R1>.

Certifying Staff Authorisations issued by your organisation might have to be reviewed accordingly. This should be done in coordination with the national authority who issued the license to the Certifying Staff. This might be an EU Member State authority in the case of EASA Part 66 license holders or the national authority of your organisation's place of business in case of authorisations issued under EASA Part 145 Appendix IV provisions.

In addition, please be informed that the revised European NDT standard EN 4179:2017 has been published. All Foreign approvals performing NDT inspection, must implement this revision of the standard by 31 of July 2017.

Yours sincerely,

Karl Specht
