

Kiev, 27 June 2019

Certification Specifications training (hydromechanics)

Between 26 and 27 June 2019 the project delivered a training on CS-25 flight control and hydro-mechanical systems to certification (and design) specialists from SAAU and from invited Ukrainian industry. The training materials were derived from the internal CS-25 Panel 4 training materials and adapted to enter more in depth into the requirements, typical means of compliance and safety risks (in particular in the flight control area). The training was delivered by EASA expert, Mr Cedrik Harang.

Altogether 33 training participants from SAAU and Ukrainian industry attended the training.
