EASA discussed DOA issues with SAAU experts

On 26 and 27 September, EASA organised a Design Organisation Approval meeting with the State Aviation Authority of Ukraine (SAAU) experts under the SAAU-EASA airworthiness convergence project, to provide SAAU experts an opportunity to understand from EASA DOA specialists how technical instructions with respect to DOA are implemented at EASA.

The meeting was organised following the OJT on DOA audit, where two SAAU experts joined the EASA team on a DOA audit as observers.

Altogether 10 participants from SAAU attended the meeting.
