## **Non Destructive Testing Training**

From 22 to 24 May a Non-Destructive Testing (NDT) training was delivered to the State Aviation Authority of Ukraine (SAAU) and the Ukrainian industry.

The overall objective of the training was to allow participants to gain a deeper knowledge of how EASA rules on NDT are applied. The activity covered the following topics:

- Regulatory framework
- EN4179
- Understanding NDT, Written Practice, Auditing NDT
- Review of NDT techniques such as Penetrant Testing, Magnetic Particle Testing, Eddy Current Testing, Ultrasonic Testing, Thermo graphic Testing, Shearography, Radiographic Testing

Altogether 23 training participants from SAAU, the industry and the national aviation university attended the training.
