

20-22 October 2020

## Management of changes on major airport infrastructure

### Case Studies: Methodology

The aim of the workshop held online in period 20 - 22 October 2020 was to assist project beneficiary countries with technical advice in the change management procedures on major airports infrastructures, to familiarize them with relevant European regulations and requirements through means of practical examples and exercises based on Spanish NAA (AESA) procedures and best practices.

Participation of speakers from Fraport Greece, DAA (Dublin Airport) and SEA (Milano Linate Airport) provided real case examples and how changes were managed at their airports.

Participants were provided with 5 case studies regarding real change management cases that had taken place in Ibiza, Palma de Mallorca, Barcelona, Bilbao and Valencia Airports, and were requested to classify changes and propose way forward.

In total 27 participants from 6 project beneficiary National Aviation Authorities and several aerodrome operators in the region attended the workshop.
