Helicopter Certification Overview training

Between 5 and 6 June 2019, the project delivered a Helicopter Certification Overview training with the objective to achieve familiarity with helicopter principles, areas of application and key challenges in operating helicopters, as background for the related certification activities in this domain. The training covered topics such as: Flight Test Categories, Helicopter Emergency Medical Systems installations, Structures, Personnel Carrying Device Systems, Avionics Installations, Night Vision Imaging Systems, Part 21 and was delivered by EASA expert, Mr Fabrice Legay.

Altogether 33 training participants from SAAU and Ukrainian industry attended the workshop.
