## **Work package 2**

### **Safety Oversight System – Follow-up Moldova**

Within the framework of the EU-funded Eastern Partnership and Central Asia Project (EaP/CA), two on-site support activities were organised in Moldova. Their aim was to continue strengthening the organisational structure (safety oversight system) within the Civil Aviation Authority of the Republic of Moldova, by means of implementation of the tailor-made activities stemming from the Final Report/results of comprehensive evaluation of the MCAA's safety oversight system.

The first activity was held from 18<sup>th</sup> to 22<sup>nd</sup> February with the objective to support the creation of the training division within the MCAA, in order to be able to organise and manage the mandatory and necessary training for inspectors of different departments of the MCAA, based on the recommendations and the list of mandatory NAA inspectors competencies required by ICAO and EASA Part ARO.

The second activity was held from 25<sup>th</sup> to 29<sup>th</sup> March 2019, with the objective to support the organisation/reorganisation of the Quality department of the MCAA, by creating a quality manual containing procedures for monitoring the activities of the different MCAA departments.
